ONTARIO

DEPARTMENT OF INSURANCE

To The Honourable W. H. Price, K.C., LL.B.,
Minister in charge of the Department of Insurance.

I have the honour to submit herewith the Fifty-first Annual Report of the Superintendent of Insurance for the year 1930 (business for the year ended 31st December, 1929).

The Report is arranged in the following five divisions and includes an index in which all insurers licensed to carry on business in Ontario are listed together with license numbers and classes of insurance for which authorized:—

I. Annual Statements.
II. Annual Statement Abstracts.
III. Movement of Securities.
IV. Statistical Tables.
V. Appendices.

The first division, entitled "Annual Statements," contains extracts from the Annual Statements filed with the Department by all licensed insurers, arranged alphabetically by class of insurer. Having regard to the continued practical distribution of authority and responsibility between Dominion and Provincial Departments of Insurance, it still seems unnecessary for this Department to require or publish detailed particulars of the financial condition of Dominion licensed insurers. Accordingly, such insurers have been required to file only Modified Statements summarizing their assets and liabilities and showing their underwriting experience within the Province only with the Department and this skeleton information only has been included in this report.

Division II, entitled "Annual Statement Abstracts," is virtually a reprint of the Abstract of this Report published under date of June 7th, 1930. Included herein are tabulated summaries showing the financial condition of all insurers not licensed under the Insurance Act (Dominion). In case of any discrepancy between any figures shown in this division and those shown in Division I with respect to any particular insurer, the figures included in Division I should be understood to prevail.

In Division III will be found a statement showing the movement of securities owned by joint stock and cash mutual insurance companies incorporated under the law of Ontario. This shows the details of stocks, bonds and debentures purchased, sold or matured during the year and is a continuation of a similar statement published in the 1929 Report.

Division IV, entitled "Statistical Tables," shows in tabulated form premiums and losses of all licensed insurers (except mutual benefit societies) analyzed according to class of insurance. These tables are briefly summarized in the following paragraphs.

Division V, entitled "Appendices," contains a review of 1930 Legislation and a record of certain memoranda rulings, etc., issued by the Department; also certain miscellaneous information under the various headings indicated in the table of contents.

Life Insurance.

Forty-five companies were licensed at the end of 1929 to transact life insurance. This is two less than at the end of the previous year, the Equity Life Assurance Co. and the Commonwealth Life and Accident Insurance Co. having reinsured in or amalgamated with other companies during 1929, leaving a total of thirty-five joint stock companies and ten mutual corporations. The premium income on Ontario business amounted to over eighty million dollars, an increase of 10 per cent. over 1928.

Disbursements to Ontario policyholders amounted to over forty-five million dollars, an increase of 26.1 per cent. over 1928. A comparative summary of premium income and disbursements for 1927, 1928 and 1929 is given below:

		1929	1928	1927
Net Premium Income:				
Assurances	Ordinary	$60,490,724 01	$55,362,598 70	$65,561,133 77
	Industrial	17,258,137 51	15,502,213 44	
	Group	1,787,876 54	1,427,044 44	
Annuities		1,072,794 31	770,896 34	317,029 63
Totals		$80,609,532 37	$73,062,752 92	$65,878,163 40
Disbursements to Policyholders:				
Death claims		$15,706,152 31	$11,197,681 99	$10,966,745 32
Matured endowments		4,468,120 71	3,854,452 94	3,522,712 19
Surrender values		11,551,352 58	9,341,074 64	8,257,787 10
Dividends		13,013,884 48	11,048,308 56	8,689,006 04
Other payments		867,537 44	730,432 39	534,330 44
Totals		$45,607,047 52	$36,171,950 52	$31,970,581 09

New business issued in Ontario during the year, as shown in Table VI, Division II, amounted to over four hundred and ninety-three million dollars, an increase of approximately 11 per cent. over 1928. Total business in force in Ontario at the end of 1929 was 2,542,528,235, which represents an increase of 11 per cent. over the previous year. Attention is drawn to the item "other deductions," amounting to $313,543,974. This amount represents policies terminated by surrender or lapse and is equivalent to over 63 per cent. of the amount of new business issued during the year and to 12.4 per cent. of the amount in force at the end of the year.

Fraternal Societies.

Thirty-seven fraternal societies held licenses as at the end of the year to transact life insurance in Ontario. This number includes seven municipal pension fund societies, which, although authorized to pay death benefits, do not issue mortuary certificates. Twenty-three are also authorized to grant sick or funeral benefits. The premium income and disbursements respecting Ontario business for 1929, according to class of fund, are as follows:—

	Premiums (including dues)	Disbursements
Mortuary Fund	$3,055,525 65	$2,993,376 38
Sick and Funeral Funds	241,675 58	228,067 09
Expense Fund	251,557 69	209,561 39
Other Funds	341,142 26	210,622 88
Total	$3,889,901 18	$3,641,627 74

The amount of mortuary certificates in force at the end of 1929 was $108,506,054, which represents a decrease of over twelve and one-half million dollars, of which approximately ten and one-half millions was business of The Oddfellows' Relief Association which was reincorporated during the year as a mutual life insurance company.

Fire Insurance.

The number of companies licensed to transact fire insurance in Ontario increased during 1929 from 313 to 328. Premiums and losses for the various classes of insurers defined by the Act are tabulated below, together with comparable figures for 1928:

	1929			1928		
	Net premiums written	Net losses paid	Ratio	Net premiums written	Net losses paid	Ratio
	$	$	%	$	$	%
Joint Stock	19,122,335	9,410,537	49.21	18,844,135	8,669,062	46.00
Mutuals:						
(a) Farmers' Mutuals	1,791,738	1,684,443	94.01	1,739,730	1,205,954	69.31
(b) Associated New England Factory Mutuals	1,116,187	112,534	10.08	498,536	61,469	12.32
(c) Other Mutuals	671,505	339,409	50.54	627,215	262,294	41.81
Cash Mutuals:						
(a) Without share capital	1,263,151	698,058	55.26	1,202,648	540,434	44.92
(b) With share capital	90,581	36,680	40.49	72,566	23,583	32.49
Reciprocal exchanges	364,856	165,274	45.30	332,480	54,000	16.24

Automobile Insurance.

The number of companies licensed to transact automobile insurance in Ontario stood at 140 at the end of the year and their premiums and losses are shown in table XII of this Report. Net premiums written amounted to over eight million dollars, which is an increase of 32.5 per cent. over the previous year. Net premiums earned increased by approximately the same percentage. Losses incurred amounted to $4,313,383, which is an increase of about 20 per cent. over 1928. The year's experience on the basis of loss ratios appears to have been decidedly more favourable than in the previous two years, the ratio of losses incurred to premiums earned having dropped from 63.5 per cent. in 1928 to 57.4 per cent. in 1929.

	Net premiums written	Net losses paid	Ratio of losses paid to premiums written	Net premiums earned	Net losses incurred	Ratio losses incurred to premiums earned	Ratio losses incurred to premiums written
	$	$	%	$	$	%	%
1925.......	3,463,149	....	....	....	1,631,926	....	47.1
1926.......	3,743,532	1,881,330	50.25	3,657,994	2,037,903	55.7	54.4
1927.......	4,643,948	2,576,430	55.47	4,295,003	2,835,352	66.0	61.0

1929.......	8,324,146	4,182,537	50.24	7,520,896	4,314,383	57.4	51.8

The investigation into the reasonableness of automobile insurance rates in the Province of Ontario by the Honourable Mr. Justice Hodgins, the Commissioner appointed to enquire into and report thereon, was referred to in my previous report. In March, 1930, an Interim Report on "Compulsory Insurance and Safety Responsibility Laws" recommended Financial Responsibility Legislation, which was enacted at the last Session of the Legislature in substantially the same form as recommended by the Commissioner. It came into force on September 1st, 1930. This legislation is briefly described in Appendix I to this report. The hearings before the Commissioner concluded on December 3rd, 1930, but the Final Report relating to the reasonableness of the 1929 automobile insurance premium rates is not available at this time.

Casualty and Miscellaneous Insurance (*other than Automobile.*)

The following table shows the premiums and losses on Ontario business for other casualty and miscellaneous classes of insurance:

Class	Net premiums written	Net losses paid	Ratio losses paid to premiums written	Net premiums earned	Net losses incurred	Ratio losses incurred to premiums earned
	$ c.	$ c.	%	$ c.	$ c.	%
Accident..........	1,460,683 30	662,727 80	45.37	1,428,899 14	658,841 01	46.11

Sickness...........	703,861 82	416,328 25	59.15	606,024 53	375,459 18	61.95
Steam Boiler......	265,917 61	23,081 55	8.68	243,020 11	20,931 19	8.61
Weather..........	83,246 34	84,306 32	101.27	*7,906 68	*4,037 15	51.06
Totals........	8,146,372 30	3,406,642 86	41.83	*7,657,640 21	*3,465,289 80	45.25

*Excludes mutual weather insurance companies operating on the premium note plan.

As compared with figures for 1928, net premiums written show an increase of approximately $875,000, or 12 per cent. Losses paid increased by about $575,000. The loss ratio on the basis of losses paid to premiums written was 41.83 per cent., as compared with 38.92 per cent. in 1928. On the basis of losses incurred to premiums earned, the ratio was 45.25 per cent. as compared with 43.18 per cent. for the previous year.

COMPANY CHANGES

By supplementary letters patent dated March 11th, 1930, the name of "The Toronto Casualty Fire and Marine Insurance Company" was changed to "The Toronto General Insurance Company."

By supplementary letters patent dated August 15th, 1930, the name of "The Pilot Automobile and Accident Insurance Company" was changed to "The Pilot Insurance Company," and the head office was changed from Waterloo to Toronto.

GUARANTEE COMPANIES APPROVED FOR COURT PURPOSES, ETC.

Since the date of the last Annual Report the guarantee bonds of the following companies have been approved by Order-in-Council for acceptance in lieu of personal or private suretyship prescribed or required by the Guarantee Companies Securities Act, or the Judicature Act, or the Public Officers Act, or any other similar Act of the Province of Ontario.

The Prudential Assurance Company, Limited.
The Metropolitan Casualty Insurance Company of New York.

LICENSING OF INSURANCE AGENTS

During the license year ending September 30th, 1930, upwards of 10,000 life insurance agents and 7,000 other than life insurance agents were licensed under the so-called Agents Qualification Law. This represents a substantial increase in both classes of license issued.

In this connection attention is drawn to the functioning of the Advisory Board constituted under the provisions of Section 256 (9) of the Insurance Act, which consists of a representative of the insurers, a representative of the agents, and a representative of the Superintendent. During the license term above mentioned the Board held thirty meetings at which 375 applications for license or renewal of license were considered. In fifty-eight of these the Board recommended that licenses be granted and in nine cases licenses limited to one class of insurance or another were granted. In twenty cases the application was withdrawn by the company by which it was recommended and twenty-three applications were withdrawn by the applicants themselves. In the remaining 265 cases the Board unanimously recommended that the application be declined.

The work of the Advisory Board is increasing each year and all doubtful applications for license or renewal of license are referred to it for investigation and report. The system is recognized by companies and agents alike as beneficial and through it the Department is able to render services to the business as well as the public. The elimination of unsuitable persons from the insurance agency field directly benefits all policy holders and prospective policy holders. The companies have benefited by the close check which has been kept on delinquent agents and many thousands of dollars have been saved to them which otherwise would have been written off as bad debts. On the other hand, the agents benefit through the granting of licenses only to persons who are in a position to hold themselves out publicly and carry on business as *bona fide* insurance agents.

In the life insurance field, fewer applications are referred to the Advisory Board owing to the fact that doubtful applications are first referred to a Joint Committee of the Canadian Life Insurance Officers Association, the Life Agency Officers Association and the Life Underwriters Association of Canada. This committee discusses the application with the recommending company and it is referred to the Advisory Board only where no settlement is reached. During the license year 1929-30 only sixteen life insurance applications were heard by the Advisory Board.

Ontario Legislation

A review of insurance legislation enacted at the 1930 session of the Legislature is included as Appendix I to this report.

R. Leighton Foster

Superintendent of Insurance

Parliament Buildings, Toronto,
December 9th, 1930.

Summary of Reserve

	With Profits	Without Profits	Total
Total reserve, assurance and annuity contracts	$554,303	$778,533	$1,332,836
Total reserve on reinsured contracts	22,887	34,369	57,256
Total net reserve on the Company's basis of valuation before deduction permitted by statute	$531,416	$744,164	$1,275,580
Deduction made therefrom (permitted under The Ontario Insurance Act)	99,514	98,646	198,160
Full deduction permitted, adjusted for reinsured, being	(99,514)	(98,646)	(198,160)
Net reserve carried in the liabilities	$431,902	$645,518	$1,077,420
Net reserve computed on the statutory basis (without deduction)	531,416	744,164	1,275,580
Reserve maintained by the Company in excess of the statutory reserve	Nil	Nil	Nil

Miscellaneous Statement

I. The calculation of the "Reserve" in the "Statement of Actuarial Liabilities."

(I) The policies in force were grouped for valuation purposes according to the year of issue age nearest birthday and plan and were then valued by tables of mid-year reserves by the net premium method.

(a) No policies have been issued on lives resident in tropical or sub-tropical countries.
(b) Policies issued at a rated-up age were valued as at the rated-up age.
(c) The full level reserve was held on liened policies.
(d) No extra reserve was held where an extra premium whether annual or single was charged.
(e) Policies on lives classed as sub-standard were not issued except as above.
(f) (1) For disability benefits including the waiver of premium only and for benefits including the waiver of premium and the disability annuity without reduction in the sum assured a reserve was held amounting to 50% of the gross premiums paid from the date of issue of the policies.
(2) After the occurrence of disability for policies including the waiver of premium and annuity benefits without deduction from the sum assured the amount of additional liability is the present value of future annuity payments and premiums waived valued by hunter's disability 3% table as follows: 50% of said value in the case of a claim now in the first year of disability; 75% for claim in the second year of disability ; and 100% in case disability has existed for more than two years.
(g) No annuities on sub-standard lives have been issued.
(h) On business not reinsured, a reserve was held equal to 50% of the current premium charged for the accidental death benefit.

(2) Items of Special Reserve:

(a) No additional reserve was held for prepaid or limited loadings in the case of single or limited payment policies.
(b) Where the cash values guaranteed exceed the O.M. (5) 3½% net value, an addition to the reserve was made so that the amount held at the end of the premium paying period would equal the cash guarantee.
(c) In the case of policies which had lapsed and were not continued under the automatic non-forfeiture provision but were subject to reinstatement, no extra reserve was held.
(d) No reserve was held to cover option of renewal under term policies.
(e) No reserve was held to cover option of conversion where one exists to a higher premium plan.
(f) One immediate annuity with single premium is in force and was valued by the B.O. annuity table with interest at 4%.

II. No modifications were made in guaranteed values for the special classes referred to above. In each case the premium, reserve and surrender values were calculated at the same age.

III. The average rate earned was 5.83%.

IV. (a) No distribution of surplus as between shareholders and policyholders has been made.
(b) No reserve has been maintained on account of accruing profits under participating policies.
(c) There are no participating annuities in force.

Reserve maintained by the Company in excess of the statutory reserve	....	Nil	....

Miscellaneous Statement

I. (1.) The calculation of the "Reserve" in the "Statement of Actuarial Liabilities" was made using the Om (5) Table of Mortality throughout with interest at 3½%, taking advantage of the deductions allowed in the first ten years by the Ontario Insurance Act. On business taken over from the Equity Life and dated from and after April 1, 1925, an extra reserve was held sufficient to bring the Hm 3% reserve at the end of 20 years.

(a) The number of policies issued to residents in tropical or semi-tropical countries was negligible and no other reserve was set up.

(b) Policies issued at ages higher than the true ages were valued at the rated up age.

(c) Policies issued with a lien were valued as if no lien existed, *i.e.*, the lien was ignored.

(d) (1) The company has no policies in force with an extra premium payable in one sum.

(2) On policies issued with an extra premium payable annually, fifty per cent. of the annual extra is held as reserve.

(e) All substandard policies issued by the Company are on the basis of (b), (c), (d).

(f) The reserve held for disability benefits is as follows: (1) Before occurrence, 50% of the accumulated disability premiums collected on business in force Dec. 31, 1929, was held as reserve; (2) after occurrence for claims in the first year 80% of Hunters, 3% disabled life reserve as recommended by a Committee of the Actuarial Society of America; for claims of duration over one year 100% of Hunters, 3% reserve.

(g) The Company has no annuities other than two supplementary contracts.

(h) On policies providing for additional accidental death benefits, the Company held 50% of the additional extra premium therefor.

(2.) Items of Special Reserve—The Company has a series of guaranteed premium reduction policies for which extra reserve is held for the reducing premiums, such extra reserve being included in the general policy reserves.

II. No modifications. The extended term insurance is usually eliminated.

III. The average rate of interest earned in 1929 was 6.52%.

IV. All policies issued and in force are non-participating except a very few deferred dividend policies on which no dividends were paid in 1929.

Miscellaneous Statement

I. (1) In the calculation of the reserve entered in the Actuarial Liabilities the table used was American Men (5); with 3½% interest for all policies issued since the formation of the Company on the 8th of June, 1929; and 4% interest for all policies issued by the Society previous to that date. Prepared tables of mid-year values were used in valuing the policies issued by the Company, and the Life 20, Endowment 20, and Endowment at 65 policies issued by the Society. The reserve for the Whole Life policies issued previous to June, 1929, was found by valuing the sums insured and the net premiums separately; at the attained age plus a half. All policies were grouped except those issued since June last, which were valued seriatim.

The total disability feature, waiver of premium, with income in most cases, and the double indemnity feature, were added to some policies in the last class mentioned, but an extra premium was paid for those benefits, if they were included. One-half of such extra annual premiums is included in the liabilities. All policies issued before June, 1929, provided for payment of $500.00 in certain cases of disability from accident; $500.00 per member, not $500.00 per $1,000.00. If this payment is made, the insurance is reduced by that amount, and the premium is reduced proportionately. A reserve of $25,000.00 has been set up to cover these future payments, as nothing was added to the premium for that purpose. They also carry a disability benefit granted by the Company last year providing for a waiver of premiums in cases where a member has been both totally and permanently disabled for at least six months before the claim For this benefit a reserve of $30,000.00 was held to cover all cases, both those which have emerged and future ones.

Special Classes:

(a) No policies were issued on lives resident in tropical or sub-tropical countries.
(b) Where policies were issued at a rated up age, the reserve was taken at the same age as was used in calculating the premium.
(c) Policies issued subject to a lien were valued at the full amount of insurance.

Miscellaneous Statement—*Continued*

(d) Where policies were issued subject to an extra premium payable annually, one-half of such annual extra was included in the reserve. None have been issued with an extra premium payable in one sum.
(e) No policies classed as sub-standard have been issued except as above.
(f) Policies providing for a disability benefit, waiver of premiums, with or without an income, were valued: (1) before occurrence of disability, at one-half the annual extra premium; (2) thereafter by valuing the payments, employing a disabled table (no such cases have as yet emerged); waiver of premium benefit which applies to policies issued previous to June, 1929, has been already dealt with above.
(g) No annuities have been issued to under-average lives.
(h) Policies providing for additional accident death benefits, one-half the additional extra premium has been included in the reserve.

(2) Items of Special Reserve:

(a) No reserve is maintained on account of loadings with limited payment or single premium policies or for annuities.
(b) There are no cases where the guaranteed benefits exceed the net premium reserve held.
(c) No reserve is held on account of policies lapsed and actually written off the books. For those lapsed and not written off, the full reserve has been carried in the liabilities.
(d) No extra reserve is held to cover the option of renewal on the term policies.
(e) Nor to cover the option of conversion.
(f) Other than above there are no items of special reserve.

II. Where a policy is issued at a rated up age, the guarantees contained in the contract are for the same age as was used in calculating the premium. For other special classed policies the values as for the real age at issue were given. Automatic extended term insurance is not given in any case.

III. The average rate of interest earned during the year was 5.42%.

IV. No distribution of surplus has been made as yet to any member.

Valuation Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Net reserve under whole life certificates	$1,654,400 00
Net reserve under endowment certificates	22,000 00
Net reserve under 20-payment life certificates	39,700 00
General reserve	57,900 00
Uncompleted claims	42,500 00
	$1,816,500 00

Assets

Cash	$47,800 00
Securities with accrued interest	1,846,900 00
Real estate	32,000 00
Liens on certificates	3,300 00
	$1,930,000 00

The ratio of assets to liabilities was 106.25 per cent.

The valuation basis was Canadian Men Ultimate Table at 3½%.

The amount of whole life insurance valued was $9,620,166.00 Twenty-payment certificates for $747,550.00. Endowment at age 65 certificates for $367,750.00; twenty-year endowment, $168,750.00; and child insurance for $167,357.00 were also valued.

SICK DEPARTMENT

Liabilities

Future sickness claims	$380,720 00
Future death claims	69,020 00
Special sickness reserve	38,320 00
Unpaid claims	1,080 00
	$489,140 00

Assets

Future assessments	$287,420 00
Funds with accrued interest	216,420 00
Cash	9,760 00
	$513,600 00

The ratio of assets to liabilities was 106%.

The valuation basis was Manchester Unity Table with 3½%.

The valuations were made by M. A. Mackenzie, Fellow of the Institute of Actuaries of Great Britain.

Totals..	35,425
Terminated during 1929 by:	
Death..	509
Lapse..	1,644
Total terminated..	2,153
In force, 31st December, 1929..	33,272

Valuation Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Net reserve under whole life certificates, paid-up certificates, limited payment life and endowment..	$9,974,400 00
Special mortuary reserve..	900,000 00
General reserve..	222,800 00
Investment reserve..	300,000 00
Accrued claims..	167,900 00
	$11,565,100 00

Assets

Life insurance fund..	$12,201,200 00

The ratio of assets to liabilities was 105.50 per cent.

The valuation basis was Cm (5) 3½ per cent. (Canadian Males Table of Mortality).

The amount of whole life insurance valued was $44,027,750. The amount of paid-up insurance valued was $876,174. The amount of all other insurance valued $5,574,000. According to the Constitution no reserve is held for certificates in their first year.

The valuation was made by M. A. Mackenzie, Fellow of the Institute of Actuaries of Great Britain.

SICKNESS DEPARTMENT

Certain amendments touching the sickness rates and benefits were recommended to High Court during the year by the Actuary. These were, in part, adopted. Further report thereon is under consideration and an additional statement will be furnished in next year's valuation report. Meantime the amount of the sickness fund has been carried as a liability in the Balance Sheet.

Valuation Balance Sheet

MORTUARY FUND

(as at 31st December, 1929)

Liabilities

Net reserve on outstanding insurance	$872,800 00	
Special investment reserve	67,000 00	
Accrued liabilities (death claims)	2,000 00	
Total		$941,800 00

Assets

Real estate	$50,000 00	
Mortgages	781,208 00	
Bonds and debentures	231,464 00	
Cash in bank	19,619 00	
Total		$1,082,291 00

The ratio of assets to liabilities is 115 per cent.

The valuation of the Ordinary Life business was made upon the basis of the National Fraternal Congress Table of Mortality with interest at 4 per cent. (assuming that 10 per cent. of the monthly premiums may be required to cover future deficiencies in the General Fund). The valuation of the other plans was also made on the basis of the National Fraternal Congress Table of Mortality with 4 per cent. interest, except that for convenience the Endowment at 65 plan was valued on the British Offices OM Table with interest at 4 per cent.

The amount of insurance valued was $2,741,000.

The Actuary certifies that the assets of the Society as at the date of valuation, together with the contributions to be hereafter received for members in accordance with the scales of premium rates in force at that date, are sufficient to provide for the payment at maturity of all the obligations of the Mortuary Fund without deduction or abatement.

The valuation was made by L. K. File, Fellow of the Actuarial Society of America.

Valuation Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Net reserve, policies and bonus	$1,011,851 00
Accrued liabilities (death claims)	16,341 00
	$1,028,192 00

Assets

Ledger assets and accrued interest	$1,275,968 00

The ratio of assets to liabilities was 123 per cent. The valuation basis was N.F.C. 4 per cent. The amount of insurance valued was $4,471,695.00.

SICKNESS DEPARTMENT

Liabilities

Net reserve	$26,196 00

Assets

Amount (funds applicable to sickness benefit)	$24,744 00

The valuation for sickness contracts was the Manchester Unity Table (modified), combined with N.F.C. mortality, with interest at 4 per cent.

The valuation was made by W. R. Hitchins, Fellow of the Actuarial Society of America.

Valuation of Balance Sheet

MORTUARY DEPARTMENT

Liabilities

Present value of promised benefits	$6,853,773 00
Claims payable by instalments	10,796 76
Computed value of disability claims	3,649 00
Other liabilities	14,934 17
	$6,883,152 93

Assets

Present value of future contributions	$3,658,679 00
Assets applicable to benefits	3,653,694 33
Sickness already paid upon certificates in force	138,378 56
	$7,450,751 89

The ratio of assets to liabilities was 108.2 per cent.
The rate of interest earned in 1929 was 5.27 per cent.
The amount of insurance valued was $16,459,173.50.
The valuation basis was N.F.C. 4 per cent.

SICKNESS DEPARTMENT

Liabilities

Present value of benefits	$1,504,805 00

Assets

Present value of contributions	$1,138,315 00
Funds applicable to benefits	179,189 95
	$1,317,504 95

Degree of solvency, 87.5 per cent.

INFANTILE FUND

Liabilities

Reserve	$5,029 00

Assets

Funds applicable to benefits	$7,589 54

The valuation was made by J. B. Mabon, Fellow of the Institute of Actuaries of Great Britain, and Fellow of the Actuarial Society of America.

The Actuary certifies as to the Sickness Fund, as follows:

The continued favourable experience has increased the funds available and the resulting adjusted rates of sickness have reduced the reserve so that the deficiency has been reduced by $68,740.00 as compared with 1928. This report is for valuation purposes only and consequently no proposals or overcoming the deficiency are suggested. Continued improvement in the Sickness Experience may in time make the fund solvent without adjustment.

As to the Infantile Fund, as follows:

The reserve together with the contributions to be hereafter received according to the rates at present in force is sufficient to provide for the payment at maturity of all the obligations of the Infantile Fund without deduction or abatement.

50-54	52,400	25,288	102 16	16,158	9,130	4,556	2,204
55-59	24,400	13,262	54 24	7,574	5,688	2,471	1,344
60-64	11,300	6,927	26 59	3,145	3,782	1,477	907
65-69	3,700	2,507	10 26	1,012	1,495	520	353
70-74	1,450	1,076	5 49	433	643	203	150
75-79	1,850	1,505	4 63	268	1,237	259	211
80-84	1,000	858	2 47	109	749	140	120
85-89	....	....	....	....	....	....	....
Total	$513,650	$193,289	$753 90	$137,790	$55,499	$31,628	$13,151

The above valuation was made on the following basis, namely, the National Fraternal Congress Table of Mortality and 4 per cent. interest. The monthly rates valued were as follows: In respect of the option (a) members, the rates valued were three-quarters of the rates payable; in respect of all other members the rates valued were 5 cents less than the rates payable for each $200 or $250 of insurance as the case may be. The valuation was made by Mr. A. D. Watson.

‡The Federation is licensed to transact sick and funeral benefits only. It is not authorized to undertake contracts of life insurance.

Under date July 1st, 1928, a group life insurance contract was issued by the Northern Life Assurance Company of Canada on the application of certain trustees for members of the Federation, whereunder the members of the Federation are insured up to a maximum of $1,000 each and the secretary of the Federation acts as collection agent for the trustees. The Federation is not a party to this group life insurance contract. The premiums collected by the secretary of the Federation are accordingly not included in the annual statement of the Federation filed with the Department.

‡The Federation is licensed to transact sick and funeral benefits only. It is not authorized to undertake contracts of life insurance.

Under date July 1st, 1928, a group life insurance contract was issued by the Northern Life Assurance Company of Canada on the application of certain trustees for members of the Federation, whereunder the members of the Federation are insured up to a maximum of $1,000 each and the secretary of the Federation acts as collection agent for the trustees. The Federation is not a party to this group life insurance contract. The premiums collected by the secretary of the Federation are accordingly not included in the annual statement of the Federation filed with the Department.

‡The Federation is licensed to transact sick and funeral benefits only. It is not authorized to undertake contracts of life insurance.

Under date July 1st, 1928, a group life insurance contract was issued by the Northern Life Assurance Company of Canada on the application of certain trustees for members of the Federation, whereunder the members of the Federation are insured up to a maximum of $1,000 each and the secretary of the Federation acts as collection agent for the trustees. The Federation is not a party to this group life insurance contract. The premiums collected by the secretary of the Federation are accordingly not included in the annual statement of the Federation filed with the Department.

*Reserve of unearned premiums carried out at 100%. †A stock-mutual company limited in Ontario to Fire Insurance on the cash plan.

a Includes reserve on life policies in Quebec, $147,349; *b* Includes reserve for loss on investments, $7,659.42; *c* Includes reserve for loss on investments, $8,675.95; *d* Stanstead reserve unearned premiums carried at 95%. *e* Includes reserve for loss on investments, $3,690.02; *f* Includes reserve for loss on investments, $17,465.13; Workmen's compensation, $102,298.88; Unlicensed reinsurance premiums, $99,352.

**This amount includes approximately $290,000 paid in excess of the purchase price of certain shares as finally determined. The company has been authorized by statute (1930 c116) to increase or decrease its capital by change in the par value of shares or in number of shares outstanding. The capital reconstruction so authorized is now proceeding with the object of maintaining the surplus to policyholders by reinvestment in the company of these moneys now owing shareholders in respect of this over-payment for shares.

‡Recoveries on disallowed assets since January 1st, 1930, exceed $20,000.

V

APPENDICES

APPENDIX I

REVIEW OF 1930 LEGISLATION, ONTARIO

During the recent Session important amendments were effected to *The Insurance Act*, R.S.O. 1927, c. 222, by an amendatory Act cited *The Insurance Act, 1930* (1930, c. 41).

The following is a synopsis of the amendments so effected:

Statistical Records (Automobile):

The Insurance Act is amended by adding thereto a new section 69*a*, requiring all insurance companies transacting automobile insurance in Ontario to keep such records of their automobile premiums, loss and expense costs in Ontario as the Superintendent may require and to have them compiled and combined for the information of the Department in such form and manner as may be prescribed. This is designed to ensure that the Insurance Department shall have before it records and statistics according to a standardized plan so as to reflect the exact cost of insurance.

Agents' Balances, Admitted Assets, etc.:

Section 70 (7) is amended by striking out the words "which are more than three months overdue" and substituting therefor the words "in respect of business written prior to the 1st day of October in the next preceding calendar year" and by adding after the word "unpaid" in the fourth line the words "capital or." This amendment clarifies the meaning of the section and prohibits joint stock insurance companies showing capital subscribed and unpaid as an asset.

Published Statements:

Section 71 of the Act is amended by adding after the word "Superintendent" the words "or a balance sheet or other statement in form differing from the form prescribed by the regulations."

This is designed to prohibit the circulating within the Province of misleading financial statements and authorizes the Lieutenant-Governor-in-Council to prescribe the form in which balance sheets and other financial statements must be published.

Contents of Policy:

Section 84 of the Act, as amended by 1929, c. 53, section 10, is repealed and a new subsection substituted therefor, reading as follows:

84 (1) Every policy shall contain the name and address of the insurer, the name, address, occupation or business of the insured, the name of the person to whom the insurance money is payable, the premium for insurance, the subject-matter of the insurance, the indemnity for which the insurer may become liable, the event on the happening of which such liability is to accrue, and the term of the insurance.

(2) This section shall not apply to contracts of guarantee insurance.

The new section has nothing to do with the subject-matter of the repealed section which is now unnecessary in view of the amendments to *The Highway Traffic Act*. The new section makes applicable to insurance contracts generally (except contracts of guarantee insurance) provisions now applicable to fire insurance policies (section 97), automobile insurance policies (section 173), and accident and sickness insurance policies (section 186).

Right of Claimant against Insurer:

Section 85 of *The Insurance Act* is repealed. Subsection 1 of the repealed section gave an execution creditor the right of action against the insurer in cases where a judgment has been returned unsatisfied respecting injury or damage to persons or property of others.

This subsection is now unnecessary on account of the amendments to *The Highway Traffic Act*, recommended in the Interim Report of the Hon. Mr. Justice Hodgins, which makes the liability of the insurer to third party claimants absolute.

Subsections 2 and 3 of the repealed section were enacted before the decision of the Supreme Court of Canada in Armand vs. Carr (1927), S.C.R. 348, and are now unnecessary.

Fire Insurance:

Section 95 (2) of the Act is amended by striking out the words "and insuring any manufacturing or mercantile risk." This amendment is designed to broaden the powers of companies insuring other than mercantile or manufacturing risks.

Fraternal Societies:

Section 207 (*b*) is amended to empower fraternal societies to issue mortuary certificates in amounts up to $10,000 and to exempt societies granting double indemnity accident benefits from that limit. This gives Ontario incorporated fraternal societies similar powers to those granted Dominion societies by amendments to the Dominion Insurance Act in 1929.

Section 208 (*e*) of the Act is repealed and the following substituted therefor:

208 (*e*). A corporation which undertakes or offers to undertake contracts of insurance prohibited by section 207."

Authority of Agents:

Section 256 (12) of the Act is amended by adding at the end thereof the following words: "but may not act as agent or broker directly, or indirectly through a broker licensed for business with unlicensed insurers under section 259 or otherwise, in dealing with unlicensed insurers."

This amendment is designed to prohibit agents or brokers who are not licensed to transact business with unlicensed insurers under section 259, doing business with unlicensed insurers, either directly or through a broker.

Licensing of Railway Ticket Agents:

Section 256 is further amended by adding thereto a new subsection, 15*a*, which provides for the issue of licenses to railway ticket agents subject to such regulations as the Lieutenant-Governor-in-Council may prescribe. Previously only railway accident ticket policies were issued through railway agents. Special regulations are necessary to authorize them to act as insurance agents for other classes of insurance.

Unlicensed Insurance:

Section 259 of the Act is amended by adding a new subsection, 10*a*, which prohibits special brokers licensed for business with unlicensed insurers accepting business from other agents or brokers who are not so licensed.

Automobile Insurance Rates:

The Insurance Act is amended by adding thereto the following section:

275*a* (1). It shall be the duty of the Superintendent, after due notice and a hearing before him, to order an adjustment of the rates for automobile insurance, whenever it is found by him that any such rates are excessive, inadequate, unfairly discriminatory, or otherwise unreasonable.

(2). Any order made under this section shall not take effect for a period of ten days after its date, and shall be subject to appeal within that time by any insured, insurer or rating bureau, in the manner provided by section 12 of this Act and, in the event of an appeal, the order of the Superintendent shall not take effect pending the disposition of the appeal.

(3). The Attorney-General shall be served with notice of any such appeal and shall be entitled to be heard by counsel upon the hearing thereof.

(4). Any rating bureau, insurer or other person failing to comply with any provision of such order shall be guilt of an offence.

This section, which comes into force upon proclamation by the Lieutenant-Governor-in-Council, empowers the Superintendent of Insurance to order an adjustment of the rates for automobile insurance whenever it is found by him that such rates are excessive, inadequate, unfairly discriminatory, or otherwise unreasonable. This amendment was recommended in the Interim Report of the Hon. Mr. Justice Hodgins.

Commencement of Act:

The amendment to section 84 of the Act by 1930, c. 41, s. 5, and repeal of section 85 of the Act by 1930, c. 41, s. 5, come into force on the 1st day of September, 1930. The new section, 275*a*, as enacted by 1930, c. 41, s. 12, comes into force on a day to be named by the Lieutenant-Governor by his proclamation. All other sections of the Act came into force on the day upon which it received Royal Assent, viz., April 3rd, 1930.

In addition to the amendments effected to *The Insurance Act* heretofore described, certain amendments respecting other laws in Ontario and affecting the business of insurance were enacted as follows:

Loan and Trust Corporations:

The Loan and Trust Corporations Act, 1930, c. 42, is amended by the addition of a new section, 36*a*, which prohibits any registered loan or trust company or any director, officer or employee thereof and any company, the majority of the capital stock of which is owned or controlled by such loan corporation or trust company, transacting the business of an insurance agent or broker within the meaning of *The Insurance Act.*

Highway Traffic Act:

The Highway Traffic Amendment Act, 1930, c. 48, is substantially the draft bill recommended by the Hon. Mr. Justice Hodgins in his Interim Report on Compulsory Insurance and Financial Responsibility Laws. The amended Act requires all motor vehicle drivers, who are convicted of a major offence under *The Highway Traffic Act* or any criminal offence or fail to satisfy a judgment arising out of a motor vehicle accident, to prove their financial responsibility to the Registrar of Motor Vehicles as a condition of being allowed to continue to use the highways. Moreover, the Registrar of Motor Vehicles is empowered to require proof of financial responsibility from any person who has contributed in whole or in part to a motor vehicle accident and to require persons to satisfy all judgments rendered against them in respect of motor vehicle accidents in addition to proving their financial responsibility for the future as a condition of their right to continue to drive on the highway.

This Act contains important provisions respecting motor vehicle liability policies. The Act applies to all such policies issued or in force after the 1st day of September, 1930. The coverage of such policies for both owners and drivers is set out in detail in the new section, 87, of *The Highway Traffic Act*, which also requires the approval by the Superintendent of Insurance of all forms of policies. Moreover, all policies are to be subject to certain provisions contained in this section, whether or not the provisions are contained in the policy and notwithstanding any liability or statute or provision of the policy to the contrary.

These provisions make the liability of insurance companies to third party claimants absolute. This new section, 87, constitutes a fundamental change in the law of automobile insurance contracts in Ontario.

The new section, 91, of *The Highway Traffic Act* authorizes the Lieutenant-Governor-in-Council, upon the recommendation of the Minister of Highways, to classify all drivers and to require those who have shown themselves extra hazardous risks to pay a demerit rate for insurance of 50%, 25%, or 10% according to the class "A", "B", or "C" in which they are classified.

Companies Act Amendments:

The Companies Act, R.S.O. 1927, c. 218, is amended by *The Companies Act, 1930*, c. 37, which adds four new sections dealing with the duties of officers of Provincial joint stock insurance companies, requiring copies of all by-laws to be delivered to the Superintendent of Insurance and requiring copies of all balance sheets or other statements purporting to show the financial condition of insurance companies to be delivered to the Superintendent concurrently with their issue to shareholders or policyholders, and making it an offence for failure to comply with these requirements.

Companies Information Act Amendment:

The Companies Information Act, 1930, c. 38, reincorporates in *The Companies Information Act* the provisions of the old Companies Act with respect to the issue of a prospectus. This Act applies to Ontario joint stock insurance companies selling their treasury stock in Ontario.

Public Commercial Vehicle Act Amendment:

The Public Commercial Vehicle Act, 1930, c. 49, amends the definition of "Public Commercial Vehicle" so that it applies to any motor vehicle hired for the transportation of goods, without any exception with regard to the transportation of goods owned exclusively by one person.

The Stratford Municipal Benefit Fund Act:

A private bill, 1930, c. 100, was passed incorporating a superannuation and benefit fund for the municipal employees of the city of Stratford.

Toronto General Insurance Company:

An Act respecting the Toronto General Insurance Company, 1930, c. 46, was passed granting wide powers to the Company to change the par value of its shares.

The Municipal Act:

Section 297 of *The Municipal Act* is amended by adding thereto a new subsection (1930, c. 44) as follows:

(1) (*a*). Where a corporation gives a premium note for insurance it shall not be deemed to be incurring a debt, the payment of which is not provided for in the estimates for the current year as provided by ss. 1.

Under section 297 the Council could not incur any debt not provided for in the estimates for the current year unless a by-law authorizing it had been passed with the assent of the electors. The object of the amendment is to provide that the premium note for insurance, although it is a liability extending beyond the current year, does not come within section 297.

Contributory Negligence:

The Negligence Act, 1930, c. 27, repeals *The Contributory Negligence Act*, R.S.O. 1927, c. 103, and substitutes therefor a new Act.

Section 2 of the new Act is the same as section 1 of the repealed Act except that it is provided that "action" shall include "counter-claim."

Section 3, dealing with "extent of liability," is new and covers the same subject-matter as section 2 of the repealed Act in a more simplified and comprehensive form.

Section 4 is also now and deals with the question of contribution as between plaintiff and defendant, but in a more simplified manner.

Section 5 is almost identical to section 3 of the repealed Act except that further provision is made for cases where there are several defendants contributing toward the payment of damages.

Section 6 is a new section providing for the Court to add such parties to the action as may be deemed just.

Section 7 is a new section providing for the jury to determine degrees of negligence of parties.

Section 8 is also new, leaving the question of costs in the discretion of the Court, with full power to direct what proportion, if any, the plaintiff shall bear.

Life Insurance:

No laws relating to life insurance only were passed, other than minor amendments to *The Crown Administration of Estates Act, 1930*, c. 28.

APPENDIX IV

CERTAIN MEMORANDA, RULINGS, ETC., ISSUED BY THE SUPERINTENDENT OF INSURANCE

C. L. No. 20, 1930. MEMORANDUM

To—All Licensed Insurers carrying on in Ontario the business of automobile insurance.

From—The Superintendent of Insurance.

RE AUTOMOBILE EXPERIENCE DATA, 1931 ET SEQ.

Section 69*a* of The Insurance Act, enacted at the recent session of the Legislature (1930 chap. 41, sec. 2), came into force April 3rd, 1930, and reads as follows:—

> "69*a*—(1) Every licensed insurer which carries on in Ontario the business of automobile insurance shall prepare and file when required with the Superintendent, or with such statistical agency as he may designate, a record of its automobile insurance premiums, and of its loss and expense costs in Ontario, in such form and manner, and according to such system of classification, as he may approve.
>
> (2) The Superintendent may require any agency so designated to compile the data so filed in such form as he may approve; and the expense of making such compilation shall be apportioned among the insurers whose data is compiled by such agency by the Superintendent who shall certify in writing the amount due from each insurer and the same shall be payable by the insurer to such agency forthwith.
>
> (3) The provisions of subsections 2, 3 and 5 of section 69 shall apply *mutatis mutandis* to the provisions of this section. 1930, c. 41, s. 2.

It will be observed that the form and manner and the system of classification according to which the experience data is to be prepared and filed requires to be approved by the Superintendent of Insurance.

It is proposed to make this provision of the statute effective in respect of business written on and after January 1st, 1931. In order that the approved plan may be in the hands of insurers not later than October 1st next, the preliminary work involved should be commenced at the earliest possible date.

You are hereby invited to be represented at a hearing to be held at the Parliament Buildings, Toronto, at 10.00 a.m. on Tuesday, June 17th, 1930, for consideration of any and all proposals which licensed insurers may desire to present in relation to the above-quoted statutory provision.

If your company is a member of the Canadian Automobile Underwriters Association, you may be represented at the hearing by a committee or official of the Association. Companies who are not members of the said Association should be represented by a person clothed with authority to accept service on a committee (if appointed) to deal with the technical question involved.

Kindly acknowledge receipt of this communication.

Toronto, Ont.,
May 20th, 1930.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

C. L. No. 23, 1930.

MEMORANDUM

To—All licensed insurers carrying on in Ontario automobile insurance.

From—The Superintendent of Insurance.

RE AUTOMOBILE EXPERIENCE DATA AND HEARING, JUNE 17TH, 1930

You are hereby advised that at a hearing held at the Parliament Buildings, Toronto, on June 17th, 1930, at which you were invited to be represented by Circular letter No. 20, dated May 20th, 1930, the following companies were unanimously agreed upon to constitute a committee to consider and recommend to the Department the form and manner and the system of classification according to which the automobile loss cost experience data in Ontario is to be prepared and filed by all companies after January 1st, 1931, pursuant to section 69*a* of The Insurance Act:—

Bureau Companies	*Non-Bureau Companies*
Travellers Insurance Co.	American Automobile Ins. Co.
Northern Assurance Co.	Pilot Auto & Accident Ins. Co.
North British and Mercantile Ins. Co.	Canadian Indemnity Ins. Co.
Globe Indemnity Co. of Canada.	Trans-Canada Insurance Co.
General Accident Assurance Co. of Canada.	General Exchange Ins. Corp'n.
Sun Insurance Office.	Provincial Insurance Co.
Western Assurance Co.	Lumbermen's Mutual Ins. Co.

The hearing was attended by the counsel and secretary of the Canadian Automobile Underwriters' Association, who were authorized to represent the Association at the hearing, by the representatives of upwards of forty companies, more than half of which were companies not members of the Canadian Automobile Underwriters' Association, and by Mr. Harwood E. Ryan, consulting actuary of New York, and officers of the Ontario Department.

An organization meeting of the Committee was held immediately after the hearing, when I was asked to act as chairman of the Committee and Mr. John Edwards, of this Department, was named to act as secretary. The actuary of the Canadian Automobile Underwriters Association was invited to sit as an *ex-officio* member of the Committee. A working plan was drawn up looking to a completion of the Committee's report not later than September 1st, and the final approval by the Department not later than October 1st next.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

June 24th, 1930.

C. L. No. 25, 1930.

MEMORANDUM

To—All insurance companies transacting automobile insurance in Ontario, *not* members of the Canadian Automobile Underwriters' Association.

From—The Superintendent of Insurance

RE 1930 LOSS COST EXPERIENCE

In furtherance of the Order of the Hon. Mr. Justice Frank E. Hodgins, dated December 30th, 1929, and my circular letter No. 6, 1930, dated February 4th, 1930, in reference to the preparation of automobile loss cost experience data in Ontario for 1930, will you please:

1. On or before the 15th day of August, 1930, file with this Department:

(*a*) Your completed cards representing such loss cost experience covering the transactions of your company for the first six months of 1930. By "transactions" is meant writings, cancellations, losses and salvage which are reportable under the plan.

(*b*) A statement showing the total amount of premiums on writing cards and return premiums on cancellation cards, as well as the total amount of losses and salvage covered by the six months transactions, on the blank form attached hereto marked "1". The totals on the report blank must agree and balance with the company's books.

(*c*) A statement showing the outstanding losses at June 30th, in accordance with the blank form attached hereto marked "2".

2. Commencing with the transaction of the month of July, 1930, comply with the following instructions:

(*a*) Cards completed in strict accordance with the automobile statistical plan 1929 of the Canadian Automobile Underwriters' Association, copies of which may be obtained on application to the Department, shall be sent to the Ontario Department of Insurance monthly.

(*b*) Each monthly shipment shall include the transactions of one calendar month only.

(*c*) cards covering a calendar month shall be submitted within thirty days after the close of the month.

(*d*) The total amount of premiums on writing cards and return premiums on cancellation cards as well as the total amount of losses and salvage covered by the monthly shipment, shall be furnished the Department at the same time the cards are sent in on the blank form attached hereto marked "1". These report blanks shall be filed with the Department at the same time the cards are forwarded. The totals on the report blanks must agree and balance with the company's books.

The authority to require the information hereby requested to be prepared and filed is contained in section 69*a* of The Insurance Act.

Please acknowledge receipt of this memorandum and advise that you have made the necessary arrangements to comply therewith.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

Toronto, July 8th, 1930.

P.S.—A code number has been assigned to your company (see Form No. 1 and enclosed sample punch card). If your company has already punched a large number of cards for 1930 employing a different code number, please forward a sample card showing the code number you have used and a new number will be assigned, to make unnecessary repunching the cards. In any event the use of the new code number to record transactions on and after July 1st, 1930, is obligatory.—R.L.F.

C. L. No. 30, 1930.

MEMORANDUM

To—All insurers licensed to transact automobile insurance in Ontario *not* members of the Canadian Automobile Underwriters' Association.

From—The Superintendent of Insurance.

RE 1931 STATISTICAL PLAN

A meeting of the statistical committee, the proceedings of which have been reported to you in C.L. No. 23, dated June 24th, 1930, held another meeting on Thursday, July 24th, at which all members of the committee were present, when very substantial progress was made in the formulation of the 1931 statistical plan. Certain matters were reserved for further consideration by a sub-committee, viz.: the method of filing experience, the classification of vehicles other than private passenger vehicles, and the matter of coding and form of punch card. The sub-committee appointed was as follows:—

J. Wilson (Western) and T. F. Tarbell (Travelers), representing Bureau companies;

H. J. MacDonald (American Automobile) and A. G. Bohne (General Exchange Insurance Corporation), representing non-Bureau companies.

The sub-committee held a meeting immediately following the full committee meeting and is understood to have a unanimous report to present to the next meeting of the full committee, which is anticipated to be called about September 15th next.

The question of the statistical agency which should be designated by the Superintendent ot Insurance to compile the experience data was fully discussed before the committee. It was pointed out that the Canadian Automobile Underwriters' Association, which has the personnel, mechanical equipment and office organization necessary to function efficiently as a statistical agency, was in a better position to handle this work than any other organization in Canada. It was further pointed out that if one statistical agency could be designated for all companies the pro rated cost of compilation would be appreciably less than if two statistical agencies were appointed, not to mention the possible conflicts in the interpretation of the plan, and other difficulties which might arise out of dual compilation.

The seven non-bureau companies, members of the committee, all of which were represented at the meeting, upon being assured that the statistical data required to be filed with the designated statistical agency would not show the agency from which the business originated, or any other information which could give a competitive advantage to another company, and having upon the additional assurance that the Ontario Department of Insurance proposed to exercise a careful supervision over such agency (which in itself would guarantee that the data would not be used improperly), unanimously requested me to designate the Canadian Automobile Underwriters' Association under the new plan as the statistical agency for all companies transacting automobile insurance in Ontario, whether members of the Canadian Automobile Underwriters' Association or not.

This memorandum is for the purpose of advising you that this question was discussed in the manner described and that the representatives of the non-bureau companies have made this request to me. If any objection to adopting this request occurs to you will you please discuss the matter with one of the company members of the committee, and subsequently, if you desire, communicate with me. Unless I hear from you before the date of the official promulgation of the plan (on or about October 1st) I will assume that you concur in the attitude of the other non-bureau companies and wish me to nominate the Canadian Automobile Underwriters' Association as statistical agency for all companies.

Toronto Ont.,
July 31st, 1930.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

C. L. No. 34, 1930.

MEMORANDUM

To—All insurers licensed to transact automobile insurance in Ontario.

From—Superintendent of Insurance.

RE AUTOMOBILE LOSS COST EXPERIENCE DATA

This circular letter is in furtherance of Department Circular Letter (C. L. No. 20, 1930) dated May 20th, 1930, and Department Circular Letter (C. L. No. 23, 1930) dated June 24th, 1930, to which your attention is directed. Insurers not members of the Canadian Automobile Underwriters' Association should also refer to Department Circular Letters (C. L. No. 25, 1930, and C. L. No. 30, 1930) dated July 8th and July 31st, 1930, respectively.

The statistical committee, composed of the representatives of seven "Bureau" and seven "non-Bureau" companies therein referred to, held three meetings and unanimously agreed at the final meeting on October 10th, 1930, to recommend to the Superintendent of Insurance as follows:—

1. That the Superintendent of Insurance be recommended to approve the new Statistical Plan, forms of card, instructions, etc., prepared by the committee for the compilation of automobile loss cost experience data for Ontario, for transactions on and after January 1st, 1931.

2. The Canadian Automobile Underwriters' Association be designated by the Superintendent of Insurance as the statistical agency for the compilation of the data of all companies, effective with the compilation of data for the transactions of 1930.

I have agreed in the recommendation of the committee. The Canadian Automobile Underwriters' Association has been invited to accept the designation of statistical agency and has undertaken to act.

Copies of the new 1931 Statistical Plan will be available at cost in the near future at the office of the Association, 330 Bay Street, Toronto. A requisition blank for copies of the plan is attached.

The writing and loss cards applicable to the plan will be obtainable from the International Business Machines Company, Limited, 300 Campbell Avenue, Toronto, or Endicott, N.Y.; also from Remington Typewriters, Limited, 68 King Street West, Toronto.

The plan contemplates that the Superintendent of Insurance may grant to insurers applying therefor the privilege of filing their experience half-yearly on standard master cards or special reports. Applications for this privilege, made after copies of the plan have been distributed, should be submitted to the Superintendent of Insurance through the designated Statistical Agency.

With reference to data for 1930, insurers, members of the Canadian Automobile Underwriters' Association, will file their experience with the Association as required by the Statistical Plan presently in force; insurers, not members of the Canadian Automobile Underwriters' Association, are referred to Department Circular Letter (C. L. No. 25, 1930), dated July 8th, 1930, and hereby advised that all data heretofore filed with the Department pursuant to the said circular letter will be transferred forthwith to the designated Statistical Agency for compilation and that all data required to be sent to the Ontario Department monthly commencing with the transactions of the month of July, 1930, but not yet so sent, should be furnished direct to the designated Statistical Agency.

Please acknowledge receipt of this communication.

Toronto, Ontario,
October 29th 1930.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

To—All insurers licensed to transact automobile insurance in Ontario.

From—The Superintendent of Insurance.

RE AUTOMOBILE LOSS COST EXPERIENCE DATA, ONTARIO

Section 69 (*a*) of "The Insurance Act" (Ontario), R.S.O., 1927, Chap. 222, reads as follows:—

> 69*a*.—(1) Every licensed insurer which carries on in Ontario the business of automobile insurance shall prepare and file when required with the Superintendent, or with such statistical agency as he may designate, a record of its automobile insurance premiums, and of its loss and expense costs in Ontario, in such form and manner, and according to such system of classification as he may approve.
>
> (2) The Superintendent may require any agency so designated to compile the data so filed in such form as he may approve; and the expense of making such compilation shall be apportioned among the insurers whose data is compiled by such agency by the Superintendent who shall certify in writing the amount due from each insurer, and the same shall be payable by the insurer to such agency forthwith.
>
> (3) The provisions of subsections 2, 3 and 5 of section 69 shall apply *mutatis mutandis* to the provisions of this section.

You are hereby advised that, pursuant to the above-quoted section 69 (*a*), I have approved a plan for the preparation and compilation of loss cost records known as the "1931 Automobile Statistical Plan," a copy of which is appended to and forms part of this memorandum, which is hereby approved for use by all insurers carrying on the business of automobile insurance in Ontario in respect of all transactions on and after January 1st, 1931.

The statistical plan so approved was unanimously recommended by a Special Committee appointed by me in June, 1930, consisting of the representatives of seven companies, members of the Canadian Automobile Underwriters' Association and and seven companies not members of the Canadian Automobile Underwriters' Association, which, after several meetings, submitted its unanimous report on December 3rd, 1930.

Upon the unanimous recommendation of the said committee, I have invited the Canadian Automobile Underwriters' Association to accept the designation of statistical agency and the designation so offered has been accepted. All insurers, whether members of the Canadian Automobile Underwriters' Association or not, will accordingly file their data with the Canadian Automobile Underwriters' Association, hereafter and throughout the plan referred to as the "statistical agency," for compilation.

All inquiries and correspondence with respect to matters arising out of the operation of the statistical plan should be directed to or through the statistical agency.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

December 4th, 1930.

C. L. No. 28, 1930.

MEMORANDUM

To—The Secretary or Manager: All Ontario Mutual Fire Insurance Companies carrying on business on the Premium Note Plan.

From—The Superintendent of Insurance.

The current depression in the agricultural industry is creating important problems for mutual companies insuring agricultural property. The year 1929 was the most disastrous in the history of mutual insurance in Ontario. Reports reaching the Department indicate that there has been no substantial improvement in the loss experience during the first six months of 1930.

Mutual insurance is insurance at cost. It is not, and cannot be, insurance below cost. The majority of the mutual companies are to-day attempting to furnish insurance below cost. This trend cannot continue indefinitely without bringing disaster to those companies without large surpluses or materially drawing on the reserves built up in past years in the case of those companies which have large surpluses. It is important that every company should take cognizance of the existing situation.

Cash Payment Rates

Cash payment rates should reflect the current cost of insurance. If a company finds that its current revenue, as represented by cash payments, is less than its current expenses, as represented by losses and expenses, it should increase its cash payment rates. There is no reason to believe that the cost of insurance will decrease in the near future. It is bad policy to postpone an increase in rates in expectation of an improved experience when there is no ground for hoping that the experience will improve. I strongly recommend that every company which finds itself "going behind" as a result of its 1929 and 1930 operations, should immediately increase its rates.

Assessments

The business of insurance depends for its prosperity upon public confidence. No company, the cash assets of which (which includes money in banks, mortgages, securities, etc.) are less than its liabilities (including unpaid losses, borrowed money, reserves for unearned premiums etc.), is deserving of public confidence unless the situation has developed too quickly for the Board to act. There are upwards of a dozen companies in the province, the liabilities of which exceed the assets (both as above defined). Unless there is reasonable ground for the belief that current revenue during the balance of 1930 will correct this situation (as may be the case in a few of the companies), every such company should immediately make an assessment upon the residue of its premium notes sufficient to improve its cash position and deserve public confidence.

Over-Insurance

An increasing number of losses are being reported to the Department—"cause unknown." This confirms a feeling expressed by many mutual insurance men, that the crying evil of the mutual insurance business to-day is over-insurance—over-valuation. Now is the time for every company to review its risks and to reduce the amount of insurance carried on each risk to a point where a total loss will cost the member real money. When times are bad there is a very real inducement to collect cash money through an insurance policy if there is an insurance company to pay. I strongly recommend that you initiate immediately a general inspection of all your risks to eliminate this so-called "moral hazard." A reasonable policy limit for a given property in 1925 is almost sure to be an excessive policy limit for the same property in 1930.

This communication is being forwarded to you at the unanimous suggestion of the executive committee of the Mutual Fire Underwriters' Association of Ontario, which met in my office last week, primarily to consider the difficulties in which two of our old companies find themselves, and secondarily to discuss the general situation among the companies throughout the province. While a spirit of optimism as to the ultimate future of the business prevailed at the meeting, it was the concensus of opinion that all the companies should be advised to face their difficulties before they become acute, to take preventive steps now rather than remedial steps later, to raise rates, make assessments and order general inspections of risks now, rather than wait for a better day round the corner.

Will you please acknowledge this communication and advise me that it has been or at the next meeting will be read in full before the Board of Directors of your company.

R. LEIGHTON FOSTER,
Superintendent of Insurance.

Toronto, Ont.,
July 26th, 1930.

APPENDIX V

FORMS OF BALANCE SHEET, ETC., PRESCRIBED PURSUANT TO SEC. 71 OF THE INSURANCE ACT

ONTARIO

Executive Council Office.

Copy of an Order-in-Council approved by The Honourable the Lieutenant-Governor, dated the 30th day of December, A.D. 1930.

Upon consideration of the report of the Superintendent of Insurance dated the 17th day of December, 1930, and upon the recommendation of the Honourable the Attorney-General, Minister in charge of the Department of Insurance, the Committee of Council prescribe, pursuant to Section 71 of The Insurance Act, R.S.O. 1927, Chapter 222, as amended by Section 4 of The Insurance Act, 1930, Chapter 41, of the Statutes of Ontario, 1930, the forms set out in Schedule "A" hereto as the forms in which all joint stock insurance companies and mutual life insurance corporations incorporated and licensed by Ontario, may publish or circulate any balance sheet or other statement purporting to show their financial condition.

Certified,
(Sgd.) C. F. BULMER,
Clerk, Executive Council.

AUDITORS' CERTIFICATE*

....

....

Note:—The certificate shall state whether or not the requirements of the auditors have been complied with. The statutory requirements are contained in sections 137 and 318a of The Companies Act, R.S.O. 1927, C. 218.

Items may be rearranged as desired, but no change in terminology nor any combination of items may be made except as noted below.

Items entered short may be extended direct into the total column.

Any items may be subdivided as desired, providing terminology used above is applied to each such divided item.

Bonds and Debentures—Where a company elects to adhere to the method of valuing its bonds and debentures at amortized book value in accordance with section 70, subsection 8 of The Insurance Act, no mention of the market value of such bonds and debentures need be made and item 4 should be amended to read "Bonds and debentures at amortized book value" and the item extended into the total column. Companies which do not elect to adhere to the method of valuing bonds and debentures at amortized book value may show bonds and debentures as indicated in item 4, or if book value exceeds market value the addition shown must be changed to a deduction and made to read "Deficiency of market value under book value." In any case where market value is in excess of book value and book value only is extended it shall be permissible to add a footnote as follows: "(Not in excess of market value)", or "(Market value, $........)".

Stocks—In all cases where market value of stocks owned is in excess of book value, item 5 may be shown as above, or, if desired, book value may be extended and a footnote added as follows: "(Not in excess of market value)" or "(market value, $.........)". Where book value is in excess of market value the item must be shown as above except that the second line shall read "less deficiency of market value under book value." Upon the approval of the Superintendent of Insurance, stocks may be extended in one item at market value.

If it is desired to include the reserve of unearned premiums at 100% item 12 must so indicate.

Where a company has no surplus but an impaired capital, item 22 should be changed to read "deficit" and the amount of the deficit deducted from item 21.

The net total of items 21 and 22 may be extended as "Surplus for protection to policyholders." Where this is done item 22 may then be deleted if desired.

The balance sheet shall not show or include any mention whatever of unadmitted assets (see Insurance Act, section 70).

Items against which no amounts are applicable may be deleted. Numbers preceding items may be deleted.

If it is desired to publish a statement of operations such statement must be in the following form:—

FORM 2

Profit and Loss Account

1.	(*a*) Net premiums written	$.........	
	(*b*) Less increase in reserve of unearned premiums	....	
2.	Net premiums earned		....
3.	Net losses and claims incurred	$.........	
4.	Net adjustment expenses	....	
5.	Commissions	....	
6.	Taxes	....	
7.	Salaries, fees, and travelling expenses	....	
8.	All other expenses	....	
9.	Total losses and expenses		....
10.	Underwriting Profit		$.........
11.	Other revenue	$.........	
12.	Other expenditure	....	
13.	Net other revenue		....
14.	Net profit for the year		....

The profit and loss account must be arranged in the order shown above. Numbers preceding items may be deleted.

Items 1 (*a*) and 1 (*b*) need not be shown unless desired.

Items 3 to 8 may be entirely excluded or may be combined as desired or any of them may be divided to give greater detail.

Items 11 and 12 may be divided as desired.

Where any combination or division is made the combined or divided items must be appropriately named to describe such items according to the terminology used above and as shown in the annual statement to the Department, Form S. 6. Amounts shown against the above items, either as combined or divided, must be identical with those reported against such items on Form S. 6.

If there has been a loss for the year items 10 and 14 should be amended accordingly.

If it is desired to publish a statement showing the change in surplus during the year such statement shall be in the following form.

FORM 3

Surplus Account

1. Balance of surplus, December 31, 19—		$.........
2. Net profit for the year		....
3. Premium received on capital stock		....
4.		....
5. Add Decrease in unadmitted assets	$.........	
6. Decrease in unsecured unlicensed reinsurance	....	
		....
7. Deduct Dividends to shareholders	$.........	
Increase in unadmitted assets	....	
Increase in unsecured unlicensed reinsurance	....	
		$.........
8. Balance of surplus, December 31, 19—		$.........

Surplus account must be arranged in the order shown. Items against which no amounts are applicable must be deleted.

If the capital of the company is impaired the word surplus should be amended to read deficit.

AUDITOR'S CERTIFICATE*

....

....

**Note:—The certificate shall state whether or not the requirements of the auditors have been complied with. The statutory requirements are contained in sections 137 and 318a of The Companies Act, R.S.O. 1927, C. 218.*

Items may be rearranged as desired, but no change in terminology nor any combination of items may be made except as noted below.

Items entered short may be extended direct into the total column.

Any items may be subdivided as desired, providing terminology used above is applied to each such divided item.

Bonds and debentures—Where a company elects to adhere to the method of valuing its bonds and debentures at amortized book value in accordance with section 70, subsection 8 of The Insurance Act, no mention of the market value of such bonds and debentures need be made and item 6 should be amended to read "Bonds and debentures at amortized book value" and the item extended into the total column. Companies which do not elect to adhere to the method of valuing bonds and debentures at amortized book value may show bonds and debentures as indicated in item 6 or if book value exceeds market value the addition shown must be changed to a deduction and made to read "deficiency of market value under book value." In any case where market value is in excess of book value and book value only is extended it shall be permissible to add a foot note as follows: "(not in excess of market value)" or "(market value, $......)."

Stocks—In all cases where market value of stocks owned is in excess of book value, item 7 may be shown as above or, if desired, book value may be extended and a footnote added as follows: "(not in excess of market value)" or "(market value, $......)." Where book value is in excess of market value the item must be shown as above except that the second line shall read "less deficiency of market value under book value." Upon the approval of the Superintendent of Insurance stocks may be extended in one item at market value.

The balance sheet shall not show or include any mention whatever of unadmitted assets.

Items against which no amounts are applicable may be deleted. Numbers preceding items may be deleted.

If policy reserves (item 15) are set up in excess of statutory requirements the words "according to" may be amended to read "not less than."

If it is desired to publish a statement showing the year's operations, such statement must be in the following form:—

FORM 2

Income and Disbursements

Income:			
1. (*a*) Premium income—First year premiums	$.........

(*f*) Annuity payments	....		
		$.........	
15. Taxes, licenses and fees		....	
16. Head office expenses		....	
17. Branch office and agency expenses		....	
18. Loss on sale of investments		....	
19. Other expenses		....	
20. Total expenditure disbursements			$.........
21. Amounts left with company to accumulate at interest, withdrawn		$.........	
22. Dividends to shareholders		....	
23. Other disbursements		....	
Total other disbursements			....
Total disbursements			$.........

The Statement of Income and Disbursements must be arranged in the order shown above.

Items 1 (*a*) and 1 (*b*) need not be shown unless desired.

Items 1 to 6 and 14 to 19 may be subdivided or combined as desired.

Where any combination or division is made the combined or divided items must be appropriately named to describe such items according to the terminology used above and as shown in the annual statement to the Department, Form S. 1.

Numbers preceding items may be deleted.

Where the above statement is, in the opinion of the Superintendent of Insurance, unsuitable to any particular insurer, the Superintendent may approve a modified form appropriate to the operations of such insurer.

APPENDIX VI

UNDERWRITERS' AGENCIES

The following insurers have been licensed to issue policies through the underwriters' agencies noted after their respective names:

NOTE

Section 119 of the Loan and Trust Corporations Act (R.S.O. 1927, Chap. 223) provides as follows:—

> 119.—(1) No corporation shall, under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled, make, print, publish, circulate, authorize, or be a party or privy to the making, printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

ONTARIO

DEPARTMENT OF INSURANCE

To The Honourable W. H. Price, K.C., M.P.P.,
Minister in Charge of the Department.

Sir,—

I have the honour to submit herewith the Thirty-third Annual Report of the Registrar of Loan Corporations for the year 1930 (business for the year ended 31st December, 1929).

The statements included in this report are arranged alphabetically according to the classes of corporations defined by the Act, namely, Loan Corporations, Loaning Land Corporations and Trust Companies. In addition there are certain statistical tables, tabulated summaries and comparative statements more fully described in the Table of Contents.

The preliminary text submitted with the abstract of this report under date of July 1st, 1930, outlining registry changes during the year and important features of 1929 business is included herewith beginning on page v.

Additional Registry Changes

Since the publication of the Abstract, I have the following registry changes to report,—

On July 21st, 1930, the Northern Trusts Company, with head office in Winnipeg, Manitoba, and incorporated by Special Act of the Dominion Parliament in June, 1923, was registered as a Trust Company in Ontario.

By Order-in-Council dated 23rd September, 1930, the Lieutenant-Governor in Council formally approved the acceptance of the Northern Trusts Company by the Supreme Court as a Trust Company for the purposes of such courts in Ontario.

By Order-in-Council dated 9th December, 1930, the Lieutenant-Governor in Council formally approved the acceptance of the Industrial Mortgage and Trust Company by the Supreme Court as a Trust Company for the purposes of such courts in Ontario.

By Order-in-Council dated 9th December, 1930, the Lieutenant-Governor in Council formally approved the Industrial Mortgage and Trust Company as a trust Company with which trustees may entrust trust funds for guaranteed investment.

All of which is respectfully submitted,

R. Leighton Foster,
Registrar of Loan Corporations.

Parliament Buildings,
December 31st, 1930.

PRELIMINARY TEXT SUBMITTING ABSTRACT REPORT, JULY, 1930

To the Honourable William H. Price, K.C., M.P.P.,
Minister in charge of the Department.

Sir:—

I have the honour to submit herewith an abstract of the Thirty-third Annual Report of the Registrar of Loan Corporations of Ontario upon the affairs of all registered loan corporations, loaning land corporations and trust companies doing business in Ontario for the year 1930 (business of 1929).

This report shows in tabulated summaries the financial condition of these corporations as taken from their annual statements filed with the department on or before the last day of February, 1930, in respect to their business for the preceding calendar year, subject in some cases to certain adjustments and corrections necessary to secure uniformity and comply with the provisions of the Act. It is to be distinctly understood, however, that subsequent to the annual inspection now proceeding the statements herein contained are subject to such further changes or modifications, as may, in the opinion of the Registrar, be necessary to show the true and correct financial condition of each corporation. The department does not assume responsibility for the correctness of the figures submitted or for the valuation of the securities which compose the assets of the corporations.

The report is arranged alphabetically according to the class of corporation defined by the Act, namely, loan corporations, including loaning land corporations and trust companies.

REGISTRY CHANGES

I have the following registry changes to report:—

By an agreement dated November 6th, 1929, the Canada Trust Company, London, Ontario, purchased the assets, liabilities, business, rights, property and goodwill, etc., of The Consolidated Trusts Corporation with head office in London, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and subsequently received the assent of the Lieutenant-Governor in Council. The transfer became effective as of the 1st day of January, 1930.

The Brockville Trusts and Savings Company, formerly the Brockville Loan and Savings Company, became registered as a trust company July 1st, 1929.

REVIEW OF 1929 BUSINESS

Last year I reported a decrease in the total assets of registered loan corporations of $7,000,000. This year I have to report a further decrease of $3,000,000 in 1929 to $224,000,000. Of this decrease slightly more than half is accounted for by the Brockville Loan and Savings Company ceasing its registry as a loan corporation on 30th June. This company was given trust company powers by special act in 1929.

Trust companies assets increased in 1929 from $167,000,000 to $181,000,000, company funds increasing $6,500,000, and guaranteed fund $7,500,000. The Brockville Trust and Savings Company, newly registered as a trust company in 1929, brought in more than a million and a half; London and Western Trusts Company assets increased approximately one million by the sale of additional capital stock.

Total assets of all loan and trust corporations, not including estates, trusts and agency funds, show a net increase of $11,000,000 during the year. Estates, trusts and agency funds of trust companies increased from $1,267,000,000 to $1,628,000,000.

Funds invested in office premises by loan corporations have increased $2,000,000, and by trust companies $1,000,000. Real estate held for sale shows another substantial reduction this year in the amount of $2,138,000, loan corporations (not including loaning land corporations) alone showing a decrease of $1,700,000.

Total mortgage investments of loan corporations shows no change in 1929; although their western mortgages increased by a million dollars, their investment in mortgages in eastern provinces decreased by a like amount. Trust company mortgage investments increased by $8,000,000, eastern provinces taking $6,000,000 and the west $2,000,000.

Collateral loans of all corporations show a decrease from $47,000,000 to $42,000,000, the decrease for loan corporations being $1,500,000, and for trust companies $3,500,000.

Although bond investments of all corporations decreased in 1928 by three million dollars to a total of $52,000,000, they show a net increase in 1929 of more than $4,000,000. Loan corporations holdings, however, decreased in both years, six million dollars in 1928 and three millions in 1929. Trust companies have shown increases in both years, 1928 showing $3,500,000 increase, and 1929 $6,500,000. The whole of the 1929 increase was in guaranteed funds of trust companies.

Stocks owned show only a slight increase in 1929, from $12,800,000 to $13,100,000, confined to trust companies' company funds.

Cash held by all corporations shows practically no change. Miscellaneous assets increased from $4,500,000 to $5,700,000.

Total deposits and debentures of loan corporations and guaranteed funds of trust companies show an increase during the year of $3,800,000 to $262,000,000. Trust company guaranteed funds increased $7,500,000, but deposits and debentures of loan corporations declined $3,700,000. Deposits of loan corporations declined nearly two million dollars while trust companies' deposits increased nearly three and a half millions.

Money borrowed from banks by trust companies increased during the year to more than three times the amount shown at the close of 1928. Such loans were on December 31st, 1928, $2,518,000, and on December 31st, 1929, $8,454,000. Loan corporations bank borrowings rose from $316,000 to $482,000.

The net worth of shareholders' capital invested in all corporations again shows an increase. Reported values, reflected in capital, reserve and undistributed surplus, totalled $125,000,000 on December 31st, 1929, as compared with $122,000,000 at the end of 1928. Loan corporations show a reduction of slightly under one million dollars, while trust companies increased nearly four millions.

Estates, trusts and agency funds under administration by trust companies continue to show a rapid increase. Only two years ago I reported an increase in 1927 of one hundred million dollars, bringing the total funds under administration to an amount in excess of one billion dollars. Last year I reported an increase of two hundred and twenty-seven million dollars, and this year I have to report an increase of three hundred and sixty millions, bringing the total funds under administration at the end of 1929 to $1,628,000,000.

NEW LEGISLATION

Amendments to the Loan and Trust Corporations Act enacted at the 1930 Session of the Legislature comprise: (1) A requirement that the number of shareholders of a corporation shall not fall below twenty-five; (2) new provisions respecting quarterly returns of trust companies making their "liquidity statements" comparable with loan corporations; (3) prohibition of corporations acting as insurance agents; and (4) amplified provisions respecting government inspection of corporations and their branch offices. The amending Act, cited as 1930, chap. 42, is reprinted on page viii of this report.

INSPECTION STAFF

On 1st June, 1930, the Lieutenant-Governor-in-Council appointed Mr. George N. Sheppard, B. Comm., as inspector in the Department of Insurance. Mr. Sheppard is a graduate of the University of Toronto, and comes well qualified to perform his new duties.

All of which is respectfully submitted.

R. LEIGHTON FOSTER,
Registrar of Loan Corporations.

Parliament Buildings,
Toronto, Ont., 1st July, 1930.

CHAPTER 42.

An Act to amend The Loan and Trust Corporations Act.

Assented to 3rd April, 1930.

HIS MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:—

Short title.

1. This Act may be cited as *The Loan and Trust Corporations Act, 1930.*

Rev. Stat. c. 223, s. 3, subs. 2, amended.

2. Subsection 2 of section 3 of *The Loan and Trust Corporations Act* is amended by adding the following clause:

Transfer of shares.

(*k*) They shall provide that no transfer of shares of the company may be made which has the effect of reducing the number of shareholders to less than twenty-five.

Rev. Stat. c. 223, s. 17, subs. 3, repealed.

3. Subsection 3 of section 17 of *The Loan and Trust Corporations Act* is repealed.

Rev. Stat. c. 223, s. 18, subs. 5, repealed.

4. Subsection 5 of section 18 of *The Loan and Trust Corporations Act* is repealed.

5. *The Loan and Trust Corporations Act* is further amended by adding thereto the following section:

Quarterly returns of deposits and securities allocated.

18*a*.—(1) Every trust company receiving deposits in the manner authorized by subsection 3 of section 18 shall make a sworn return to the Registrar, quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits, and showing all securities including loans made upon securities, and cash, including money on deposit, ear-marked and definitely set aside as provided in subsection 4 of section 18, as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return, so ear-marked and definitely set aside.

Quarterly returns of guaranteed funds and securities allocated.

(2) Every trust company receiving funds for guaranteed investment as mentioned in subsection 1 of section 16 shall make a sworn return to the Registrar quarterly on the 15th day of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such funds, and showing all securities, including loans on securities, and cash, including money on deposit, ear-marked and definitely set aside as provided in subsection 2 of section 17, as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return. so ear-marked and definitely set aside.

(3) Every trust company receiving deposits in the manner authorized by subsection 3 of section 18 shall make a sworn return to the Registrar quarterly, on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit, and the amount of debentures, bonds, stock or other securities of, or guaranteed by the Dominion of Canada, and of, or guaranteed by, any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this subsection mentioned, as the said amounts stood at the end of the last preceding month, and including in such statement all such cash and securities and loans as defined in this subsection, whether owned by the company or held by it as guaranteed investments under the provisions of subsection 2 of section 17, or subsection 4 of section 18, and stating that the same were at the date mentioned in such return on hand and available for depositors.

Quarterly returns by trust companies as to deposits and liquid securities available.

6. Subsection 2 of section 28*a* of *The Loan and Trust Corporations Act* as enacted by section 5 of chapter 54 of the 1929 Statutes, is amended by striking out the word "corporation" in the second line, and inserting in lieu thereof the words "trust company."

Rev. Stat. c. 223, s. 28*a*, subs, 2, (1929, c. 54, s. 5), amended.

7. *The Loan and Trust Corporations Act* is amended by adding thereto the following section:

Rev. Stat., c. 223, amended.

36*a*(1) No registered corporation, and no director, officer or employee thereof, either personally or on behalf of such corporation, and no other company the majority of the capital stock of which is owned or controlled by such corporation, its shareholders, directors, officers or employees, shall, either directly or indirectly, transact the business of or act as insurance agent or broker within the meaning of *The Insurance Act*, or exercise pressure upon any borrower or mortgagor to place insurance for the security of such corporation, in or through any particular agency or brokerage office; provided that nothing herein contained shall prevent such corporation from stipulating in its contract of loan that any required insurance must be effected with an approved insurer.

Prohibition against acting as insurance agent.

Rev. Stat., c. 222.

(2) Subsection 1 shall not apply to the director of a registered corporation who can satisfy the Superintendent of Insurance that the business of insurance is his major occupation.

Exception.

8. Section 148 of *The Loan and Trust Corporations Act* is repealed and the following substituted therefor:

Rev. Stat., c. 223, s. 148, repealed.

Annual inspection of registered corporations.

148.—(1) The Registrar shall visit personally or cause a duly qualified member of his staff to visit at least once annually the head office of each corporation registered under this Act, and he shall verify the statements of the condition and affairs of each corporation and make such inquiries as are necessary to ascertain its condition and ability to provide for the payment of its liabilities as and when they become due, and whether or not it has complied with all the provisions of this Act, and the Registrar shall report thereon to the Minister, as to all matters requiring his attention and decision.

Further inspection.

(2) Where the Registrar deems it necessary and expedient to make a further examination into the affairs of a corporation and so reports to the Minister, the Minister may in his discretion instruct the Registrar to visit or cause any duly qualified member of his staff to visit any branch office or offices of the corporation to inspect and examine into its affairs and to make such further inquiries as the Minister may require.

Material to be furnished on inspection.

(3) For the purpose of an examination, the corporation shall prepare and submit to the Registrar such statements with respect to its business, finances or other affairs of the corporation, in addition to the statement mentioned in this Act, as the Registrar may require, and the officers, agents and servants of the corporation shall cause their books to be open for inspection and shall otherwise facilitate such examination so far as it is in their power.

Production of books at head office or elsewhere as Registrar may direct.

(4) In order to facilitate the examination of the books and records of a corporation, the corporation may be required by the Registrar with the approval of the Minister, to produce the said books and records at the head office or chief office of the corporation in Ontario, or at such other convenient place as the Registrar may direct.

Examination under oath.

(5) The Registrar or any person authorized by the Minister may examine under oath the officers, agents or servants of the corporation for the purpose of obtaining any information which he deems necessary for the purpose of such examination.

Expense of further inspection.

(6) Where an examination is made of any branch or other office of a corporation situated outside of Ontario, under the authority of subsection 2 hereof, the corporation shall pay the account of the Department in connection with such examination upon the certificate of the Registrar approved by the Minister.

Commencement of section 7.

9. Section 7 of this Act shall come into force on the day upon which it receives the Royal Assent.

CONSTATING INSTRUMENTS

This company was incorporated under Special Act of the Dominion of Canada 62-63 Victoria (1899), c. 10, under the name of "The Canada Permanent and Western Canada Mortgage Corporation," for the purpose of acquiring the assets and business of the Canada Permanent Loan and Savings Company, the Western Canada Loan and Savings Company, the Freehold Loan and Savings Company, and The London and Ontario Investment Company, Limited, which several purchases were confirmed by Special Act of Ontario, 63 Victoria, 1900, c. 129. The name was changed to the "Canada Permanent Mortgage Corporation" by 3 Edward VII (1903), c. 94 (D), which Act also amended its lending powers. By 3-4 George V (1913), c. 86 (D) further amendments were made to the Incorporating Act.

Of the constituent companies, the Canada Permanent Loan and Savings Company was incorporated by declaration filed under the Building Societies Act (Cons. Stat. U.C., c. 53) in 1855 under the name of the Canada Permanent Building and Savings Society, which name was changed to the Canada Permanent Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 100.

The Western Canada Loan and Savings Company was also incorporated by declaration filed under the Building Societies Act in 1863, under the name of the Western Canada Permanent Building and Savings Society, and its name was changed to the Western Canada Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 79.

The Freehold Loan and Savings Company was also incorporated by declaration filed under the Building Societies Act in 1859 under the name of the Freehold Permanent Building and Savings Society; the name being changed to the Freehold Loan and Savings Company by 36 Victoria (Ontario) (1873), c. 104.

The London and Ontario Investment Company was incorporated by the Act of Ontario, 39 Victoria, 1876, c. 62.

CANADA PERMANENT MORTGAGE CORPORATION—**Continued**

In 1918 the company purchased the assets and business of The Oxford Permanent Loan and Savings Society, which purchase was ratified by Order-in-Council of Ontario dated July 31st, 1918, pursuant to The Loan and Trust Corporations Act.

In 1921, the company also purchased the assets and business of The London and Canadian Loan and Agency Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated September 23rd, 1921, pursuant to The Loan and Trust Corporations Act.

In 1926 the company purchased the assets and business of The Royal Loan and Savings Company, which purchase was ratified by Order-in-Council of Ontario dated March 4th, 1927, pursuant to The Loan and Trust Corporations Act.

In 1927 the company purchased the assets and business of The British Columbia Permanent Loan Company, Vancouver, B.C.

In 1927 the company also purchased the assets and business of The Canada Landed and National Investment Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated December 30th, 1927, pursuant to The Loan and Trust Corporations Act.

CONSTATING INSTRUMENTS

1884—Letters Patent (under the Ontario Government Joint Stock Companies' Letters Patent Act), incorporating The Central Canada Loan and Savings Company of Ontario, with a capital of $2,000,000, in 20,000 shares of $100 each, dated 7th March, 1884.

1890—Act (of the Legislature of the Province of Ontario) 53 Vic., c. 129; declares capital to be $5,000,000, in 50,000 shares of $100 each; confirms the purchase of the assets of the Peterborough Real Estate Investment Company, Limited; authorizes the issue of debenture stock; authorizes agencies in the United Kingdom; defines the limit of borrowing powers.

1893—Supplementary Letters Patent (of the Province of Ontario) dated 8th June, 1893, extending the Company's purchasing and lending powers with regard to bonds, stocks and debentures to the Province of Manitoba.

1896—Act (of the Legislature of the Province of Manitoba) 59 Vic., c. 33, authorizes Company to exercise in the Province of Manitoba, with respect to real and personal property, all the rights, powers and privileges that it possesses in Ontario.

1897—Supplementary Letters Patent (of Ontario), dated 6th May, 1897, amending the original Letters Patent by expunging therefrom powers of Company to buy and sell land.

1898—Act (of the Parliament of the Dominion of Canada) 61 Vic., c. 97.

1899—Act (of the Legislature of the Province of Manitoba) authorizing Dominion Company to exercise in Manitoba all its rights, powers and privileges; defining the powers of the Company and vesting all the assets of the old company in the new company.

1900—Act (of the Legislature of the Province of Ontario) confirming and validating the conveyance and assignment of 1st December, 1898 (see form of the conveyance and assignment in schedule to 61 Vic., c. 97), and transferring and vesting the assets of the Provincial Company in the Dominion Company.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, 9 Vict. c. 90 (Province of Canada), by declaration filed on 27th March, 1847, with the Clerk of the Peace for the Western District. The original corporate name was "The Port Sarnia Building Society." The society was reorganized as "The Lambton Permanent Building and Investment Society" under the said Act and other Acts, all of which became consolidated as chapter 53 of the Consolidated Statutes of Upper Canada, by declaration filed 19th June, 1855, with the Clerk of the Peace for the County of Lambton. This latter corporate name was changed by Order-in-Council, 4th June, 1880, to The Lambton Loan and Investment Company.

The lending and the borrowing powers are governed by the Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, Consol. Stat. U.C. chap. 53, by declaration filed with the Clerk of the Peace for the United Counties of Northumberland and Durham, 5th July, 1872. (Decl. Book, II, 127.)

The corporate name was, by Order-in-Council of Ontario, 21st June, 1876 (Ibid.), changed to the Midland Loan and Savings Company.

A by-law altering the amount of the capital stock and par value of the share was, pursuant to the Loan Corporations Act, approved by Order-in-Council of Ontario, 3rd October, 1900.

The borrowing and lending powers are governed by the Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.

CONSTATING INSTRUMENTS

Incorporated under Building Societies Act, Con. Statutes of Upper Canada, c. 53, by declaration filed in the office of the Clerk of the Peace for the County of Middlesex, 26th September, 1870. The original corporate name was The Ontario Savings and Investment Society.

By Order-in-Council of Ontario, dated 4th October, 1879, and also by Order-in-Council of Canada dated 29th October, 1879, the corporate name was changed to The Ontario Loan and Debenture Company.

The Company as now constituted was formed under the provisions of The Loan Corporations Act of Ontario by the amalgamation of The Ontario Loan and Debenture Company, with the Agricultural Savings and Loan Company by virtue of Order-in-Council, dated 10th November, 1911, and operates under The Loan and Trust Corporations Act, R.S.O. 1927, chapter 223.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company. Decl. Book II, p. 57.

Letters patent of Canada (6th April, 1883) incorporating the Company under the Canada Joint Stock Companies Act, 1877, with the corporate name of The Real Estate Loan Company of Canada, Limited.—Lib. 85, folio 282, Office of the Registrar-General of Canada. The capital authorized by this instrument was $2,000,000, being the capital of the said The Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said The Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J.S. Co's. Act, 1877), and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V, c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from $2,000,000 to $1,600,000.

1913. Act of the Dominion of Canada, 3-4 George V, c. 184, increasing capital stock to $2,000,000 in shares of $100 each par-value.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (Consol. Stat. U.C. c. 53), by declaration dated 12th March, 1870, and filed with the Clerk of the Peace for the County of Lincoln on the 21st March, 1870. The original corporate name was The Security Permanent Building and Savings Society of St. Catharines.

The corporate name was changed to The Security Loan and Savings Company, St. Catharines, in 1876 by 39 V, c. 64 (D); and also by Order-in-Council of Ontario, dated 18th August, 1876.

The Authorized Capital Stock was increased from $300,000 to $500,000 on the 29th June, 1911. This increase was approved of by Order-in-Council of Ontario, dated 12th July, 1911.

The Authorized Capital Stock was further increased from $500,000 to $1,000,000 on the 9th March, 1916. This increase was approved of by Order-in-Council of Ontario, dated 14th March, 1926.

The lending and the borrowing powers of the Company are governed by the Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.

THE HOME BUILDING AND SAVINGS ASSOCIATION—Continued

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act (R.S.O. 1887, c. 169), by declaration filed with the Clerk of the Peace for the County of Carleton, on the 24th June, 1890. (Decl. Book II, 119.) The Company, for purposes of distinction, ordinarily uses the words "of Ottawa" as part of its corporate name, but these words do not appear in the declaration of incorporation.

The lending and the borrowing powers are governed by the Loan and Trust Corporation Act, R.S.O. 1927, c. 223.

PROVIDENT INVESTMENT COMPANY—Continued

CONSTATING INSTRUMENTS

Incorporated on 3rd November, 1893, by Letters Patent of Ontario, issued under the Ontario Joint Stock Companies Act (R.S.O. 1887, c. 157).

For the lending and borrowing powers see the Letters Patent (which contain special limitations).

By Letters Patent of Ontario, dated January 9th, 1912, the Company renounced its borrowing powers and accepted those provided in the Loan Corporations Act (R.S.O. 1897, c. 205), and amending Acts.

By Order-in-Council dated 12th day of March, 1925, the capital stock of the Company was reduced $400,000.00 under By-law No. 32.

		$	406,312 75

CONSTATING INSTRUMENTS

Incorporated as "The Toronto Real Estate Investment Company" by Letters Patent of Ontario (June 15th, 1885), issued under the Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (29th December, 1887), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (25th September, 1889) were issued under the last mentioned Act, increasing the capital stock from $400,000 to $2,000,000. Further Supplementary Letters Patent of Ontario (30th March, 1891) were issued under the same Act, conferring agency powers on the Company. The corporate name was by Order-in-Council (2nd April, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, c. 150; R.S.O. 1887, c. 157; R.S.O. 1914, chap. 184; R.S.O. 1927, chap. 223.

THE BRITISH MORTGAGE AND TRUST CORPORATION OF ONTARIO—Continued

CONSTATING INSTRUMENTS

The British Mortgage Loan Company of Ontario was incorporated by Letters Patent of Ontario, dated October 5th, 1877 (Lib. 5, No. 52), issued under R.S.O. 1877, c. 150, which Act was continued by R.S.O. 1887, c. 157, and was as to Loan Corporations superseded by 60 V, c. 38 (O), now R.S.O. 1927, c. 223.

By 16 George V, c. 121, the company was given trust company powers and its name changed to the British Mortgage and Trust Corporation of Ontario.

The lending and the borrowing powers of the company are derived from its Letters Patent and the above public general statute.

THE BROCKVILLE TRUST & SAVINGS COMPANY—Continued

CONSTATING INSTRUMENTS

Incorporated by declaration filed 11th May, 1885, with the Clerk of the Peace for the United Counties of Leeds and Grenville. The declaration was made by virtue of the "Building Societies Act," R.S.O. 1877, c. 164, continued by R.S.O. 1887, c. 169, and superseded by 60 V., c. 38 (O), now R.S.O. 1897, c. 205. See R.S.O. 1927, c. 223.

The lending and borrowing powers are derived from the above public General Acts.

By a Special Act of the Legislature of Ontario, 18 Geo. V, c. 130, the Company was granted the powers of a trust company and its authorized capital stock was increased from $500,000 to $1,000,000. Its name was changed to The Brockville Trust and Savings Company.

THE CANADA PERMANENT TRUST COMPANY—Continued

CONSTATING INSTRUMENTS

The Canada Permanent Trust Company was incorporated in 1913 by a special Act of the Parliament of the Dominion of Canada, 3-4 Geo. V, c. 87.

Authorized by Order-in-Council (May 7th, 1913), to carry on business in the Province of Ontario as a Trust Company, pursuant to the provisions of The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

In 1927 the Company purchased the assets and business of the Brantford Trust Company, which purchase was ratified by Order-in-Council of Ontario, dated 31st day of August, 1927, pursuant to The Loan and Trust Corporations Act.

THE CANADA TRUST COMPANY—Continued

CONSTATING INSTRUMENTS

Incorporated on the 23rd July, 1894, by special Act of the Dominion of Canada, 57-8 Vict. (1894), chap. 115, under the name of The General Trusts Corporation of Canada.

By a subsequent special Act, 62-3 Vict. chap. 111 (D), passed on the 11th August, 1899, the corporate name was changed to The Canada Trust Company, and certain other amendments were made in the incorporating Act.

The powers of the Company are defined by sections of the incorporating Act, which powers are (section 4) to be deemed subject to the laws of the Province.

CONSTATING INSTRUMENTS

The Title and Trust Company was incorporated in 1905, by Special Act of the Parliament of Canada, 4-5 Edward VII, chap. 162 (Royal Assent, 20th July, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to $75,000 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII, chap. 118, the Company was, upon the conditions therein specified, made admissible to registry under The Loan Corporations Act, and initial registry was granted on the 30th August, 1907.

April 8th, 1914. Amendment to Charter changing name to Chartered Trust and Executor Company.

May 1st, 1929. Special Act increasing capital from $1,000,000 to $2,500,000.

CONSTATING INSTRUMENTS

The Grey and Bruce Trust and Savings Company, cited 16 Geo. V (1926), c. 123. This Act confirms the amalgamation of the Grey and Bruce Loan Company and the Owen Sound Loan and Savings Company, and constitutes the amalgamated corporation a new corporation under the name of The Grey and Bruce Trust and Savings Company, with head office in the City of Owen Sound, and empowers the new corporation to carry on the business of a trust company under The Loan and Trust Corporations Act.

The Grey and Bruce Loan Company was incorporated under the Building Societies Act, R.S.O. 1887, c. 169, as a permanent building society under the name of the Owen Sound, Grey and Bruce Loan and Savings Company, by declaration filed with the Clerk of the Peace for the County of Grey, 10th May, 1889. The corporate name was by Order-in-Council of Ontario, 15th September, 1897, changed to the Grey and Bruce Loan Company.

The Owen Sound Loan and Savings Company was incorporated under the Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Grey, on the 1st April, 1889.

CONSTATING INSTRUMENTS

Incorporated on the 17th September, 1896, by Letters Patent of Ontario, issued under the Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1887, chap. 157. See also Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.

February 18th, 1929. Order-in-Council confirming By-law No. 14 of the Corporation to increase the capital stock from $500,000 to $1,000,000.

August 21st, 1929. Order-in-Council confirming By-law No. 18 of the Corporation to increase the capital stock from $1,000,000 to $5,000,000.

On the 10th day of September, 1929, His Honour the Lieutenant-Governor approved by Order-in-Council the removal of the head office of the London and Western Trusts Company, Limited, from the City of London to the City of Toronto.

By an agreement dated the 15th day of October, 1929, the London and Western Trusts Company, Limited, of London, Ontario, purchased the assets and liabilities, business, rights, property and goodwill, etc., of the Standard Trusts Company with head office in Toronto, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and was subsequently approved by the Lieutenant-Governor in Council. The transfer became effective as of the 18th day of December, 1929. The Standard Trusts Company had, by authority of By-law No. 35, moved its head office from Winnipeg to Toronto, and was granted registry in Ontario under date of October 26th, 1929.

		$ 1,278,378 32

CONSTATING INSTRUMENTS

The Montreal Trust Company was incorporated on the 21st day of March, 1889, by special Act of the Province of Quebec, 52 Vic. c. 72 (Q.), and subsequent special amending Act, under the name of the Montreal Safe Deposit Company.

By special Acts the name was changed in 1895 to the Montreal Trust and Deposit Company (59 Vic. c. 70 (Q.)), and again in 1909 to the Montreal Trust Company (9 Edw. VII, c. 115 (Q.)).

Authorized by Order-in-Council to carry on business in the Province of Ontario as from the 11th day of March, 1909, subject to certain conditions and limitations.

Registered on the Trust Companies Register, 21st January, 1913.

The Company has a deposit with the Province of Ontario, amounting to $200,000.00.

CONSTATING INSTRUMENTS

The Prudential Trust Company, Limited, was incorporated in 1909 by a special Act of the Parliament of the Dominion of Canada, 8-9 Edward VII, chapter 124.

Authorized in 1911 by special Act of the Legislature, 1 Geo. V, chapter 139, to transact business in the Province of Ontario as specified in Section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect of all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in this Act or granted from time to time to trust companies by any Public Act or Order of the Lieutenant-Governor in Council of the said Province, and shall be subject to the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to *$50,000.00.

**Under the provisions of 1 Geo. V, c. 139, as amended by 10 Geo. V, c. 158, the deposit as security to do business in Ontario may be fixed from time to time by the Leiutenant-Governor in Council. By Order-in-Council, dated June 15th, 1920, the Company's deposit of "200,000 was exchanged for one of "50,000.00, the public liability in Ontario aeing at that time "1,123.43 on Trust Account and "26,167.14 of assets under Administration.*

CONSTATING INSTRUMENTS

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q), and by 59 Vict. (1895), chap. 67 (Q), and by 63 Vict. (1900), chap. 76 (Q), 6 Edw. VII, chap. 73.

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII, chap. 103, to transact business therein as specified in section 1 (5) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to the Ontario Trusts Companies' Act, and shall be subject to the general provisions of the said Act and of the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to $200,000.00.

CONSTATING INSTRUMENTS

The Toronto General Trusts Corporation was constituted on the 1st April, 1899, by special Act of Ontario, 62 Vict. (2), chap. 109, amalgamating into one Company under the above name: (1) The Toronto General Trusts Company, and (2) The Trusts Corporation of Ontario.

By an agreement made under the Loan Corporations Act in two indentures dated respectively 13th and 30th July, 1903, approved by Order-in-Council (Ontario), 11th September, 1903, The Toronto General Trusts Corporation acquired the assets and assumed the liabilities and duties of the Ottawa Trusts and Deposit Company. See also special Act of the Province of Quebec (2nd June, 1904), 4 Edw. VII, chap. 93.

1882. An Act to incorporate The Toronto General Trusts Company. Approval of Company by Lieutenant Governor of Ontario in Council.

1885. Letters Patent extending the powers of the Company.

1887. Letters Patent increasing the stock of the Company to one million dollars.

1889. Letters Patent empowering the directors to fix the quorum of the board by by-law.

1889. Letters Patent authorizing the Company to hold real estate and to act as a safe deposit company.

1897. Letters Patent authorizing the Company to act in the winding up of estates, partnerships, companies and corporations.

1899. An act to amalgamate The Toronto General Trusts Company and The Trusts Corporation of Ontario.

1888. Letters Patent incorporating the Trusts Corporation of Ontario.

1902. An Act to permit The Toronto General Trusts Corporation to carry on business in Manitoba, and to confirm a deed of agreement with The Winnipeg General Trusts Company.
An agreement with The Winnipeg General Trusts Company (Schedule "A").

1899. An Act to incorporate The Winnipeg General Trusts Company.

1902. Approval of corporation by Lieutenant-Governor of Manitoba in Council.

1903. An Ordinance to permit the Corporation to carry on business in the Northwest Territories.

THE TORONTO GENERAL TRUSTS CORPORATION—Continued

1903. An indenture of purchase of The Ottawa Trust and Deposit Company Limited.
A supplementary indenture.
Approval of above indentures by Lieutenant-Governor of Ontario in Council.
Certificate of Attorney-General of Ontario under Loan Corporations Act.

1904. Certificate of Corporations Registrar.

1896. Letters Patent incorporating The Ottawa Trusts and Deposit Company, Limited.
Approval of above by Lieutenant-Governor in Council.

1904. An Act to permit The Toronto General Trusts Corporation to carry on business in the Province of Quebec.

1905. License to carry on business in British Columbia.

1909. Letters Patent amending Act of 1899 with reference to dividend.

1912. Order-in-Council increasing capital from $1,000,000 to $2,000,000.

1928. Order-in-Council increasing capital from $2,000,000 to $3,000,000.

CONSTATING INSTRUMENTS

Incorporated under the Building Societies Act, 1887, c. 169, as amended by 56 V., c. 31 (O), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 V., c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company, having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

By a special Act of the Legislature of Ontario, 13-14 Geo. V, c. 107, the Company was granted the powers of a trust company and the name was changed to The Victoria Trust and Savings Company. (See also Loan and Trust Corporations Act, R.S.O. 1927, chap. 223.)

Principal	$ 39,010 00	
Interest due and unpaid	28 95	
		$ 39,038 95

CONSTATING INSTRUMENTS

Originally incorporated as a Loan Corporation by Letters Patent, 7th April, 1913, under the Loan and Trust Corporations Act, 2 George V, 1912, chap. 34, now R.S.O. 1927, chap. 223. The original corporate name was The Waterloo County Loan and Savings Company.

By a special Act of the Legislature of Ontario, 12-13 Geo. V, c. 148, the Company was granted the powers of a trust company and the name was changed to the Waterloo Trust and Savings Company.

FILED BY

Loan and Trust Corporations

JUNE 30th, 1929, TO DECEMBER 31st, 1929, INCLUSIVE

Pursuant to Sections 45 or 18 (5) of the Loan and Trust Corporations Act.

Sec. 45. Every loan company receiving deposits shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit with any chartered bank of Canada and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada less any incumbrances thereon, and the amount of bonds, debentures, and other securities of any municipal corporation in Ontario, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this section mentioned as the said amounts stood at the end of the last preceding month and stating that the same were at the date mentioned in such return on hand and available for depositors. 1921, c. 61, s. 8.

Sec. 18.—(5). Every trust company receiving deposits in the manner authorized by subsection 3 shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing all securities and cash ear-marked and definitely set aside as provided in subsection 4 and stating that the same were at the date mentioned in such return so ear-marked and definitely set aside and showing the amount of cash on hand and on deposit with any chartered bank of Canada and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada and of or guaranteed by any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario, less any incumbrances thereon, and the principal amount of any moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the Government, Government guaranteed or municipal securities, hereinbefore in this sub-section mentioned, as the said amounts stood at the end of the last preceding month and stating that the same were at the date mentioned in such return, on hand and available for depositors.

FILED BY

TRUST COMPANIES

JUNE 30th, 1929, TO DECEMBER 31st, 1929, INCLUSIVE

Pursuant to Section 17 (3) of the Loan and Trust Corporations Act.

Sec. 17.—(3). A sworn return shall be made to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing all such securities, loans upon securities and cash, if any, as the same stood at the end of the last preceding month and stating that the same have been ear-marked and definitely set aside in respect of moneys received by the company for guaranteed investment as set out in subsection 1 of section 16. 1921, c. 61, s. 3.

Total	8	1	6	1	2	1	19

New detachments were opened and members of the Force stationed at the following points:

Ridgeway
Meaford
Milton
Casselman
Cannington
Petrolia
Eganville

The establishment shows an increase of twenty-four provincial constables over the number on the strength at October 31st, 1928. This is not, however, an actual increase in the strength of the Force, but is due to the fact that a number of provincial officers engaged primarily to enforce the provisions of The Liquor Control Act, were absorbed into the regular force and given full powers of provincial constables.

TRANSFERS, Etc.

In keeping with the policy of the Department in maintaining its efficiency, a number of transfers of members of the Force have been made from one part of the Province to another. There has also been the usual number of transfers to fill vacancies caused by deaths, resignations, etc.

CONDUCT AND DISCIPLINE

The conduct and discipline of all ranks has with few exceptions been excellent, and the members of the Force have shown a commendable spirit of loyalty and efficiency.

THE HEALTH OF THE FORCE

With the exception of colds and influenza caused through exposure to the inclement weather, there has been very little sickness among the members of the Force during the past year, and with the exception of one constable killed in an automobile accident, no serious injury to anyone whilst in the execution of their duty.

DEATHS

I regret to have to record the unfortunate death of Provincial Constable Andrew B. Wood of Simcoe Detachment, Norfolk County.

On December 21st, 1928, Provincial Constable Wood, his wife, and three children were all instantly killed when struck by a train on the Michigan Central Railway at Alice Street level crossing in the Town of Waterford. Provincial Constable Wood with his wife and family was on his way from Simcoe to Galt by automobile, and the evidence was to the effect that he either did not see the approach of the train, or else owing to the icy condition of the road, could not stop the automobile in time to prevent it being struck by the train. The train struck the automobile almost broadside on, killing all five occupants instantaneously.

Provincial Constable Wood had not quite completed his first year's service, but had done splendid work during that period and showed every promise of becoming a very capable member of the Force.

I also regret to record the death of Provincial Constable Anthony Thomas which took place on September 1st, 1929, at his home, 100 Gould Street, Toronto.

GENERAL REMARKS

The total number of cases prosecuted under all Acts and Statutes during the year was 13,188, an increase of 1,883 over 1927-28.

Prosecutions under the Criminal Code and all other Statutes (exclusive of The Liquor Control Act), numbered 6,693, an increase of 1,482 over 1927-28.

Prosecutions under The Liquor Control Act numbered 6,495, an increase of 401 over 1927-28.

A classified return of all prosecutions, convictions, dismissals, etc., will be found on pages 29 to 31.

In comparing the work accomplished by the members of the Force for the year 1928-29, I find conditions very similar to those set forth in my report of 1927-28. You will note there has been an increase in the return of cases under both the Criminal Code and The Liquor Control Act, the most noticeable increase being for offences of a trivial nature under the Criminal Code and other Dominion and Provincial Statutes. The more serious crimes have maintained about the same average as for the year 1927-28. The increase in prosecutions is accounted for by the increase in strength of the Force and to the fact that members of the County Constabulary are making returns of prosecutions to this office that had never been made in previous years, and not by any increase in lawlessness throughout the Province.

In all prosecutions instituted by members of this Force, the utmost assistance has been given by county crown attorneys, and police magistrates, and I find that the general good feeling between the members of the Force and the many law officers they come in contact with, has been well maintained. The certainty of quick arrest, prompt trial, and certain punishment, is the most effective means whereby crime can be kept down to the minimum.

TOUR OF INSPECTION ENGLISH POLICE SYSTEM

On October 12th, 1928, complying with your instructions, I proceeded to England to investigate and report on the general plan of the English Police System. On arrival, I presented my credentials to General Sir William Horwood, Commissioner, Metropolitan Police, New Scotland Yard, who very graciously both by himself and through the various heads of his departments put at my disposal the whole machinery of the Metropolitan Police Department in use at New Scotland Yard. I studied thoroughly the Criminal Investigation Branch the Metropolitan Police Training School, Finger Print Branch, and also the, Motor Vehicle Branch, and obtained from each, very valuable information, which was embodied in a special report submitted to you. I also studied closely the relationship of the county police forces to the borough and city police forces, and found that county police as known in Ontario has no counterpart in England. Every man there is a fully trained, uniformed police constable on full salary, performing regular police duties. Payment for police services by fees as customary in this Province is unknown in England. I further made a study of the Borstal Training School for first offenders, the activities of the Association for the Aid of Discharged Prisoners, the proximity and relationship of the police stations in the Metropolis to the police courts, also the control and direction of motor vehicular traffic on the highway and obtained valuable data on each subject, the essence of which has been submitted in special reports to you. I returned to Toronto and resumed duty early in December.

TOURS OF INSPECTION

I have personally visited all District Headquarters and many Detachments during the year and found conditions generally satisfactory, the work of the various branches of the Department being performed in an efficient manner and a feeling of confidence between the officers in charge of the territory and the general public.

The members of the Force have efficiently dealt with all matters brought to their notice in their respective districts and it is gratifying to report that with very few exceptions the numerous problems in connection with law enforcement that confront the average member of the Force from time to time and require the most careful consideration and decision, have been dealt with in such a way as to leave very little to be desired.

In Northern Ontario where practically the whole area is policed by the members of this Force, I have found it necessary to strengthen many detachments owning to the continuous opening up of New Ontario. It is pleasing to note, however, that this part of the Province continues to be exceptionally free from crime of the more serious nature.

The work of the inspectors in charge of the various districts and their staffs, also of investigation branches, has again been most creditably carried out and will be found in greater detail in the reports submitted to my office by the officers in charge.

PATROL BY FORESTRY AIR SERVICE

The members of this Department in Northern Ontario are again indebted to the Department of Lands and Forests for the assistance rendered by the pilots of their Air Service in carrying our officers to the more inaccessible territory where there is no regular means of transportation. This assistance has proven of very great benefit and has enabled the members of the northern districts to give immediate attention to matters that without this aid, would have been delayed indefinitely.

CRIMINAL INVESTIGATION BRANCH

The inspectors of the Criminal Investigation Branch have investigated and reported on a number of very serious occurrences including the most important crimes such as murder, manslaughter, bank robberies, arson, burglaries, and cattle poisoning, etc. The majority of these investigations were made at the request of the Crown Attorneys of the counties concerned and, with few exceptions, have been successfully cleared up.

During the racing season, officers from this Branch were present at all the tracks in the Province during the time racing was being carried on, and were responsible for the prosecution of a number of "bookmakers" and other undesirable race track frequenters.

All carnivals, circuses, etc., were kept under observation during their stay in the Province, and a number of objectionable features eliminated, gambling outfits seized, and the operators prosecuted and convicted.

A number of prisoners wanted for various crimes in this Province were brought back from points in the United States by inspectors of the Criminal Investigation Branch under warrants of extradition.

The campaign instituted by the law officials of your Department to rid the Province of questionable high-pressure salesman and stock brokerage firms has been continued with signal success.

COUNTY CONSTABULARIES

An Act was passed at the last Session of the Legislature amending The Constables Act, the purpose being to establish closer relations and co-operation between the Provincial Police Force and the County Constabularies. By Subsection 3 of Section 8 of The Constables Act, the Lieutenant-Governor in Council may now appoint a person to perform the duties of a high constable in any county in which there is no high constable in office at the date of the commencement of the Act and in any county a vacancy occurs in the office after the said Act came into effect.

Under Subsection 4 of Section 8, any such officer appointed shall be paid by the Province.

Upon your recommendation provincial constables selected and recommended to you by me, were vested with the powers of high constables and to perform the duties of such office in the following counties:

Dufferin
Halton
Glengarry
Prince Edward
Prescott and Russell
Welland
Norfolk
Peel
Victoria
Grey
Peterboro
Lambton
Simcoe
Grenville
Dundas
Frontenac
Lennox and Addington
Elgin
Renfrew
Haldimand
Stormont
Northumberland and Durham
Brant
Oxford
Waterloo

By an Order-in-Council, dated the 20th day of June, 1929, pursuant to Section 30 of The Constables Act, certain Regulations were passed whereby every high constable and officer appointed to perform the duties of a high, constable shall keep suitable records; make such returns of all matters dealt with; returns of all fees collected and earned by themselves or by county constables to this headquarters; and designating what reports county constables shall make to their high constables.

Under such Regulations, every county in which there is a high constable or officer appointed to perform the duties of a high constable shall provide suitable office accommodation which the public may attend, also suitable equipment and furnishings, the location and suitability to be approved by myself.

All the district inspectors having jurisdiction over the counties which came under this Act were called to my Headquarters for a conference during the early part of July. At the same time those provincial constables who had been recommended for appointment as acting high constables were called in for instructions, and the whole subject of their duties was discussed by myself and the district inspectors concerned, and the prospective high constables were given particular instructions regarding the importance of the work to be carried out by them. During the summer, I visited every Crown Attorney and other county officials in every county in the Province and discussed thoroughly the subject of closer co-operation regarding law enforcement matters.

Since the said Act and the Regulations came into force, Staff Inspectors attached to this Headquarters have been continuously visiting the various counties advising the high constables and discussing with the county officials ways and means for closer co-operation, explaining the Amendments and Regulations, instructing in the method of making out and returning forms and reports required at this Headquarters.

The duties of high constables in twenty-six counties of the Province are now carried out by members of this Force and it is expected that at least eight other counties will be under the same jurisdiction early in the new year.

All members of this Force now filling the office of high constable are endeavouring to organize their county forces with assistance from a Staff Inspector from this Headquarters. In all of the counties now under our jurisdiction, offices have been opened and files have been opened at this Headquarters for each country, monthly returns, general correspondence, returns of fees and costs, and immediate return of prosecution. These are all filed by the same system as is now in force at this headquarters.

From my own observations and from the reports received, I am convinced that the conditions brought about by this amendment to The Constables Act will eventually be of inestimable benefit to the Province. There has already been a number of instances in which the immediate co-operation of the county forces with this Force has proven the benefits to be derived when police forces are working in harmony and co-operation.

TRAINING SCHOOL

A training school for the members of the Force was established at this Headquarters in January, 1929. The school is founded and run upon similar lines to the training school of the Metropolitan Police, London, England, and is for the purpose of training recruits so that they will not be sent out to perform the duties of a police constable before they understand the elementary part of their duties. It is also used as a means of imparting additional instructions to those members of the Force already serving in the various districts and who now receive periodic courses of instruction when they can be best spared from their duties.

The classes held were under my immediate personal supervision with a Staff Inspector in charge. The term of instruction for recruits was six weeks and for constables who had already had some experience, three to four weeks. Lectures were given covering general duties of a constable; law enforcement in general; Criminal Code and other penal statutes; provincial statutes, including the Liquor Control Act, Highway Traffic Act, Children's Protection Act, Game and Fisheries Act, etc., etc.; court procedure and giving evidence; police regulations and reports; office routine; financial matters relating to the Force; special instructions were given and the members of the class warned regarding the use of revolvers in the execution of their duty. Special instructions were given in finger print procedure and the method of preserving and packing articles that might contain valuable information in that regard. All classes received instructions in first aid and all passed the examination.

At the conclusion of each class, final examinations were held and all members were required to pass a given standard before returning to their detachments, or in the case of recruits, before being posted to a detachment. In addition, all applicants are required to pass an educational examination previous to being allowed to attend the Ontario Provincial Police Training School and, if successful, are accepted for appointment.

The school was closed during the early part of the summer and will re-open again early in November.

FOREST FIRES ACT

Owing to the exceedingly dry summer and fall of the past year, forest fires were much more numerous than usual, and special instructions were issued to all members of the Force to assist in every way possible, the work of extinguishing any fire that took place, also to investigate thoroughly the cause of any fire which might be of a suspicious origin and take whatever action the result of their enquiry might warrant. They were also instructed to get in touch with the forestry fire rangers and to keep them informed of any serious fire threatening either life or property.

That the efforts of the members of the Department in this respect were of benefit and appreciated is evidenced by the number of letters commending their work, on file at my office.

I quote herewith, an extract from one, which is self-explanatory:

> "If you are responsible for Mr. Carey, Provincial Constable, coming to Northbrook at a time like this when property and lives are in danger, I wish to, on behalf of the people of this vicinity, including myself and family, thank you for your sensible consideration of the people around here at a time when fires were threatening everything and everyone within miles around.
>
> "We, as you perhaps know, are not in the part of the country protected by the Forestry Department, therefore, we could get no help from that source, and those who were trying to do something to protect us were unorganized and running from place to place at every alarm. Mr. Carey, however, immediately took hold and placed gangs with a leader in each gang at different points as they were needed and when an alarm was raised he investigated before transferring a big gang, perhaps to somewhere they were not needed, thus he saved a lot of needless rushing around, and kept everyone where he could do the most good.
>
> "I might say that in the sky last night, seven large fires could be plainly seen each within a few miles or yards of Northbrook and completely surrounding us.
>
> "Yesterday our school house and some farm buildings were swept away and miles of fences, acres of pasture and thousands of acres of splendid young trees were burned and we are a long way from being out of danger yet.
>
> "The people here appreciate the work of Mr. Carey and have asked me to say so for them.
>
> "Very truly yours."

GAME AND FISHERIES ACT

Twenty-seven prosecutions were instituted for offences against the various sections of this Act, and twenty-six convictions obtained. Assistance has also been given the Game Wardens, and complaints investigated whenever requested by the officials appointed to enforce this Act.

GAMBLING, HANDBOOKS AND GAMES OF CHANCE

One hundred and fifty-six prosecutions were instituted under this head, and one hundred and fifty-three convictions obtained.

A number of gaming devices of various descriptions were seized (some of a very elaborate pattern) and confiscated by the courts.

HIGHWAY TRAFFIC ACT

One thousand five hundred and eight prosecutions were entered and one thousand four hundred and eight convictions obtained against persons who violated the various provisions of this Act.

This is a considerable increase over the number last year, and although the work of enforcing the provisions of this Act does not come specifically under this Department, the members are instructed to pay every attention to violations coming to their notice. Reports from Northern Ontario where this Force is responsible for the enforcement of the Act, are to the effect that motor vehicular traffic increased practically 100 per cent. during the summer.

The Ferguson Highway has become extremely popular with the tourists, with the result that there was a constant flow of traffic over it from the time the season opened until late in the fall.

The motorcycle patrol reported very few accidents or misconduct on the part of drivers. The tourists are assisted by the members of the Patrol in every way possible and in many cases where automobiles had broken down, temporary repairs were made by the members of the patrol on the spot. In other cases arrangements were made by them for repair service to be sent to those requiring them.

Our detachments in Northern Ontario are instructed to give every attention to the supplying of tourists with all available information on any subject required.

CUSTOMS AND EXCISE ACT

The number of prosecutions for offences under this Act is about the same as last year, there being ninety-six this year as against ninety-seven in 1928.

INSANE PERSONS

Seventy-three unfortunate individuals who had become mentally unbalanced were brought before the magistrates and after due examination by competent medical authorities, forty-eight were pronounced insane and committed to mental hospitals, and nine discharged to the care of friends.

This is one of the most distressful duties our men are called upon to perform, especially difficult in the sparsely settled district of Northern Ontario, where many of the cases occur. Great care and consideration must be given these unfortunates until such time as they can be admitted to one of the mental institutions.

OFFENSIVE WEAPONS

Seventy-nine prosecutions were instituted under this heading and seventy-two convictions obtained, the majority being against aliens for having fire-arms in their possession.

In all cases where the magistrate ordered the confiscation of the weapon, the article in question was forwarded to my office.

Amongst those received have been a number of shotguns, rifles, revolvers, knives, razors, etc.

MURDERS

THOMAS CONSTABLE, INSPECTOR, O.T.A. COCHRANE,

Thomas Constable, Inspector, O.T.A., Cochrane, was shot and killed when about to enter his home at 11.30 p.m., October 15th, 1926. Every effort was made by the officers of the Department to locate and apprehend those responsible for the crime, but without immediate success. The enquiry, however, was never abandoned, and after two years of continuous investigation and following up every possible clue, the efforts of the members of the Force were brought to a successful conclusion by the arrest of John Ivanchuck on November 16th, 1928.

Although two years had elapsed from the time of the murder to the time of the arrest, the officers in charge of the case were successful in obtaining evidence of sufficient strength to warrant the jury in convicting Ivanchuck of the crime. His trial took place on April 11th at Cochrane. He was found "Guilty" of murder and sentenced to be hanged on June 21st. His case was appealed to the Division Court and his appeal was rejected. Further efforts were made on his behalf and a reprieve was granted from June 21st to July 19th to enable the matter to be taken up with the Department of Justice at Ottawa. The Executive Council, however, refused to interfere with the sentence and the death penalty was carried out at Haileybury on July 19th, 1929, thus bringing to a satisfactory conclusion the determined efforts of the members of the Force to bring to justice the murderer of a very capable officer who met his death simply because he had been energetic in carrying out his duties as he saw them.

Julius Neimi, South Porcupine

Julius Neimi, South Porcupine, was killed in a brawl by being stabbed in the left temple with a knife on November 11th, 1928. Pertti Rentakonno, South Porcupine, was arrested and charged with the murder. At the trial in Cochrane, the jury returned a verdict of "Not Guilty," which verdict was not accepted by the Honourable Justice Wright who announced that the case would be traversed to the next Assizes, and dismissed the jury.

Thomas E. Hart, Mountain

Thomas E. Hart, Mountain, was shot and killed on October 31st, 1928, by Christopher Moore of Mountain Station, as a result of a Hallowe'en disturbance. Moore was arrested, charged with murder, and committed for trial. At the trial, the jury returned a verdict of manslaughter, and Moore was sentenced to fifteen months imprisonment.

Kenneth Havelock Twells and Colin Malcolm Twells, Consecon

Kenneth Havelock Twells and Colin Malcolm Twells, Consecon, Prince Edward County, were shot and killed by their father, Charles Henry Twells on January 4th, 1929. Arthur Corfield, brother-in-law, was also shot and seriously injured at the same time. Twells was arrested, charged with murder, and committed for trial. At the trial the jury returned a verdict that Twells was insane at the time of the murder and he was ordered to be committed to the asylum for the criminally insane.

Mrs. James Stewart, Grassie Station

Mrs. James Stewart, Grassie Station, was killed on February 9th, 1929, by being struck on the head with an axe at her home whilst her husband and daughter were absent in St. Catharines. Arthur Grimes, hired man, was arrested, charged with murder, and committed for trial. At the trial on October 11th, the jury were unable to agree, and the case was traversed to the Spring Assizes.

John Blisnuik, Prison Farm, Fort William

John Blisnuik, Prison Farm, Fort William, was murdered on February 14th, by John Bihune, whilst cutting cordwood in the bush about a mile from the prison farm. Bihune was arrested, charged with the crime, and committed for trial. At the trial a verdict of "Guilty" was returned. Bihune was sentenced to be hanged, September 17th, which sentence was carried out.

ANTHONY TUCKER, TROUT CREEK

Anthony Tucker, Trout Creek, was shot and killed by his son, Anthony on March 5th, 1929. In this case, Tucker who was under the influence of liquor, was in the act of assaulting his wife, when the boy, Anthony, age thirteen, in an endeavour to protect her, picked up a rifle which was standing loaded, and fired at the father. The wound was fatal and Anthony was arrested and charged with murder. He was committed for trial on a charge of manslaughter, and at the trial, the jury returned a verdict of "Not Guilty."

JAMES McCOY, WATERFORD

James McCoy, Waterford, was killed with an axe on March 18th, by his son, Charles, at their farm in Norfolk County. Charles McCoy was arrested and charged with murder. At the trial it was proven that McCoy, Junior, had twice been an inmate of the Ontario Hospital for the Insane at Hamilton, being last released about two years ago, and since, he has been living with his father. He had been acting strangely for some days previous to the murder. At this trial he was committed by the magistrate to an insane asylum.

FEMALE INDIAN, PEN-NEE-SEE-QUA

Female Indian, Pen-nee-see-qua, found dead on trail near Kelly, Ontario, March 6th, 1929. Investigation into the death of the above-named Indian woman resulted in the arrest of J. Boucher, Indian, son-in-law of the dead woman. He was committed for trial and at the trial a verdict of manslaughter was returned, and Boucher was sentenced to life imprisonment.

EARL A. ROBERTS, U.S. IMMIGRATION BORDER PATROL, ALGONAC, MICH.

Earl A. Roberts, U.S. Immigration Border Patrol, Algonac, Mich., was shot by Vet. Brown in American waters, March 23rd, 1929, body placed in boat and unloaded at dock at Port Lambton. Was taken to hospital at St. Clair, Michigan, and died, March 24th, 1929, from effects of bullet wounds. Brown gave himself up to members of this Force and was handed over to American authorities and returned to Port Huron for trial. At his trial, Brown pleaded "Guility" to the murder of Roberts and was sentenced to life imprisonment.

UNKNOWN MAN MURDERED, RAILWAY YARD, SOUTH PARRY SOUND, APRIL 14TH, 1929

The body of an unknown man was found in a small creek adjacent to C.N.R. Railway Yards, Parry Sound. On examination it was found that the man's head had suffered terrible injuries which no doubt had caused death. A large flat stone covered with blood was found near the body, which stone no doubt had been used to inflict the injuries to the man's head. Extensive enquiries were made by the members of this Force, and also by Municipal and other Police Forces throughout the Dominion and United States. A description of the dead man circulated and broadcast, but so far the body has never been identified, neither have we been able to bring the crime home to any preson.

MRS. ROBERT McCORKLE, DRESDEN, ONT.

The dead body of the above named woman was discovered on April 28th, 1929, under the floor of her home at Dresden. Investigations proved that her death was due to wounds in her neck, inflicted, apparently, by a knife or an axe. A warrant has been issued and a reward offered for the arrest of her husband who was the last person known to have been in her company before the body was found, but so far we have been unsuccessful in locating and apprehending him.

MRS. ROSIE PASCHENUIK, SUDBURY, ONT.

Mrs. Rosie Paschenuik, Sudbury, Ontario, was shot and killed on May 26th by one, Pete Myhal. Myhal was arrested, charged with murder, and committed for trial. At his trial, he was convicted and sentenced to hang, which sentence was carried out on September 18th, 1929.

LUKE GROGAN, FIRE RANGER, NAIRN CENTRE, ONT.

On the morning of June 12th, the body of Luke Grogan, fire ranger and watchman at McFadden's Lumber Camp No. 37, was found in a small creek about 150 feet from the camp buildings, which had been burned the previous day. There were many serious wounds on the body which pointed to a brutal murder. From investigation, it was found that Grogan and one, Joseph Racine, fire ranger and watchman at Camp No. 3, had been together the day before the body was found, and that there was evidence that Racine at least, had been drinking. An enquiry was set on foot to locate Racine, and on June 22nd his body was found floating in Fox Lake, one of a number of lakes in the vicinity of the camps.

At the inquest the jury returned a verdict that Grogan had come to his death by being struck on the head by a blunt instrument, and that the evidence indicated that these blows were probably inflicted by one, Joseph Racine, who was drowned about that time in Fox Lake, and that Joseph Racine came to his death by accidental drowning.

MRS. FRANK KOBERNICK, OSHAWA, ONT.

On the afternoon of June 19th, Mrs. Frank Kobernick was drowned by falling or being pushed from a boat in Whitby Bay, Lake Ontario. After investigations into her death had been made, her companion at the time, Frank Buono was arrested and charged with her murder. Buono was committed for trial at the next sitting of the Supreme Court.

MRS. BERTHA CLARK AND MADELINE CLARK, CHRYSLER, ONT.

On July 20th, George A. Clark, a farmer, shot and killed his wife, Bertha Clark, and his seven months old baby, Madeline. He then turned the gun on himself and fired a bullet through his head with fatal results. Enquiries showed Clark had been acting strangely for the past month, but it was not suspected that he had any design on the lives of his wife and family.

EDWARD LYONS, GLENORCHY, ONT.

On June 21st, Edward Lyons, Glenorchy, was shot in the leg by one, Pete Machuk. Lyons died in the hospital at Fort Frances on July 31st. Machuk was arrested, charged with murder, and committed for trial at the next court of competent jurisdiction.

KASTIN ZARNE, ROBINSON, ONT.

On October 12th, Kastin Zarne was shot and killed by one, Lucash Reshetarski, when Zarne made an attempt to force his way into Reshetarski's house. Zarne had a revolver and went to Reshetarski's house in an attempt to force Reshetarski's wife to go away with him. After the shooting Reshetarski went to Sioux Lookout and gave himself up to the police. He was arrested and charged with murder, and committed to take his trial at the Spring Assizes.

JOSEPH LUPUSHENSKI, BEAVERBOARD, THOROLD, ONT.

On October 15th, the dead body of Joseph Lupushenski was found in a vacant lot at Beaverboard, Thorold, with a bullet hole in the left side under the arm. Investigations proved that the deceased man, with a number of other foreigners, had been engaged the previous night in a fight over a woman and five of those taking part in the fight were placed under arrest and are held on a nominal charge of vagrancy which is expected to be eventually changed to a charge of murder in respect to at least one or more of those under arrest.

VIOLA SOPHA, COBALT, ONT.

On October 25th, Viola Sopha, twenty-five years old, and Ralph Walker a bank teller of Cobalt, were found unconscious behind a pile of railway ties on the Nipissing Central Railway, half a mile south of the Town of Cobalt. Both had been shot through the head. The girl died immediately after her admission to the hospital, and Walker died about ten hours later. It is assumed that jealousy on the part of Walker was the motive for the murder of Miss Sopha, and suicide of himself. The jury returned a verdict that death in each case was due to gunshot wounds in the head, and that the shots in each case were fired from a revolver in the hands of Ralph Walker.

ROBBERY WITH VIOLENCE

CANADIAN BANK OF COMMERCE, BEAMSVILLE

At 1.30 p.m., April 16th, 1929, the Canadian Bank of Commerce, Beamsville, was held up by four masked men who were successful in robbing the bank of about $2,000 in $5 and $10 bills, afterward making their escape in an automobile that awaited them outside the bank.

Investigations into the robbery were carried out by the Criminal Investigation Branch, assisted by the officers of No. 2 District who discovered that the robbery had been engineered and carried out by a number of crooks from Niagara Falls, N.Y. Anthony Consola and Joseph Desolvio were arrested, and on their appearance before the magistrate, pleaded guilty to robbery whilst armed and were both sentenced to fifteen years in Kingston Penitentiary. It is hoped that four others who took part in the robbery will eventually be brought to Canada for trial, the four being known, and at present in custody for offences committed in the United States.

ROBBERY OF FURS TO THE VALUE OF $15,000, TORONTO

On November 20th, 1929, Leo Craig, Louis Beaver and Sam Pike, were arrested by Provincial Constables Storey and McBrien, assisted by Inspector

Jerome of the Highway Traffic Patrol, on being suspected of being guilty of the theft of valuable furs from Toronto. When the arrest was being made, a determined attempt was made by the men in question to use firearms on the officers, but at great personal risk, Storey and McBrien placed the three men under arrest and recovered an automobile with $15,000 worth of furs. The prisoners were turned over to the Toronto police and at their trial, Craig was convicted and sentenced to fourteen years, Beaver to ten years, and Pike to seven years and twenty lashes.

Hold-Up and Robbery, Havelock, C.P.R. Constable and Taxi Driver

On March 2nd, 1929, Norman Menard and Lawrence Menard, brothers, held up a C.P.R. constable and Earl Williams, a taxi driver of Havelock, forced them into an automobile, owned and driven by Williams, and then forced Williams at the point of a revolver to drive out into the country. On arrival in Brighton Township, the two victims were driven into a bush, both searched, the driver, Williams relieved of $50 and the constable of his revolver.

The assistance of the members of this Department was requested and the prisoners arrested the same day. They were convicted and sentenced to five and three years in the Kingston Penitentiary.

After conviction, the two men were identified by citizens of Montreal, as being responsible for the murder of John L. Durham, a business man of that city. They were taken to Montreal for trial, proven guilty of eleven hold-ups, and a murder in that city, and sentenced to be hanged.

Attempt to Hold-up Vicks' Transport Truck near Wallaceburg

An attempt was made on the 8th of February, 1929, to hold up one of Vick's transport trucks loaded with export liquor, near the outskirts of Wallaceburg, en route to Port Lambton from Walkerville, but the car in which the hold-up men were riding collided with the truck, and eventually wound up in the ditch. After an investigation into the circumstances, Harry Brown, Wilfred Legarrie, and Henry Neely were arrested and charged with attempt to rob. They were convicted and each sentenced to one year determinate and two years indeterminate in the Ontario Reformatory.

Hold-up of Postal Truck, Mimico

On March 2nd, 1929, a mail truck was held up near the Canadian National Railway Station at Mimico and an attempt made to steal the mail therefrom. The mail truck driven by Thomas Douglas was obstructed by a Studebaker sedan containing three men. The occupants of the mail truck were forced out of their truck and made to get into the back seat of the sedan by the hold-up men who were all armed. Some of the mail bags were then thrown into the sedan by the bandits who drove north on Church, and thence to High Park where the occupants of the mail truck were put out of the sedan and the bandits drove away. Some of the contents of the stolen mail bags were found in the stolen Packard automobile found abandoned in the north end of the city on March 3rd. The investigation was handled by the Criminal Investigation Branch in conjunction with the post office authorities and eventually the crime was traced to John Miller, Marvin Holley and George Brown, the first two being escaped prisoners from the Mimico Industrial Farm. Miller and Brown were arrested, charged with robbery, but at their trial, the jury brought in a verdict of "Not Guilty." The principal evidence for the defence in each case was an alibi. Marvin Holley, the third man wanted, was shot and killed by the police of Detroit, Michigan, when he resisted arrest in his Detroit rooming house.

ARMED ROBBERY, CANNINGTON

On October 19, 1929, Ross Anderson was caught by Provincial Constable Taylor in Johnston's General Store at Cannington, after having broken into same. Taylor attempted to escape by drawing an automatic revolver on the constable, but Constable Taylor shot quicker than Anderson and wounded Anderson in the leg with a shot from his revolver. He was captured and eventually sentenced to two years in the Ontario Reformatory.

PETE BRENNAN SHOT RESISTING ARREST

On February 16th, 1929, owing to information received that Orval Shaw and Peter Brennan, escaped prisoners from Chatham County Gaol, were living in a summer cottage at Bolsover, arrangements were made by the District Inspector and officers of No. 4 District to effect their arrest. A night drive was made from Orillia and at a point near the cottage, the automobile was left and the officers proceeded on foot. When about 200 yards from the cottage in question, two men were met on the road. It was too dark to actually recognize them, but owing to their actions it was suspected that they were the wanted men. Before they could be questioned, they both broke away, running in opposite directions. They were called upon to stop and shots fired in the air from the officers' revolvers, in an endeavour to hold them. Unfortunately one of the men, Peter Brennan, was hit by a bullet from one of the constable's revolvers and died from his wounds. Two provincial constables were placed on trial charged with shooting with intent to maim, but both were acquitted by His Honour Judge Swaze at Lindsay.

Orval Shaw was later apprehended near Alvinston, and over thirty charges of housebreaking and robbery were traced to him. All charges were heard at London, and he was sentenced to four years in Kingston on each charge, sentences to run concurrently.

ROBBERY WHILST ARMED, OWEN SOUND

About 6 p.m., May 1st, 1929, Clifford Potter, employed as a taxi driver at a livery business in Owen Sound, was approached by two coloured men, one coloured and one white woman, to drive them to Massie, near Chatsworth, Grey County. Potter complied with their request and when the car stopped at Massie, Alfred Morton, one of the coloured men, pointed to a farm house and stated he wished to go there. As soon as the driver had turned his head, Morton struck him over the head with the butt end of a revolver. They all left the car, robbed the driver of $15, carried him to an out of the way farm house where they left him bound up. They then stole the Chrysler sedan, also the chauffeur's license and badge, and drove away. Potter, after being tied up all night, was able to get out of his bonds, removed the gag, and got to a farm house where he got into communication with Provincial Constable Denton, Owen Sound. An immediate description of the four people, Alfred Morton, Edward Earls, Isobel McCartner and Elizabeth Wakeford, was broadcast throughout the Province and information was obtained to the effect that the car had entered the Province of Quebec early Thursday, May 2nd, at St. Anne de Bellevue. Immediate information was telegraphed to the Quebec Provincial authorities who were successful in placing the four persons concerned under arrest and recovering the car about 100 miles east of Montreal. At their trial, Alfred Morton, who had a very bad record, was sentenced to ten years imprisonment. Edward Earls was sentenced to two years definite and one year indefinite in the Ontario Reformatory. The two girls in connection with the case, owing to their age, were committed by the magistrate to the Industrial School for an indefinite period.

ROBBERY WHILST ARMED, PRESCOTT

At 5 a.m., April 8th, 1929, Provincial Constable McLeod of Prescott, was notified that two suspicious looking men carrying revolvers were in a barn on the outskirts of Prescott. Constable McLeod proceeded to the barn and found Dosithi Sequin and Norman Kittson asleep in the barn with a .45 calibre revolver lying between them. He immediately took possession of the revolver and then woke the two men. On waking, Sequin reached for the revolver. They were arrested and on them was found certain articles that had been stolen from the home of one, Lloyd Smith of Prescott, who had been held up by the two men in question in his house at 11.45 p.m. the previous night. Both men were identified as having long criminal records and were sentenced at their trial to five years each in the Kingston Penitentiary.

HOLD-UP WHILST ARMED ON PROVINCIAL HIGHWAY NEAR LONDON

On May 1st, 1929, whilst Dilworth McClelland, a Detroit policeman was driving his automobile containing his wife, eastward along No. 2 Highway, seven miles east of London at 4.40 a.m., his car was crowded to the ditch by an automobile containing three men. One of the men in the car held up McClelland with a revolver, but McClelland instead of complying with the request, drew a revolver from his pocket and shot and killed the bandit who was identified as Robert Schacht of Ford City, and also severely wounding Leo Desroches of Riverside, and put to rout the third bandit. McClelland was exonerated by the jury when enquiry into the case of Schacht's death was made, the verdict being that he, McClelland shot in self-defence and was justified in his action. The third man, Ralph McLachlan who got away, was eventually arrested in Detroit, charged with robbery whilst armed, also charged with participation in robberies in Cottam and Leamington in the early part of April. For his participation in the hold-up near London, he was sentenced to serve five years in Kingston Penitentiary and for his participation in the robberies at Cottam and Leamington, a further five years to run concurrent. Leo Desroches who was shot and seriously wounded by McClelland, on leaving hospital appeared before Judge MacBeth at London, pleaded guilty to robbery with violence, and was remanded for sentence until May 1st, 1930, during that time being released from custody on a bond of $8,000 supplied by his relatives.

THEFT OF POULTRY

I am pleased to report that in consequence of the determined efforts made on the part of the members of this Force in an endeavour to check the epidemic of poultry thieving that had been taking place throughout the Province, our efforts have met with very considerable success. The members of this Force alone being responsible for 144 prosecutions, resulting in 130 convictions and fourteen dismissals and withdrawals.

Of those convicted, ninety-two were sentenced to various terms of imprisonment, twenty-four fined, and fourteen given suspended sentence.

An Act dealing with the transportation of fowl which was passed at the last Session of the Legislature, which is now in force, will be of great assistance in checking up the receivers of stolen poultry. Further, the bringing under my supervision of a considerable portion of the county constabularies, will, I hope, further reduce this type of theft which has been causing such great annoyance and financial loss to the farmers of the Province.

OFFENCES AGAINST WOMEN AND GIRLS

The following table gives the prosecutions, convictions, dismissals, etc., for offences of this nature prosecuted by members of this Force during the year:

	Prosecutions	Convictions	Dismissals	Withdrawn	Awaiting disposal	1928
Abduction	10	6	1	3	....	8
Carnal knowledge and attempted	48	23	10	5	10	45
Incest	8	6	2	....	....	13
Indecent assault	76	53	16	5	2	62
Rape and attempted	22	8	1	4	9	14
Procuring	11	8	3	....	....	8
Seduction	24	17	3	4	....	24
Totals	199	121	36	21	21	174

LIQUOR CONTROL ACT

In comparing conditions under the Liquor Control Act throughout the Province during the past year with those of the year 1927-28, I find that there has been a general and continued improvement. There are still a number of hotels that give trouble by selling and permitting liquor to be sold in their bedrooms. This is one of the most difficult problems to deal with, but I am hoping that the proposed amendments to the Act will strengthen our hands in this respect. Petty bootlegging is still on the decline and the disposal of illicit alcohol has been reduced to a minimum.

The reports I have still disclose that there is a quantity of American alcohol finding its way into the Province, as the majority of the seizures made are composed of that product.

I am convinced that there is a better observance of the liquor laws now than at any time since the War, and I find from my own observation and that of my officers, that as the public become more familiar with the provisions of the Act, the more they are in favour of it.

There have been 6,495 prosecutions by the members of this Force for violations of the Liquor Control Act for the year ending the 31st October, 1929, and the following table gives the prosecutions, convictions, dismissals, etc., and fines imposed under the various headings for offences against the Act during the above period:

	Prosecutions	Convictions	Dismissals	Withdrawn	Committed	Awaiting disposal	Fines
Doctors giving Illegal Prescriptions	1	1					$100 00
Drinking in a Public place	1,303	1,177	82	44	63		18,958 00
Drunk in a Public Place	1,593	1,521	54	18	208		19,311 00
Having Without Permit	1,085	870	130	85	240		80,900 00
Having or Consuming in Hotel	10	7	3		1		510 00
Illegal Use of Permit	49	41	8		3		1,305 00
In Possession of Liquor Without Board's Seal	95	89	6		4		2,019 00
Keeping in an Illegal Place	1,070	913	110	47	175		83,062.00
Miscellaneous Offences	133	100	17	16	13		6,465 00
Permitting Drunkenness in Private Residence	154	127	20	7	18		3,055 00
Sale or Keeping for Sale	635	381	194	60	355		19,520 00
Supplying Liquor to Minors	73	54	15	4	28		956 00
Supplying Liquor After Permit Suspended	11	8	3		3		195 00
Unlawful Purchase	228	192	25	11	29		20,600 00
Infraction Liquor Control Board Regulations	55	42	8	5	2		1,120 00
Total	6,495	5,523	675	297	1,142		$258,076 00

DISPOSITION OF CASES PROSECUTED UNDER THE L.C.A.

Number of Prosecutions	6,495
Number of Convictions	5,523
Number of Dismissals	675
Number of Withdrawals	297
Number Committed	1,142

AMOUNT AND VALUE OF LIQUORS CONFISCATED

Beer	19,622 gallons.
Spirits	2,785 gallons.
Wine	790 gallons.
Approximate value	$35,000 00

There were also conficated under the Liquor Control Act, twenty-five automobiles, six motor trucks with an approximate value of $9,000.00.

Fines Imposed	$258,076 00
Confiscated Automobiles and Trucks	9,000 00
Confiscated Liquors	35,000 00
Total	$302,076 00

There have been approximately 2,150 liquor permits received at this office for cancellation, from the members of this Force and in each case where it was considered that the report of the officer justified the cancellation of the permit, the same was forwarded with a recommendation to the Chief Commissioner, Liquor Control Board that it be cancelled.

A number of recommendations for suggested amendments to the Liquor Control Act and Regulations has been submitted by the Chief Inspector in charge of the enforcement of the Liquor Control Act, and the same forwarded to the Chief Commissioner for his consideration.

DEATHS FROM VIOLENCE AND UNNATURAL CAUSES

The following number of deaths from violence and other unnatural causes was reported to and investigated by members of this Force during the year.

	1929	1928
Murder	20	14
Manslaughter	28	18
Suicide	83	58
Automobile fatalities	248	162
Drowning	191	144
Other cause, i.e., shooting, deaths from burns, exposure, etc.	188	243
Totals	758	639

In comparison with the figures for the preceding year, these figures show an increase of 119, due principally to the increase in deaths from drowning and automobile fatalities.

The investigations and assistance rendered in these cases cause an enormous amount of work by the members of the Department, all of which is very necessary so that the full facts can be laid before the Coroner or Crown Attorney.

AUTOMOBILE FATALITIES

Two hundred and forty-eight deaths attributed to the use of automobiles on the highway were reported during the year.

This is an increase of eighty-six over the year 1928. Everyone of these fatalities was thoroughly investigated and wherever necessary, prosecutions against the driver for criminal negligence or manslaughter were instituted. It is very difficult to define specifically the cause of these fatalities. The majority no doubt, are due to recklessness on the part of the driver and could be avoided. On the other hand, there are some which are pure accidents and are unavoidable. I am pleased, however, to say that our investigations show that in very few cases was intoxicating liquor a contributary cause.

DEATHS FROM DROWNING

One hundred and ninety-one cases of death by drowning were reported to and investigated by members of the Force, and many requests for assistance from friends and relatives to recover the bodies of the victims.

Assistance was rendered in all cases wherever practicable, and in many cases where the body was not recovered at the time of the search, attention was continued in the event of it being afterwards washed ashore.

Return of prosecutions, convictions, dismissals, withdrawals, etc., by months for offences under the Liquor Control Act, covering the period November 1st, 1928, to October 31st, 1929, with amount of fines imposed during that period:

	Prosecutions	Convictions	Dismissed	Withdrawn	Awaiting Trial	Amount of Fines
November	415	355	45	15	....	$15,751 00
December	474	388	53	33	....	19,130 00
January	336	257	66	13	....	12,570 00
February	336	279	38	19	....	12,380 00
March	436	330	91	15	....	15,845 00
April	525	433	60	32	....	19,071 00
May	575	490	50	35	....	28,006.50
June	596	514	55	27	....	24,715 00
July	764	667	63	34	....	30,785 00
August	835	746	65	24	....	37,495 50
September	637	564	49	24	....	23,352 50
October	566	500	40	26	....	18,975 00
Total	6,495	5,523	675	297	....	$258,076 50

Return of prosecutions, convictions, dismissals, withdrawls, etc., by Districts for offences under the Liquor Control Act, covering the period November 1st, 1928, to October 31st, 1929, with amount of fines imposed during that period:

	Prosecutions	Convictions	Dismissed	Withdrawn	Amount of Fines
No. 1 Dist. Hdqs. London	690	584	97	9	$17,401 50
No. 2 Dist. “ Niagara Falls	531	421	94	16	20,786 00
No. 3 Dist. “ Kitchener	607	507	75	25	35,781 00
No. 4 Dist. “ Barrie	413	382	19	12	39,183 00
No. 5 Dist. “ Belleville	658	630	18	10	25,707 00
No. 6 Dist. “ Ottawa	850	788	53	9	29,265 00
No. 7 Dist. “ Cobalt	433	405	24	4	20,724 00
No. 8 Dist. “ Sudbury	460	425	29	6	14,516 00
No. 9 Dist. “ Port Arthur	373	334	22	17	11,793 00
Windsor Special District	542	364	85	93	16,200 00
Hamilton Special District	314	225	76	13	11,720 00
Toronto Special District	624	458	83	83	15,000 00
Total	6,495	5,523	675	297	$258,076 50

Monthly return of prosecutions, convictions, dismissals, withdrawals, etc., by provincial police districts of all offences (exclusive of the Liquor Control Act) covering the period November 1st, 1928, to October 31st, 1929:

	Prosecutions	Convictions	Dismissed	Withdrawn	Awaiting Trial	Amount of Fines
November	560	480	60	20	....	$6,928 00
December	436	356	58	22	....	3,307 00
January	303	246	36	21	....	1,919 00
February	329	245	49	35	....	1,854 00
March	324	268	36	20	....	2,018 00
April	557	473	49	35	....	2,825 00
May	560	472	65	23	....	3,335 00
June	765	655	74	36	....	4,683 00
July	827	701	93	33	....	6,311 00

COMPARATIVE STATEMENT

A comparative statement of prosecutions, etc., under all Acts and Statutes for the year ending October 31st, 1928, and October 31st, 1929:

	1928	1929
Prosecutions	11,305	13,188
Convictions	9,300	11,042
Dismissals	1,380	1,415
Withdrawals	516	645
On Remand, Awaiting Trial, etc	109	86

Classification of penalties imposed upon persons convicted for offences aginst the Criminal Code and other Dominion and Provincial Statutes:

Imprisonment as Penalty	883
Imprisonment in Default of Fine	535
Committed to Asylum	48
Fined and Fines Paid	2,730
Sentence Suspended	1,297
Otherwise Disposed of	26
Total	5,519

Arrested with or without warrant and persons summoned for offences against the Criminal Code and other Dominion and Provincial Statutes:

Arrested with Warrant under Criminal Code and Other Statutes	1,172
Arrested with Warrant under Liquor Control Act	756
Arrested without Warrant under Criminal Code and Other Statutes	2,202
Arrested without Warrant under Liquor Control Act	3,010
Summoned, etc.	6,048
Total	13,188

A classification of the ages of persons prosecuted for offences against the Criminal Code and other Dominion and Provincial Statutes (exclusive of the Liquor Control Act):

Age 1—10	15
" 10—15	180
" 15—20	1,138
" 20—30	2,363
" 30—40	1,419
" 40—50	966
" 50—60	348
" 60—70	133
Over 70	32
Companies	13
Total	6,607

Classification by nationalities of persons prosecuted for offences against the Criminal Code and other Dominion and Provincial Statutes (exclusive of the Liquor Control Act):

Canadians	4,578
Americans	308
English	364
Indians	125
Irish	113
Italians	93
Poles	96
Russians	83
Scotch	102
Other Nationalities	732
Companies	13
Total	6,607

Classification of the sex of persons prosecuted for all offences against the Criminal Code and other Dominion and Provincial Statutes (exclusive of the Liquor Control Act):

Male	6,311
Female	283
Companies	13
Total	6,607

Classification of marital state of persons prosecuted for all offences against the Criminal Code and other Dominion and Provincial Statutes (exclusive of the Liquor Control Act).

Married	2,748
Single	3,744
Widows	14
Widowers	88
Companies	13
Total	6,607

NUMBER OF SEARCH WARRANTS EXECUTED

Under the Criminal Code	1,617
Under the Liquor Control Act	16,453
Number of Arrests for Other Forces	411
Summonses Served for Other Forces	719

STOLEN PROPERTY RECOVERED

Property that had been reported through various sources as stolen, was recovered by members of this Force to the value of $135,983.68.

EXPENDITURE AND REVENUE

The financial reports and statistics show that the expenditure of the Department for the year 1928-29 incurred by all branches of the Force for law enforcement was $706,895.04, an increase of $60,307.08, as compared with 1927-28.

The revenue derived from various sources in connection with the Department during the year was $415,112.48.

Statistics show that the cost of law enforcement was almost equally divided between the enforcement of the Liquor Control Act and all other branches of law enforcement:

EXPENDITURE

Salaries, Permanent	$438,615 15	
Salaries, Travelling Expenses and Disbursements, Provincial Special Constables (temporary)	27,439 21	
Police District Disbursements:		
Criminal Expenditure	88,795 29	
L.C.A. Disbursements	86,494 07	
Travelling Expenses, Headquarters	5,166 05	
Insurance, Accident, Inspectors and Constables	4,314 48	
Automobile, Dept. Cars	440 38	
Training School, Maintenance Allowance and Disbursements	2,255 27	
Criminal Investigation Branch:		
Travelling Expenses	4,829 11	
Extradition Expenses	384 89	
Detective Services	2,012 24	
Automobiles, Supplies and Garage Equipment	18,960 87	
Uniform and Equipment	15,195 37	
Office Disbursements	10,654 21	
Miscellaneous Payments	1,338 45	
		$706,895 04

REVENUE

Fines under L.C.A.	$258,076 50	
Fines other than L.C.A.	47,397 00	
Constables' Costs and Fees	65,638 98	
Confiscated Liquor	35,000 00	
Confiscated Automobiles	9,000 00	
		$415,112 48

Expenditure	706,895 04
Revenue	415,112 48

CONCLUSION

Before closing this report I wish to thank you for the helpful and sympathetic manner in which you have received any proposals I have laid before you either in the matter of law enforcement or for the welfare of the members of the Force, also the Deputy Attorney-General and his staff for their ready assistance given at all times.

I have to express my appreciation of the close co-operation of the Chief Commissioner and Commissioners of the Liquor Control Board in the many matters pertaining to the enforcement of the Liquor Control Act.

I wish to thank all the municipal police forces of the Province, the R.C.M.P., the C.P.R. and C.N.R. Police Forces, also the provincial and other forces outside the Province for their effective assistance and co-operation during the year.

I desire also to express my appreciation to all ranks of the Force for their good work and faithful attention to duty during the year, and to record my appreciation of the kind and helpful manner in which County Crown Attorneys and police magistrates have encouraged and assisted the members of the Force in the execution of their duties.

Respectfully submitted,

VICTOR A. S. WILLIAMS,
Commissioner of Police for Ontario.

The Tenth Annual Report

OF THE

Department of Labour

Province of Ontario

1929

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO

REPORT OF THE DEPUTY MINISTER OF LABOUR

EMPLOYMENT CONDITIONS.

Employment in Ontario was considerably greater in volume during the fiscal year 1929 than in 1928 or in any year since 1920. For the past four years progress in this respect has been uninterrupted, each month showing an advance as compared with the same month of the previous year and on October 1, 1929, the index number of employment as recorded by the Dominion Bureau of Statistics had reached its maximum of 128.4 or 8 points higher than a year ago. This year a new base has been used for the employment index by the Dominion Bureau of Statistics, the average for the calendar year 1926 being taken as 100 instead of the former base of January 1920 as 100. On this basis the volume of employment for the fiscal year 1929 will be represented by an index number of 122.7 as compared with 112.6 for 1928, or an advance of 10.1 points. Expansion reported on May 1st was the greatest on record and indicated an addition of 22,355 persons to the working forces of the firms reporting, bringing the index number more than 13 points higher than at May 1st, 1928. The increased activity at this time was most pronounced in manufacturing, especially iron and steel, construction and transportation.

As compared with 1928, the greatest advance in the index number for the year was in the services group which gained over 21 points. The increase in tourist traffic during the summer and autumn accounted largely for this activity affecting the hotel and restaurant division and from July 1st to October 1st the index number remained above 160. Significant gains in the iron and steel industry were reported in the first half of the year with a slackening in the second half, which was not sufficient, however, to counteract the good effects of the earlier gains and although the volume of employment for the last three months was on practically the same level as last year the average was an advance of more than 15 points. Communication, logging, construction and trade ranked next with gains of 14.4, 11.8, 11.2 and 10.0 in the index numbers and a general improvement in employment conditions in every division of manufacturing brought the group as a whole 9.6 points ahead of last year. Greater seasonal activity than last year for logging in December, January, February and again September and October, in both of which months the index number increased approximately 70 points, accounted for the high average level in spite of the recessions during the balance of the year. The smallest increase in numbers employed was recorded for pulp and paper as indicated by an advance of nearly 2 points in the index number, but the activity was steady, keeping slightly above last year's level over the whole period and ending 5 points higher than a year ago.

The manufacture of lumber, transportation, textile products and mining reported gains of 4.2, 5, 5.6 and 6.6 points. In short, the two facts that advances as compared with 1928 ranging from nearly 2 to 21 points were recorded for each of the 13 divisions and advances of from 5 to 13 points for each month of the year as compared with the corresponding month of the previous year indicate a business condition throughout the Province that is generally satisfactory.

Wages and Hours of Labour

Certain increases were recorded in wage rates for various sections of the building trades during 1929. In Ottawa an increase of 5 cents per hour brought the rates for bricklayers up to $1.25, carpenters to·90 cents, painters to 70 cents, plumbers to $1.00 and stone cutters to $1.05 per hour and an increase of 7½ cents brought sheet metal workers to 95 cents per hour. In Toronto bricklayers' wages advanced 5 cents to $1.30, electrical workers' 15 cents to $1.15, plasterers, sheet metal workers' and stone cutters' 7½ cents to $1.32½, $1.07½ and $1.20 respectively; a gain of 12½ cents brought plumbers' wages to $1.25 and painters' wages advanced from 75-80 to 80-90 cents per hour. In Hamilton a ten cent increase brought carpenters' wages to $1.00 and electrical workers' to 85 cents and an advance of 5 cents set the rate for plasterers at $1.25 per hour. Other changes reported were for bricklayers from $1.20 to $1.25-$1.35 per hour; for plumbers from $1.00 to $1.00-$1.35 per hour and for sheet metal workers from 90-95 cents to $1.00-$1.06¼ per hour. In Windsor carpenters and plumbers gained 10 cents to $1.10 and $1.35 per hour respectively; electrical workers 12½ cents to $1.37½ while sheet metal workers changed from $1.00 to $1.06¼-$1.12½ and builders' labourers from 45-60 to 45-65 cents.

In the metal trades the following advances were recorded: in Ottawa boilermakers increased from 61-75 to 65-75 cents per hour, machinists from 55-65 to 60-70 cents and iron moulders from 50-65 to 55-68 cents per hour; in Toronto the changes were for blacksmiths from 55-65 to 60-65 cents, for machinists from 50-70 to 55-70 cents and for iron moulders from 55-70 to 60-70 cents and in Hamilton blacksmiths increased from 50-70 to 55-70, machinists from 40-65 to 50-70 cents and iron moulders from 50-80 to 55-80 cents per hour. Figures for the metal trades in Windsor are not available.

In the printing trades an advance of $1.00 per week in Ottawa brought news compositors up to $44.00 and news pressmen to $43.00 per week. In Toronto the advance for news pressmen was 50 cents, making a rate of $45.00 per week and job compositors' wages changed from $35.20-$42.00 to $35.00-$42.00 while in Hamilton the change recorded was for bindery girls from $11.00-$16.00 to $11.00-$15.40.

No changes in hours of labour were reported in the building trades for the four centres on record nor in the printing trades for the three centres. In the metal trades the iron moulders' hours in Ottawa were reported as changing from 44-50 to 50 hours per week.

Industrial Unrest

Measured by time-loss in working days, the volume of disturbance due to industrial disputes in Ontario was greater in 1929, with a total of 75,870 days, than in 1928, when the total was 59,889 days, and was also greater than in any year since 1924. The number of disputes and the number of persons involved, however, were fewer for the year, being 43 and 5,172 respectively as compared with 52 and 5,622 for 1928.

More than one-half of these persons, or 2,638, were involved in 17 disputes in the construction industry which caused over 41 per cent. of the time-loss, or 31,833 days. The second greatest time-loss occurred in the manufacture of textiles with 768 persons losing 16,375 days, one of the two disputes in this industry accounting for 750 persons losing 16,300 days, the largest total for any single dispute during the year. Three disputes in the manufacture of iron and steel products were responsible for 345 persons losing 8,910 working days and 3 in the logging industry for 500 persons losing 8,780 days. Five disputes among clothing workers caused 469 persons the loss of 4,453 days; one of boot and shoe workers caused 33 workers the loss of 2,295 days, while 40 photo engravers in one dispute lost 1,428 days, 122 workers in metal products other than iron and steel in 4 disputes lost 1.057 days and 100 rubber shoe factory workers lost 350 days. In the 6 disputes in other industries not many workers were affected nor was the time-loss great.

It is notable that a large proportion of the disputes involved comparatively small numbers of workers; 65 per cent. of the 43 disputes, or 28, affected 100 workers or less; 48 per cent. or 20, affected 50 workers or less and 33 per cent., or 14, affected 25 workers or less. Of the remaining 15 disputes, 10 affected from 100 to 200 workers; 2 from 200 to 400 workers and 3 affected 500, 600 and 750 workers each. Moreover, many of the 43 disputes were of short duration, one-third of them lasting less than 5 days.

An analysis of the 43 disputes by causes shows that in the case of 26, involving 3,266 workers and causing 44, 918 working days lost, or approximately 59 per cent. of the total lost time, the matter of wages was the main concern although hours, working conditions and union agreement were also factors in 6 of these 26. Dissatisfaction over working conditions or to maintain union working conditions and one over proposed changes in working conditions involving a reduction of staff gave rise to 7 disputes, affecting 996 workers and resulting on 16,610 lost working days; matters concerning the employment or discharge of workers caused 5, involving 236 workers in the loss of 1,340 days; one for employment with members of one employers' organization only involved 400 workers in a loss of 7,500 days and 2 sympathetic strikes caused 210 workers to lose 2,674 days. One alleged lockout for union agreement and one of union employees resulted in 64 workers losing 2,828 days.

Analysed according to results, 11 of the 43 disputes affecting 1,518 workers were settled in favour of the workers and 11 affecting 1,514 workers were settled in favour of the employers. In the case of 9 disputes involving 1,415 workers a compromise was arrived at; 8 involving 413 workers were indefinite as to outcome or lapsed, in some instances the workers were replaced or obtained work elsewhere and 4 affecting 312 workers had not been settled at the end of the fiscal year, October 31st, 1929.

Employment Service Branch

The increase in industrial employment already reported is evidenced in the increase in the volume of work accomplished by the Employment Service Branch in registering more applicants, recording more vacancies and making more placements through the various employment offices than last year. During the fiscal year 1929, the applicants for employment at the twenty-six offices numbered 223,600 as compared with 212,422 in 1928; the number of vacancies recorded was

182,620 as compared with 175,870 and more placements were made than in any year since the offices were opened, numbering 159,519 as compared with 153,783 last year. Of the 159,519 placements made, 102,473 or approximately two-thirds were of a regular nature, that is for employment of more than one week's duration. Moreover, approximately 87 per cent. of the vacancies reported were filled by the offices and 71 per cent. of the applicants were placed in employment.

During the year the General Superintendent, H. C. Hudson, addressed 18 meetings of service clubs and student bodies on the scope and functions of the Employment Service. A weekly broadcast of employment conditions in the Province and the activities of the Employment Service Branch has also been inaugurated and considerable interest in these matters has been aroused. At the annual convention in Philadelphia of the International Association of Public Employment Services, H. C. Hudson was elected, by acclamation, chairman of the Association which will meet in Toronto in 1930.

Steam Boiler Branch

A continued increase in every division of the work of the Steam Boiler Branch was reported for the fiscal year 1929. Special activity was indicated in the increased number of pressure vessels constructed from designs approved by the Branch, a total of 831 or 249 more than last year. Consequently a greater number of drawings and specifications were surveyed and registered, 624 as compared with 567. The number of pressure vessels inspected when repaired, sold or exchanged including 763 annual inspections of boilers and pressure vessels, totalled 1,636 as compared with 1,566 in 1928 and altogether 3,862 certificates were issued during the year.

This general increase in the volume of work of the Branch resulted in an increased revenue which amounted to $25,167.15 as compared with $22,152.90 for the previous year.

The Board of Examiners of Stationary and Hoisting Engineers

For the past ten years the Board of Examiners of Stationary and Hoisting Engineers has been issuing to engineers in this Province graded certificates which classify them according to degree of technical knowledge and proficiency in practical work. A three-fold benefit has been accruing from this system. Engineers of the higher grades only are qualified for posts involving the greater responsibility and consequently higher remuneration while the engineers in the lower grades have opportunity for improving their status through experience, study and examination. The graded certificate is a guide to employers in the choice of men to take charge of their power plants and there is among them a tendency to employ men holding certificates of higher grade than is required by the Act in order to secure a high degree of efficiency and economy. Greater safety is secured for the general public in the protection of life and property.

During the fiscal year 1929 a total of 16,037 certificates were issued by the Board, as compared with 16,625 in 1928. Of this number 1,705, or 332 more than last year were issued upon examination, 26 were provisional certificates, 34 duplicate and 124 were plant owners' registration certificates. All of these showed advances over last year, the decrease occurring in the renewal certificates which numbered 14,149 as compared with 15,085. The candidates examined totalled

2,055, an increase of 204 over last year and examinations for 727 of these were held at the office of the Board in Toronto, the balance of 1,328 being examined at convenient centres throughout the Province. Of the 2,055 candidates, 1,094 wrote the examination for fourth class; 407 for third; 139 for second; 56 for first class certificates; 164 for hoisting and 195 for portable engineers' certificates. The net revenue of the Board for the year amounted to $24,830.77 as compared with $23,474.02 or an increase of $1,356.75.

Factory Inspection Branch

The forty-third annual report of the Factory Inspection Branch records greater industrial activity during 1929 than in any year since 1920. A total of 17,944 inspections and visits were made by the inspectors and in the factories, mercantile establishments and office buildings inspected 319,646 persons were employed as compared with 313,595 in 1928. Altogether 6,839 orders relating to the various requirements of the Factory, Shop and Office Building Act were issued and it was necessary to take proceedings against two firms for violation of the Act, fines being imposed in both cases. The number of accidents to industrial workers recorded in the Factory Inspection Branch showed an increase for 1929, being 7,083, of which 63 were fatal, as compared with 5,809 with 35 fatal in 1928.

The Examiner of Reports and Designs attached to the Factory Inspection Branch whose duty it is to examine all plans for new buildings to be used for factories, shops and office buildings and for alterations or additions to existing buildings to be used for such purposes reports in part as follows:—

> "During the past year the number of plans submitted and the value of the buildings represented by these plans were considerably in excess of any previous year. The estimated cost of the buildings for which plans were approved has shown an extremely steady and satisfactory increase during the last six years as will be seen from a perusal of the following figures:—
>
> Estimated value of buildings:—
>
> | | |
> |---|---|
> | 1924 | $ 8,250,000 |
> | 1925 | 8,692,000 |
> | 1926 | 16,321,000 |
> | 1927 | 20,218,950 |
> | 1928 | 32,614,300 |
> | 1929 | 36,588,950 |
>
> Generally, the plans submitted have been extremely satisfactory and the number of cases in which serious changes were necessary have been remarkably few. It is found, however, that when plans have been prepared outside the Province a lack of familiarity with Provincial requirements has necessitated revision of the drawings more frequently than those prepared by local architects and engineers. Especially has this been found the case in connection with stairways.
>
> The proper planning of stairways is an important factor in a building, demanding the most careful consideration, as records show that a surprisingly large number of accidents occur through falls on stairs. "Winders" in stairs lead almost invariably to falls and, although the use of them has been condemned by all competent authorities for years, they still appear on plans of important buildings."

Apprenticeship Branch

The first annual report of the Apprenticeship Branch indicates that a great deal has been accomplished in putting into operation the Apprenticeship Act throughout the Province. In addition to the Inspector of Apprenticeship, A. W. Crawford, B.A. Sc., five District Inspectors and one Assistant District Inspector have been appointed to organize the work in the larger centres and co-operate with local advisory committees in carrying out the provisions of the Act and Regulations. A survey of the building trades has been undertaken for the purpose of securing the registration of all minors employed in designated trades and various means have been taken to inform employers and the general public of the requirements of the Apprenticeship Act and Regulations and the work that is being accomplished by this Branch. Requests for such information have been received from all parts of the Dominion, the British Empire and the United States of America. A full measure of success in the administration on this Act may be attained only through close co-operation between employers, employees and the Inspector of Apprenticeship and progress in this respect has been most gratifying during the year.

At the end of the fiscal year, 1929, the number of apprentices who had registered totalled 1,078, of which 29 were registered previous to the beginning of the year and 1,049 during the year. Of this total, 19 were cancelled and 31 completed during the year, leaving 1,028 active contracts at the end of the fiscal year. The distribution of these 1,028 apprentices among the designated trades is as follows:—Bricklaying 126; masonry 5; carpentry 116; painting 38; plastering 69; plumbing 322; steamfitting 110; sheet metal 91, and electrical 151. According to districts the distribution is as follows:—Toronto District 527; Hamilton 227; Ottawa 83; London 53; Windsor 52; Central 43, and Northern 43.

Labour Legislation, 1929

The Statutes of Ontario, 1929, contain the following Acts of interest to labour:—

1. An Act to provide for Old Age Pensions;

The Old Age Pension Act of Ontario gives effect within the Province to the Dominion Old Age Pension Act. This Act provides for the payment of a pension to a person who:

(a) is a British subject, or being a widow who is not a British subject, was such before her marriage;
(b) has attained the age of seventy years;
(c) has resided in Canada for twenty years;
(d) has resided in the Province in which the application for pension is made for five years;
(e) is not an Indian as defined by The Indian Act;
(f) is not in receipt of an income of as much as $365. a year, and
(g) has not made any voluntary assignment or transfer of property for the purpose of qualifying for a pension.

Where the applicant has an income of $365. a year or more no pension can be granted. The maximum pension of $240. a year is to be reduced when the pensioner has an income in excess of $125. a year, so that the pensioner's income and the amount of the pension together will not exceed $365. a year.

Where the applicant has not resided in Ontario during the whole of the past 20 years, but has resided in one or more other Provinces during that period he will be entitled to receive the full amount of the pension in Ontario, provided the other Province or Provinces in which he has so resided are under the Dominion Old Age Pensions Act. At present these Provinces are Alberta, British Columbia, Manitoba and Saskatchewan and also the Yukon Territory.

Provision is made for local pensions boards, for contributions by counties, cities, and towns, for applications for pensions, for the method of payment of pensions and for regulations by the Lieutenant-Governor in Council covering further details in connection with the matter of pension payment.

The Parents Maintenance Act of Ontario requires a son or daughter having sufficient means to provide for the maintenance of the dependent parent. The Old Age Pension Act does not remove this obligation.

2. An Act for the Better Prevention of Silicosis among Stone Workers:

This Act requires that a person shall not be employed in the cutting, polishing, or finishing of granite who is not the holder of a subsisting certificate given by a medical officer under this Act that such person is medically fit to be employed in such occupation, and provision is made for the renewal of such certificates under prescribed conditions. It is provided that the owner, manager, proprietor or superintendent of any works in which the cutting and polishing of granite is carried on shall provide such masks and other appliances for the protection against silicosis of persons employed on this work as may be approved by the Minister of Health and shall take such precautions and use such appliances as may be directed by the Factory Inspection Branch of the Department of Labour. Provision is made for regulations governing the appointment of medical examiners, medical examination, the further security of granite workers and the extension of the operation of this Act.

3. An Act to amend the Factory, Shop and Office BuildingAct:

Many of the amendments under this Act restored former provisions which had been omitted or altered in the Revised Statutes of Ontario, 1927. In connection with the payment of overtime, section 34, was amended by the addition of the following clause:

> (a) In all cases where any child, youth, young girl or woman works beyond the number of hours in any one day or in any one week as provided in this Act, and whether the Inspector under this Act has permitted exemption or not, such child, youth, young girl or woman shall be entitled to be paid wages for such overtime, and the Minimum Wage Board of Ontario shall have the right to establish a rate of wage for such overtime worked in any one day or in any one week.

4. The Statue Law Amendment Act:

Under this Act the Minimum Wage Act was amended to empower the Minumum Wage Board to establish a wage for all time worked by a child, youth, young girl or woman in excess of the statutory number of hours in any one day or week in accordance with the amendment to the Factory, Shop and Office Building Act.

The Mothers' Allowance Act was also amended by substituting the expression "one of her own legitimate children" for "one of her own children born in lawful wedlock". The scope of the provision for special consideration of certain cases not strictly eligible was also enlarged.

Ontario Government Offices, Employment Service of Canada

General Superintendent—H. C. Hudson

Parliament Buildings, Toronto

The fiscal year ending October 31, 1929 was the best, judged from an employment standpoint, since the Ontario Government Employment Offices were organized in 1916. Work was more plentiful in the Province than ever before and the industrial activity was reflected in the increased numbers of workers asked for by employers and in the increased number of placements made by the Service. The vacancies listed with the twenty-six Offices of the Service totalled 156,995 in 1926; 159,729 in 1927; 175,870 in 1928 and 182,620 in 1929. This consistent increase indicates clearly that the Public Employment Service is maintaining the confidence of employers and that the number of jobs listed may be accepted as a reliable index of industrial conditions in the Province.

The increase in the number of vacancies was paralleled by an increase in the number of applications, the figures for 1928 and 1929 being 212,422 and 223,600. Here again the consistent increase affords tangible evidence that the men and women for whom the Service was organized appreciate fully its usefulness and look to the nearest employment office as the logical place to find work when they are unemployed.

The placements have also increased each year from 135,331 in 1926 to 159,519 in 1929. The latter figure represents the highest point reached in any year since the offices were opend. Two-thirds of the jobs, 102,473, were of more than one week's duration; the remainder, 57,046, were of a casual nature.

In spite of the number of years that the Service has been in existence, the impression is still prevalent in some quarters that the Employment Offices are operated primarily for the placement of unskilled and domestic workers. A systematic attempt was made during the year to correct this impression and the General Superintendent spoke at 18 meetings to 1,690 persons during the year regarding the work of the Service. In many cases orders for help followed immediately after the conclusion of these talks from employers who had not realized the scope and functions of the Service. The policy of newspaper interviews as a means of extending knowledge of our work was also continued, particularly in centres outside of Toronto and we are indebted to the Press of the Province for its wholehearted support, not only through the news columns but through frequent editorials upon the work of the Employment Service.

In September 1929 still another means of publicity was adopted with the inauguration of a weekly broadcast through Radio Station CKCL, Toronto, summarizing employment conditions and touching upon the various phases of Employment Service activity. The response to the broadcast indicates that this is one of the best means of reaching both employers and applicants and the plan is being continued each Wednesday evening. An order for a specially qualified poultry farmer which was broadcast in the month of October brought eight enquiries from interested persons before 10 o'clock on the morning following the broadcast.

VACANCIES, APPLICATIONS AND PLACEMENTS, FISCAL YEAR 1929

Offices	Vacancies	Applications	Placements		Total Placements
			Regular	Casual	
Belleville	2,160	2,171	1,404	605	2,009

Totals, 1927	159,729	199,332	....	....	136,897
Totals, 1926	156,995	190,586	....	....	135,331

The chart which appears on page 20 of this report presents a graphic picture of employment conditions in Ontario since 1921 and indicates clearly that industrial conditions have shown consistent and continual improvement during the past five years. The regularity of the curve also reveals the seasonal nature of employment in Ontario, the lowest point invariably being in the month of December with a steady improvement each year until the month of October. At the beginning of the fiscal year under review the employment index stood at 121.1, or 10 points higher than on the first day of the corresponding month in 1928. At the end of the fiscal year the index number was 126.5, or 5.4 points higher than 12 months ago.

The Ontario Government Employment Offices have evolved, in co-operation with the other units in the Employment Service of Canada, a very effective system of employment clearance through the medium of which workers are transferred from one portion of the Province to another when employment is not available for them locally. During the year 4,707 men and women took advantage of this feature of the Service. Two hundred of this number were transferred outside the Province and 3,535 persons, largely bushmen and pulp cutters, were transferred in from Manitoba.

These transfers were made by the officers as follows:—

Brantford	18
Chatham	31
Cobalt	146
Fort William	202
Guelph	17
Hamilton	302
Kingston	17
Kitchener	28
London	52
Niagara Falls	26
North Bay	1,557
Oshawa	29
Ottawa	125
Pembroke	253
Peterborough	2
Port Arthur	136
St. Catharines	104
St. Thomas	2
Sarnia	5
Sault Ste. Marie	103
Timmins	9
Toronto — Men	1,091
Toronto — Women	352
Windsor	100
Total transfers	4,707

Of this total 200 persons were transferred from Ontario to other Provinces as per the following table:—

FROM ONTARIO TO —	Manitoba	123
	Saskatchewan	15
	Quebec	56
	Nova Scotia	5
	British Columbia	1
TOTAL TRANSFERRED OUT OF PROVINCE		200

Classification of Transfers according to Industries:—

Farming	406
Logging	1,867
Mining	19
Manufacturing	560
Construction	1,110
Transportation and Storage	167
Communication	33
Trade	8
Finance	1
Service	536
Total	4,707

The Association of Governmental Officials in Industry held its Convention at the King Edward Hotel, Toronto, on June 4-5-6-7, 1929. The Annual Conference of Ontario Employment Office Superintendents was held simultaneously.

The Seventeenth Annual Convention of the International Association of Public Employment Services was held in Philadelphia from September 24th-27th, inclusive. The Ontario unit in the Employment Service of Canada was represented by Miss L. O. R. Kennedy, Superintendent of the Women's Division of the Toronto Office; W. S. Dobbs, Superintendent of the Men's Division of the Toronto Office and H. C. Hudson, the General Superintendent. Toronto was chosen as the Convention city for 1930 and the General Superintendent, H. C. Hudson, was elected by acclamation as President of the Association.

The whole-hearted support afforded the General Superintendent by the Executive Heads of the Department as well as by the staffs of the various offices has been much appreciated and has been the outstanding factor in the success of the Service during the past year.

Belleville has experienced a very satisfactory year from an employment point of view with the factories busy almost continuously throughout the twelve months. Numerous branches of chain store systems have been opened in Belleville and several ocean-going boats entered the port seeking cargoes. The principal exports from Belleville are cheese and apples.

Extracts from the report of the Brantford Office appear below and indicate that industrial conditions in that city were better than during any year since 1918:—

> "Production with the various industries was for the most part maintained at quite high levels and consequently employment levels were much higher. Firms manufacturing agricultural implements, which are the largest one-plant employers, found it necessary, in order to keep production and orders on schedule time, to employ night shifts in some departments during the rush seasons. The smaller western wheat crop had what might be termed an immediate effect, curtailing activity. Manufacturers of auto-truck bodies, grain boxes and wagon works slackened immediately and commenced making staff reductions as no grain boxes were required for Western Canada. Agricultural implement firms also had orders cancelled and staff reductions commenced to take place. These firms have since completed stock-taking programmes but up to the present are not resuming the high production levels, consequently we close the year (the end of October) with a larger number of unemployed compared with the corresponding period a year ago.
>
> According to our records 76 industrial concerns were served by this office this year, which indicates the fact that an ever increasing number of employers are finding our Service advantageous. Progress has been made with employers in the town of Paris and the village of Burford in Brant County. A connection has also been developed with employers in Simcoe, Waterford and other towns in the adjacent County of Norfolk.
>
> The textile industries were for the most part of the year very busy. At certain periods overtime work was necessary to keep production up to schedules and with some firms small night shifts were employed at the busiest seasons. With the closing of the fiscal year these plants were practically all continuing busy.
>
> The building programme in this city, while not as large as last year, was nevertheless fairly good. Projects undertaken were for the most part of smaller type of houses. Changing of store fronts and general alterations were also noted in fair volume. A large apartment house and an addition to the Collegiate Institute undertaken last fall were completed this year. A good sized building was added to the Brant Sanitarium, while several factories erected additions.
>
> A fair programme of track-laying, ballasting, etc., was undertaken on this division of the Canadian National Railways this year. The demand for "extra gangs" commenced the first week in April, requirements during this month being filled from the local supply. In the month of May the supply of

applicants locally was insufficient to meet demands. In this connection we called upon our Hamilton and Toronto Offices to help fill orders listed with us. Vacancies filled locally were 76 regular and 7 casual or a total of 83 placements. Transfers-in, according to our records, were Hamilton 51 and Toronto 45—or a total of 96.

The farm demand, while not quite as large as last year, was nevertheless good, and over the greater part of the year in excess of the supply of applicants. As usual from the month of November until April, farm requirements were filled more easily and with but few exceptions filled satisfactorily. In the early spring season the demand increased considerably and due to much improved city employment conditions, it was impossible to find sufficient applicants to meet demands at this time. A Special Order for experienced men was immediately placed in Clearance in an effort to find applicants, but apparently the employment conditions in the other centres of the Province were good, consequently only a comparatively small number of experienced farm hands was transferred into this district. The demand was principally for single farm hands when required by the month or for longer periods, very few vacancies being received for married farm hands with separate house provided. The wage rate continued practically the same as last year, single farm hands being placed at from $300.00 - $400.00 per year and board on the yearly engagement basis; and from $25.00 - $40.00 per month and board on the monthly engagement basis. The few married farm hands placed were hired at from $500.00 - $600.00 per year, house, garden produce, milk, wood, etc. with no cost to the worker. During the "rush seasons" and "harvest" the supply of applicants was sufficient to meet all requirements as at this time a number of the largest factory employers had reduced staffs prior to the usual stock-taking programme. Those hired on the daily engagement basis received from $2.00 - $3.00 a day and board. Our records show that 771 farm vacancies were filled by the 'Service' locally, of which 726 were filled by male applicants, 411 regular and 315 casual. The vacancies filled by female workers totalled 45, all for berry and bean-picking, 18 regular and 27 casual. Nine farm vacancies were filled by 'transfers-in' making a total of 780 farm vacancies filled by this Office."

Commenting upon conditions in the Chatham districts, the Superintendent reports as below:—

"In the early part of 1929 there was a general falling off in the demand for labour, and with the opening of farm work in April, very serious floods affected this district. The dykes which protected the land along the shores of Lake Erie broke, flooding what is known as the onion and tobacco land, over an area of seven miles long and one-quarter to three miles wide. This break was so serious that at the present time the land mentioned is still under water.

The rise in the level of the lakes also had a serious effect on the land along Lake St Clair, covering a shoreline of ten miles and varying in depth from one-quarter to two miles. The result of these floods in a district where a large number of men were employed on small acreages was to cut off the demand for labour in this district entirely, and to throw on the market the men who owned the property, together with their help, seeking employment in the city and other places throughout the country.

The farmers' experience in 1928 was decidedly unfavourable in connection with growing tobacco, and in most cases, resulted in a big reduction in the demand for farm labour. More farmers this year undertook to do the work on the farm with as little hired help as possible. This, too, had an effect on the labour market. While we did not have the usual number of Hollanders, Czecho-Slovakians, Belgians, etc., arrive here direct from the Old Country, we had a very large number who, having gone to Windsor looking for employment and unable to secure work there, came to Chatham. This number was large enough to affect the market during the whole year, and practically the whole time there was a surplus of labour in this district. This is the first time that this condition has existed in the past six years.

The factories operated a shorter season this year than last. Two of our leading factories shut down early in the year in order to construct large additions to their plants. These are now nearly completed and will be in operation for this winter. Most of the factories here operate directly or indirectly with the automobile trade, which was slack during August, September and October of this year. On the other hand, the canning factories had a much longer season and employed considerably more help, relieving the unemployment situation here.

The demand for domestic help throughout the year was good and shows an increase over last year. During the most of the year there was a shortage of applicants."

The centre of the mining industry is rapidly shifting away from the town of Cobalt which is reflected in the falling off each year of orders for men at that point. Some of the abandoned mines in the Cobalt district are being worked by small parties of practical miners who are taking considerable personal risk in scouring the old workings. While they are making quite a good living for themselves, they do not bring much business to the Employment Office. The logging industry now exceeds mining as a source of employment. 1,454 men and women were placed through the Cobalt Office, 776 of whom were given jobs in connection with the logging industry.

The following significant extracts from the report of the Fort William Superintendent present a picture of employment conditions in the Fort William district:—

"Logging has accounted for 57 per cent. of the business of the office, the total placements being 2,566, which is a decrease of 260 as compared with last year. This decrease is due in some measure to the fact that the camps closed unusually early last spring and also to the fact that heavy bush fires in the summer months curtailed the summer cut to a very considerable extent. Minor disputes between operators and employees in several of the small camps in the district also affected the employment situation.

The building and construction section was not nearly so active as in past years, due to the fact that no large building projects were undertaken. Many men were laid off during the year as the work approached completion on the plant of the Great Lakes Pulp and Paper Company and nothing was commenced to take the place of this work locally. Building placements were 411 as compared with 782 the previous year."

The movement of wheat and other grain in the fall of 1929 was smaller than in previous years which resulted in the falling off of the orders listed by marine and transportation companies. There were 158 farm placements made by the office.

During the year structural alterations were made to the Fort William Employment Office with a view to providing more adequate accommodation for female applicants. An immediate increase in the placement of women followed the changes in the office.

> "Few farm hands were sent to the Prairie Provinces by this office during the past year. In other years we have sent hundreds of men to Manitoba and Saskatchewan, but this year, although men were asked for on one or two occasions, the response was negligible. The idea was prevalent amongst the class of men generally going West for the harvest that crop conditions were not such as would justify the expenditure of leaving Fort William for the harvest fields."

The Guelph office increased its placements by 77, although employers asked for 2,336 workers in 1929, as compared with 2,458 in the preceding year. The local factories were busy until September and made extensive use of the local Employment Office whenever workers were required. The farm demand was somewhat light, due no doubt to the proximity of the Vimy Ridge farm, which supplies the district with trained workers. Two conerns increased the size of their plants during the year and one new factory commenced operations. Building construction and road work were active and an increase in the number of permits for houses provided employment for a larger number of building tradesmen than during 1928.

No Ontario Government Office of the Employment Service of Canada surpassed the record made by the Men's Division of the Hamilton Office in 1929 as compared with 1928. There was an increase of 2,635 in the number of orders for men representing a forty per cent. increase. The total number of applicants,—14,070, was 34.7 per cent. greater than last year, while the total placements—9,182—amounted to 36.6 per cent. more than in the preceding fiscal year. At the beginning of the year there was a noticeable shortage of skilled mechanics in the iron and steel industries but this situation was remedied by an influx of qualified men, a great number of whom have returned from the United States on learning of the activity of industry in this Province. The supply of and demand for farm help were more evenly balanced than in previous years. The fact that there were no harvest excursions to Western Canada enabled the local office to take care of practically all orders received during the Ontario harvest season and the usual scarcity of qualified men for fall ploughing was not evident. Farm wages ranged from $25.00 - $50.00 per month and board for single men while married men received $500.00 - $700.00 per year with free house. Fruit picking in the Hamilton district and the Niagara Peninsula did not absorb as many men as usual, due partially to crop conditions and due also to the numbers of men who were applying directly at the fruit farms for employment.

> "Another splendid year of construction has just closed with several large jobs still under way which will extend well into the fall of next year. Building mechanics have enjoyed continuous employment practically the whole year and owing to a very dry summer and fall very little time was lost through

> weather conditions. During the last week of the year both the bricklayers' and carpenters' locals reported practically all members working. Building permits amounted to $6,370,250 for ten months, an increase of $555,100 over last year.
>
> "If the last six weeks of the year had held up as well as the previous months it certainly would have been a wonderful year in all lines, but since the reports of the wheat crops in the West, a decided falling-off has been noticeable. Within a week, the binder twine department of a large farm implement concern let out a lot of help and in one instance only 200 out of 800 are back with no promises of increasing this number until spring. During the year iron and steel concerns and textiles operated night-shifts almost continuously, a nice steady call for mechanics being received day by day. Some concerns left orders for any mechanics of certain types reporting to the office to be sent along to them, when they would immediately place them. The shortage of these mechanics has done a lot towards making the Employment Service of Canada more popular, as, instead of going from plant to plant, they could come to us and take their choice of whom they cared to work for. Boring mill operators, engine lathe hands, roll turners, engravers —steel—jig and fixture men were some of the lines in greatest demand."

The Clearance System was utilized in obtaining men for employment as draughtsmen, accountants, transit and level men, etc.

> "One very interesting order and one which was not easy to fill owing to the exacting requirements, was a call for young men to train as leading hands in a liquid air department of a large Niagara Falls concern. Another rather odd call which was filled by this office was for a Humane Society Inspector for the Hamilton Branch of the Society. The applicant who secured the position read the advertisement in our window, although it was in the newspapers also, which speaks well for this form of publicity, and he was a returned man with a D.C.M. The Employment Service of Canada was congratulated by the Directors on securing the services of this man who had every qualification necessary."

Although the Hamilton Office has no special Handicap Section, a large number of men suffering from various disabilities have been placed in employment. The outstanding example of this type of work was carried out by the local Superintendent in co-operation with other organizations and resulted in the placement of 13 disabled ex-service men as special traffic officers. These men are on duty at the schools to protect the children crossing the principal streets. The scheme has worked out so successfully that it is expected that additional officers will be appointed in the near future.

The Women's Division of the Hamilton Office showed a gratifying increase in the volume of business as compared with 1928. Reporting on the work of the Women's Division the Superintendent writes as below:

> "The applicants registering have been of a much better type, quite a number applying for office work who have had several years' experience. We have also had a number of graduate nurses looking for employment in industrial plants, one of whom we placed in an excellent position in the city. The majority of overseas girls registering for housework have proved very satisfactory. Plants employing women report conditions fairly good. They

are working on full staffs but say there is not much chance of taking on any extra help at present. Some departments of textile lines are working overtime while others are running only a few days a week, due, they say, to weather conditions. A number of firms have made great additions to their plants this year and have larger staffs than usual.

"The call for household help throughout the year has been fairly well taken care of, but we find as usual a decided shortage of cooks-general although at present things are rather quiet. The majority of overseas girls are looking for housemaid work and take cook-general only as a last resort. This year there has been a continual call from hotels on highways and summer places for extra help, but a large number of these are now closed down and girls have come back to the city for work for the winter months."

The work of the Kingston office showed a decided increase over the preceding year, due largely to the healthy industrial conditions which existed in the Kingston district. The extent to which the farmers depend upon the local office for help is seen in the fact that 397 men and boys were placed in agricultural employment during the twelve months. Many of these were newly arrived immigrants who were referred to Kingston by the various agencies in immigration work. The locomotive works were busy and the Clearance System was called into action to bring in locomotive pattern makers and iron moulders who could not be secured locally. The closing down of a large textile plant in June resulted in the laying off of some 200 men and women, creating a temporary problem which was remedied, however, within a month. Relief work which the city was obliged to carry on during the winter months was handled through the local Employment Office with the object of limiting this type of employment to bona fide residents of Kingston.

Orders were received for 1245 women for domestic employment. The office was able to fill 780 vacancies of a more or less permanent nature and also supplied 336 day workers. A very high percentage of the domestic employment was furnished by the summer and fishing resorts in the Thousand Islands and in the district north of Kingston.

Reporting on employment conditions in Kitchener, the local Superintendent writes as below:—

"Until about the middle of December, 1928, the rubber footwear lines were very busy, one firm commencing to build a substantial addition costing $250,000.00. The commencement of this building acted as a stimulus to the then diminishing building activities. Towards the end of December the rubber shoe industry began to feel the effects of the continued mild weather and as a consequence some rubber shoe workers were released. Offsetting these decreases, furniture was busy at this time preparing for their annual exhibition which opens January 9th. of each year.

"The months of January and February over, practically all lines of industry were in full swing again. Building also was by now well in its stride. The months of May, June, July and the early part of August were months of real activity. It was during this period that we experienced difficulty in supplying laborers to the railroad companies, farm hands who would stay on farms, and in cases, experienced tradesmen and skilled workers in the various manufacturing lines. Towards the end of August conditions began to take on a different aspect; vacancies were not nearly so numerous."

Building was very active during the year with over 200 residences and apartments erected and in addition the construction of a school, an abattoir, and ten business blocks provided employment for large numbers of building tradesmen. Almost $200,000.00 was spent in the County of Waterloo on road construction and the local office was called on to supply many workers for this occupation.

The London Office reports in part as follows with regard to employment conditions in that district:—

"Industrial conditions throughout the year have been exceptionally good with manufacturing and construction consistently busy. There has always been on hand a surplus of men for rough labour and apart from skilled help very little appeal had to be made for help from outside offices. This condition was due largely to the constant flow of recently arrived immigrants who had given up the idea of following agricultural pursuits. Placements in farming were slightly under last year and were nearly all of the experienced type of Canadian farm hand and commanded the highest rate of wages. Canadian experienced farm hands were fairly plentiful during the summer months and we found it hard to place them satisfactorily on account of newly arrived immigrants taking on the work at a much lower wage.

"The general opening up of the iron working industry early in the year called for a great number of skilled workers throughout the Province and, like other centres, we were looking for machinists, moulders, boilermakers, etc. Leather and shoe manufacture had considerable expansion during the early months. The manufacture of radio cabinets has become a very large part of the output of furniture plants and big additions to the working staffs have resulted. Local hosiery and knitting mills have been consistently busy with only small variation from maximum staffs. The General Steelwares Limited have built a large addition to their plant and installed a large electric oven for the special manufacture of enamelled ware. On the whole, all of the various lines of manufacturing located in the district have had a busy year.

"As usual the construction group employed by far the largest number of our placements. Dwelling construction, though not as great as last year, was nevertheless, heavy. Larger buildings include telephone building, Bank of Toronto, General Steelwares (Enamelling Plant) and several new school additions.

"The demand for domestic help throughout the entire year has been constant with the supply of workers at no time large enough to meet the demand for this kind of help. Some fifty girls from Great Britain arrived in London during the year and were placed in domestic employment. We found the majority of these Overseas girls to be good workers, quick and willing to learn. We hope next year to have a greater number directed to London for placement. We found it difficult to get domestic workers to go to the country or to the smaller centres, sometimes due to the smallness of the wage, but mostly, on account of the dislike for the more quiet places, the bright lights of the city being preferred. Our casual workers make up a good number of our applicants, these workers for the most part being married women with homes and families to care for, therefore, making it impossible for them to accept a domestic situation to live in."

The extent to which the Employment Clearance System has become a regular part of the Employment Service is clearly revealed in the report of the Niagara Falls Superintendent. During the twelve months ending October 31, 1929, the Niagara Falls Office was responsible for bringing into the district 248 men and women. Of this number 49 came through the Hamilton Office and included men and women of the following trades and occupations: waitresses, pipe fitters, machinists, blacksmiths, farm labourers, sheet metal workers, steel markers, punch operators, template makers, structural steel workers, floor moulders, electric welders, electricians, rivetters, bakers, bakers' helpers, first cooks, second cooks, porters, dishwashers, millwrights, accountants and one nurse. Toronto supplied 153 workers from most of the above occupations and the remainder of 248 were transferred in from St. Catharines and Brantford. The interchange of workers between Niagara Falls and St. Catharines is seen in the fact that twenty workers were transferred to the latter city during the year. In addition ten bushmen were sent to the Timmins area. The Superintendent reports that the number of bushmen recruited at the office would have been very much larger if transportation had been provided by the employer.

The number of workers brought into the Niagara Falls district is, in itself, evidence of the industrial activity during the year. Space does not permit details with regard to industrial activity in Niagara Falls, but reference should be made to the outstanding increase in the Women's Division as compared with 1928. Employers called for 991 female workers and 661 placements were made, representing a ten per cent. increase as compared with the previous year.

The placements of the North Bay Office showed an increase of approximately 1200 as compared with 1928. This increase is accounted for by the fact that lumber companies which formerly concentrated their activities on pulp cutting, this year cut ties and other commercial timber which they sold to independent mill owners ,thereby greatly increasing their output. The care exercised by the staff of the North Bay Office in selecting qualified men was also an outstanding factor in the increased business of the office. Evidence of this fact is seen by an examination of the list of employers using the office, many firms transferring their business from private agencies to the public employment service. Experienced help was plentiful this year due to the fact that there were no harvest excursions from Eastern Canada. In spite of the large number of men available, wages in the North Bay district were slightly higher than elsewhere in the Province, the rates ranging from $35.00 - $45.00 per month. The saw mills were busy, particularly those specializing on the cutting of hardwood. Canadian automobile plants are now buying large amounts of dimension stock from the mills in this district. The stabilization of prices in the pulp and paper industry resulted in an increase of orders for men for this occupation. The Employment Office placed approximately one-third more men in this industrial group than last year. Large numbers of men were supplied to the railroads, as usual, and towards the close of the year the Office recruited men for a survey gang which left North Bay in October to run the survey lines through the proposed route of the extension of the T. & N. O. railway into the lignite coal area.

A re-arrangement of the office provided separate accommodation and a separate entrance for the Women's Division. The placement of 133 women in steady jobs and orders for 140 casual workers can be attributed to the improvement in the office lay-out.

It is interesting to note that the North Bay Superintendent was on duty outside of office hours approximately every fourth day during the year. On thirty occasions he was engaged in checking the baggage and arranging the transportation of men leaving North Bay at 10.45 p.m. A similar situation exists in many of the other offices and this example is merely quoted to indicate the fact that the members of the Employment Office Staff are interested in their work and are prepared to give the same service as employers receive from private agents.

Below will be found a statement of the placements of the North Bay office arranged in their industrial grouping:—

Farming	36
Logging	2,042
Sawmills	278
Pulp and Paper	866
Mining	22
Highways	48
Railways	1,171
Buildings — General	865
Services	429
Miscellaneous	121
Total	5,878

The curtailment of production in the automobile and allied industries was responsible for a slight decrease in the placements made by the Oshawa Office. A reduction in the number of building permits issued locally is another factor entering into the situation. The first six months of the fiscal year were exceptionally active, however, and placements showed an increase of 800 over the number for the corresponding period in 1928. The inter-relations of many of the industries in Oshawa became particularly noticeable when the General Motors plant reduced its rate of production in 1929.

Reporting upon the placements of farm help through the Oshawa Office, the Superintendent writes as follows:—

> "Oshawa being an industrial city the filling of farm orders has been a difficult matter, but with the assistance of transfers-in we have been able to look after the farmer fairly well. With the factories busy in the early spring it is almost impossible to induce men to go on the farm, as wages offered will not begin to compare with the factory wage. During the summer and early fall very little difficulty was experienced in securing workers for haying, silo filling and apple picking."

Building and construction, while not as active as in previous years, was responsible for a large number of placements. A new high school costing $250,000.00, an addition to the General Motors plant and the construction of a residence costing $100,000.00 were among the outstanding building projects carried on during the year. Calls for building tradesmen were also received from Port Hope and Bowmanville for the boys' schools located in those towns. The city of Oshawa commenced some relief road work in September to provide employment for some of the married residents of the municipality who were unable to find other employment. The men engaged in this work were recruited through the Oshawa office and it is interesting to note that in Oshawa, as in many other centres of the Province, the closest possible co-operation exists between the Employment Service and the municipal authorities.

The Superintendent of the Oshawa Office comments in part as below with regard to the placement of women:

> "The Women's Division, with placements of 1,036, shows an increase of 200 over last year. As in previous years, there was a scarcity of fully experienced domestics and cooks-general. The Clearance System has been a big factor in helping us fill the many orders for this class of worker. We have found that classified advertisements in the local paper were a big help, as they enable us to secure a number of applicants who are available when required. During the year, orders for a large number of institutional workers were received, several of which were from outside points in our zone. These we have been fairly successful in filling with satisfactory workers. The calls for the casual worker are increasing monthly and as we have a number of exceptionally good workers listed, we have very little trouble in filling all demands made upon us on very short notice. The care exercised in selecting this class of worker is responsible for the monthly increase in this group."

Comparatively few manufacturing industries are located in Ottawa which naturally restricts the field of operations of an Employment Service in that City. On the other hand, however, the city is rapidly becoming an important retail trading centre and the Superintendent of the Employment Service is concentrating to a large extent on the placement of sales clerks and office workers. The farm demand in the Ottawa district is almost exclusively for experienced dairy men and the office was successful in placing a large number of qualified men in this industry. The emphasis on farm placement work is laid upon the permanent jobs rather than those which are of a purely seasonal nature. Ordinarily, Ottawa furnishes a very large number of men for employment in the lumber woods. This year, however, the lumber companies did not advance transportation and the number recruited was, consequently, much lower. The bushman has been accustomed for years to advanced transportation to the job and he has not yet fallen in line with the new policy. While building operations were not as extensive as in some previous years, the office was called upon to supply a fairly large number of building tradesmen, an outstanding example being in the case of stonemasons for the new Confederation Building. The effectiveness of the Clearance System is seen by the fact that stonemasons were brought from British Columbia for this job.

Below will be found an extract from the report covering the work of the Handicap Section of the Ottawa Office:—

> "The work in connection with the Handicap Section goes hand in hand with the various Veterans' Associations and during the past twelve months through this close co-operation we have been able to interest several Departments of the Dominion Government and a number of the larger Ottawa business houses in the work which is being done. The lack of large industries where disabled returned men could learn trades at which their disability would not entail too great a handicap on production seriously affects the quantity of our placements but the increasing good-will which the departmental stores are extending to this section is resulting in returned men being re-established on a more permanent basis than has been possible in the past."

The following extracts illustrate the efforts of the Women's Division in the Ottawa Office in meeting the needs of employers in that district:—

> "Within the past year a private office has been built in the Women's Division which has added greatly to the convenience and efficiency of the work. An increase in the number of placements is shown for every month of the year with the exception of August, when a noticeable decrease is shown from the corresponding month last year. A great many Finnish and Swedish girls have come to Ottawa and district within the past year and have proved very satisfactory. Many of them were unable to speak a word of English upon arrival but we had very little difficulty in placing them as they are considered exceedingly good workers, clean, smart, and capable. They immediately became interested in learning English and usually joined classes at the Y. W. C. A., where they had the opportunity of free instruction. About one hundred and twenty-five girls from the British Isles came to Ottawa under the Empire Settlement Scheme and were placed in domestic service through our Office. A very small percentage of the girls were really well trained and the emigration officials from the other side stated that because of the changed conditions, including increased wages at home, it was extremely difficult to get trained maids to come to Canada.
>
> As there is a constant demand for household workers in this country and it is impossible to meet that demand with a sufficient number of our own Canadian girls the only thing that seemed feasible was to recruit many of the better class inexperienced girls from the Old Country. There appeared to be a considerable number of young women willing and anxious to come to Canada but our past experience in bringing girls who had worked only in shops and factories and with absolutely no experience in domestic work was anything but satisfactory. However, the British Government has overcome this difficulty by opening up training centres where prospective emigrants may take a three months' intensive training in the care of a Canadian home. Canadian equipment is used entirely and the girls are instructed in how to use the coal, gas and electric ranges. They are also taught to use the electric equipment such as the washer, vacuum, floor polisher, etc. It is only within the past month that these 'trainees' as they are called, have begun to arrive in Canada. So far they appear to be a very good type of settler but it remains to be seen just how successfully they may work out.
>
> While the demand for clerical workers has also been slight, the placements which were made were for the most part highly qualified stenographers and secretaries."

Closer contact between the Employment Service and the farmers in the Pembroke district was established during the year as a result of discussions at various farmers' organizations regarding the purpose and functions of the Employment Service of Canada. In addition a number of farmers' sons whose services were not required at home were placed in other employment as a result of this co-operation. Placements on farms totalled 225 during the year. Conditions in the manufacturing industries were good and the Employment Service was utilized in filling vacancies, particularly in the seasonal occupations. The lumber companies operating in the Pembroke area report an exceptionally busy year, particularly in the logging, boxwood, matchwood and pulpwood camps. Monthly wage rates have averaged from $30.00 - $45.00, while piece workers have been paid from

$2.00-$2.75 per cord for box, match and pulpwood. The piece work rate in pine camps has ranged from 18 to 20 cents, or from $4.00 to $4.50 per thousand, board measure, less the usual charges of $1.00 per day for maintenance. Building construction was active, a new addition being erected to one of the factories and the local newspaper erected a new printing establishment. A considerable volume of employment has also been furnished by the local electric light company in connection with the change from cedar posts to steel standards on the power line between Black River and Pembroke.

Placements were made in the following Zones through the medium of the Clearance System:—

> "Besides placements filled from transfers in which were practically all bush labour, transfers out were made through the offices at Fort William, Sudbury, Sault Ste. Marie, Belleville, Cobalt, North Bay, Timmins, Montreal, Quebec, Hull, Winnipeg, and Calgary. These transfers covered various occupations. Besides bush laborers and mill hands, there were dock and bridge builders, carpenters, millwrights, bricklayers, scalers, blacksmiths, rodmen, linemen, cooks and farmers."

Employment conditions in Peterborough during the first eight months of the fiscal year were very satisfactory, particularly in the manufacturing and construction industries. Three local firms built additions to their plants and towards the close of the year two new firms commenced building operations in Peterborough. Summer hotels in the Kawartha and Muskoka Lake districts recruit a large percentage of their help in Peterborough, but this year there was a shortage of qualified applicants and it was impossible to fill all the orders of this type which were received.

A reduction in the number of building permits issued in Port Arthur, together with a lessening in the amount of railway construction and maintenance work as compared with 1928 resulted in the falling off in the number of placements made by the Port Arthur Office. The Superintendent reports, however, that there has been an increase in the number of employers using the Service and that the retail stores are calling more frequntly upon the local office for assistance in obtaining sales and office help. The following extracts from the report of the Superintendent furnish a fairly complete picture of employment conditions in this district during the past year.

> "The number of 'transfers in' is 449 more than last year which is accounted for by the heavy demand for men in the lumber camps of the Rainy River, Kenora and Sioux Lookout districts. Co-operation and assistance by other offices of this Service in filling orders for help not obtainable in this district have been much appreciated. In the early part of this year we did not anticipate the demand for pulpwood which occurred in August and September. During these two months contracts were let for almost 300,000 cords and with what has been added since will make an approximate total of 500,000 cords. This will be the largest cut of pulpwood ever taken out of this district and means employment for a very large number of men during the winter months. The railways are not buying ties very heavily this year and consequently only a few contracts have been issued. One local operator will take out about 400,000 of which one-half are already cut and in the water."

While a certain amount of mining is carried on both east and west of Port Arthur, the majority of workers are recruited from Winnipeg on account of transportation facilities but 103 placements were made in the industry, among this number being miners, drillers, muckers and carpenters. Two large paper mills called for many men for temporary work but the permanent staffs provided very few employment opportunities. The high freight rates on steel and iron make it difficult for the local shipbuilding companies to compete with eastern yards.

> "This situation has made it necessary for them to branch out in other industries to secure business and as a result the joiners' shop is doing a good business in shop-fittings, cabinet and sash-and-door work. The boiler shop is manufacturing steam tubular boilers and the machine shop is producing a fair amount of pulp and paper machinery the whole of which gives fairly steady employment to approximately 250 employees. Machinists, helpers, drillers, electric welders, carpenters and labourers have been placed through this office."

The supply of manual labour for railway construction and miners exceeded the demand and there was, consequently, a smaller lumber turnover than usual. The reduced wheat crop in Western Canada resulted in a falling off in the number of men employed at the elevators and there was a noticeable absence of night work.

A shortage of qualified household workers is reported by the Superintendent —the office made 90 placements of women during the year.

Building construction was the outstanding feature in the employment situation in St. Catharines. The new hotel was constructed while one of the older hotels was remodelled. Other construction projects included a new Sanitarium, a store and additions to six factories. During the first eight months of the fiscal year manufacturing was particularly active and there was a shortage of skilled mechanics and tool makers. In July the automobile accessory plants commenced to reduce their staffs and their numbers of working hours. A large rubber company employing 400 hands closed down and many of the former employees found it necessary to leave the district in order to obtain work.

Reporting on the construction of the new Welland Canal the Superintendent writes as below:—

> "The Welland Ship Canal has reached the stage where large numbers of employees are no longer required. The dry dock at Port Weller is finished and several firms have completed or nearly completed their contracts. The reduction of workers on the Canal has resulted in increasing the number of unskilled and semi-skilled work seekers in this district. A large number of the unskilled are foreigners. It is expected that the Canal will be partly opened in 1930 and fully opened in 1931."

The dry weather was responsible for a noticeable reduction in the demand for agricultural labour. The cereal crop was ten per cent. below normal, with the exception of fall wheat, grapes were one-third below the normal production while there was a decrease of approximately the same amount in the peach crop. The cancellation of harvest excursions made available large numbers of men who otherwise might have gone to Western Canada and farmers had no difficulty in securing their help, in most instances.

The St. Catharines office placed 1,296 women in employment during the year. Of this number 569 were placed in domestic employment, either in homes or in institutions. There were 307 placements made in local factories and 279 were placed in clerical and sales positions. This represents an increase of approximately 25 per cent. over the preceding year. The total placements of men and women, 5,139, represent an increase of 23 per cent. over the business of the office during the year 1928.

The Sault Ste. Marie office of the Employment Service supplies large numbers of men each year to the lumber camps in the district. Several companies now depend entirely upon the local office for the men required for their operations and the Clearance System is extensively employed in recruiting the yearly supply of bush labour. Great activity was apparent towards the close of the fiscal year 1929 and the placements were approximately double those of last year. Mining is not actively carried on in the Sault Ste. Marie area on a large scale but a sufficient amount of development work is underway to furnish occasional orders for muckers and surface workers. It is hoped that the iron ore industry may develop as a result of the promised bonus of one cent per unit, equivalent to approximately seventy-five cents per ton. The development of the hematite deposits would be the means of opening up employment for hundreds of men in the Sault Ste. Marie district. The Algoma Steel Company, which is engaged in the manufacture of steel rails, ingots, structural shapes, etc., has had one of the best years since the war, operating on double shifts until just prior to the conclusion of the fiscal year. At that time one of the mills closed down to make way for the erection of a new $2,000,000.00 plant thereby doubling its present output. As in Timmins the stabilization of newsprint prices has been reflected in an increased demand for men for pulpwood cutting. The local pulp and paper mills have been running steadily throughout the summer with one exception. Building construction has been exceptionally active and it was necessary to employ the Clearance System in order to obtain building tradesmen from Toronto, Hamilton and Galt. Twenty-five per cent. of the men engaged in higher construction work were recruited through the Employment Office, the balance being hired direct by the Company engaged in this work. The widening and grading of the roads and the replacement of bridges and culverts have given the Sault Ste. Marie district roads which compare favourably with the best gravel roads in Southern Ontario. An increase is noted in the number of railway construction and maintenance workers placed on the C. P. R. and Algoma Central lines but marine transportation showed fewer placements than last year.

An increase of approximately ten per cent. in the business of the St. Thomas Office is reported by the Superintendent, 2,706 placments being made as compared with 2,480. On account of the drought the demand for farm help was lower than usual but 430 farm placements were made. There were 497 women referred to positions by the St. Thomas office, the majority being in domestic employment. Railway maintenance, highway and building construction and casual work absorbed the 1,779 men who made up the balance of the St. Thomas placements.

Sarnia was another centre where the exceptionally dry summer of 1929 curtailed the demand for farm help. This was offset, however, to a certain extent by the activity in the sugar-beet fields and by the demand for experienced men for fall ploughing. Industrial conditions have been excellent in this district, the majority of firms making extensive additions to their staffs and maintaining a high production rate until the close of the fiscal year. A new industry in Sarnia and the additions made by the Imperial Oil plant point to improved employment opportunities for the coming fiscal year.

> "With the coming of spring building operations underwent a considerable boom. The completing of the Sarnia grain elevators, the new Roman Catholic Church, the extension to the General Hospital and the new buildings of the Sarnia Hardware Company, Dominion Stores, Calcut Electric and many other enterprises combined to make an exceptionally heavy demand for carpenters and building labourers. The Imperial Oil Company, with an extensive building program which included a number of storage tanks, absorbed a large number of rivetters, caulkers and steel workers. In many cases it was necessary to resort to the clearance system to recruit help, particularly in the case of carpenters, rivetters and caulkers. Splendid cooperation was received from the other offices. A number of men were placed on harbour dredging enterprises.
>
> After the opening of navigation on the Great Lakes many calls were received for sailors, firemen, etc., but a decided slump in shipping was experienced during the summer and late fall causing placements in this group to fall below those of other years. The slow movement of grain during the season due to lack of storage facilities caused many steamers to tie up for the season more than a month in advance of the usual time. It is the first time in the history of the grain trade that such conditions have prevailed at this port. These conditions naturally affected stevedore work. The number of men placed with the Tree Line Navigation and Northern Navigation Freight sheds was, accordingly, far below normal."

Commenting upon employment conditions in the Sudbury district the Superintendent writes as follows:—

> "In reviewing the industrial conditions which have prevailed in the zone covered by the Sudbury Office of the Employment Service of Canada for the period November 1st, 1928 to October 31st, 1929, we find it very gratifying to report a marked improvement over the year preceding in the volume of employment for workers. During the past year 7,672 vacancies were listed in this office and 6,738 placements were made, out of 7,110 applicants registered here for work. This shows an increase over the previous year's business.
>
> The three major occupations in this zone are listed below in the order of their magnitude and the demand usually made on the labour market: railroads, lumbering and mining. This year mining has been displaced in the Sudbury office by the construction and building group. This has been a banner year for construction in Sudbury and all indications point to the next year being equal if not better, due partly to The International Nickle Company's big development and building program which will be carried on all through the year 1930 and probably into 1931 from present indications. The population of Sudbury has increased about 40 per cent. during the past year and this congestion will only be relieved by the building of more houses during the next twelve months, although over four hundred new houses were built this year and a large number are now under construction. Relations between employers and employees have been good; no strikes were reported

in this zone. Wages remained at the same level as the year previous although at times there was a serious shortage of certain classes of workmen, mostly in the building trades."

Lumbering is one of the principle industries in the district served by the Timmins office. It is interesting to note that some of the lumber camps engaged simultaneously in cutting jack pine in the manufacturing of lumber and spruce for the manufacture of paper. When the camps are opened in the fall of the year the local supply of labour is quite insufficient to meet the demand and the clearance system is actively employed as may be seen from the fact that 895 men were transferred into the Timmins district for the lumber camps during the month of September, 1929. The total number of transfers in during the year has been slightly over 1,400. The paper mills at Iroquois Falls and Smooth Rock Falls have been working at full capacity and have kept their staffs steadily employed. There have been comparatively few replacements as the workers are principally skilled men who stay on their job from one year to another. In the opinion of the Superintendent, the mining industry has reached its peak in the immediate vicinity of the town and little expansion can be expected. In some instances a number of skilled and unskilled workers have been laid off and have gone to the mining camps where there is greater activity. A fire which destroyed the mill of the Dome Mines resulted in the laying off of the mill workers temporarily. The general belief that the mines will not expand has been reflected in a falling off in building operations, and there was, consequently, little demand for building tradesmen.

The Superintendent of the Men's Division of the Toronto Office reports in part as follows:—

"In the Men's Division of the Toronto Office from November 1st, 1928 to June 15th, 1929, approximately, placements were away ahead of the corresponding period of last year, when the first crop reports began to filter through. The automobile trade was crippled by an increasing flood of auto cancellations which led to a decided stagnation in the automobile and allied trades, with the resultant laying off of thousands of men and creating a real unemployment problem. The rubber trade became very quiet in August because of the reasons given above, and this caused a laying off for periods of anywhere from two weeks to two months of at least four thousand workers. There has been an intensive British immigration directed at Toronto which has brought to the city several hundred unskilled workers, a great many of whom have not been absorbed in industry. There has also been quite a number of skilled workers, tradesmen, and office and technical types, most of whom have been absorbed successfully and are making good. In addition to these the intensive farm schemes for the purpose of bringing agricultural workers to Canada have fallen down due to various things. In the first place, the men selected were city dwellers, quite a proportion middle aged and hard to change in their ways, and a considerable number of them married. These men were brought out, the single men at $10.00 a month, and the married men at $20.00 a month. They were under no contract from the farmer with whom they were engaging and they found the life very lonesome. The pay for the married men was totally inadequate, particularly if they left a family in the mother country. The only remedy for the situation is to procure from the farmers a one-year or a two-year contract, so that when these men decide to leave the farm they will have a stake, and have a chance to look around for a suitable job instead of facing the winter in Toronto with forty or fifty dollars in their pocket, up against strenuous competition with thousands of unskilled workers and liable to become recipients of charity, which is demoralizing for the men concerned as well as aggravating a serious unemployment situation in the cities each winter.

This Office is doing business with about fifty per cent. more firms than formerly and an increasing number of employers have visited us in order to get in direct touch with the Employment Service. As Superintendent, I have been visiting quite a number of firms in company with the scout of each district, in order to acquaint myself with the operations performed and to study the various processes, thereby getting a better idea of the types of men required by these factories and industries. We are being called on each week more and more for skilled clerical, technical and mechanical workers and the Employment Service is becoming recognized as a place where one can get special types of men rather than as a labour bureau.

The registrations for the past year totalled 14,016, 3,034 of whom were immigrants registering for the first time, the majority being only a few months in Canada, which makes an increase of 1,328 over last year. A fact worthy of special note was the large number of applicants who, after being in the West for a short time, drifted into this city looking for work. This does not apply solely to farm hands but to skilled tradesmen as well. Referring to various nationalities of those registering as immigrants, next to the British, Germans again take the lead, the other nationalities following in pretty much the same ratio as last year.

In the Men's Industrial Section, labouring jobs for the most part have been of a casual nature, the drop in placements being largely due to the fact that the Toronto Transportation Commission and the Consumers' Gas Company did not have the expansion programme of last year and that several large building structures for which this office supplied a great deal of the labour had been completed. Placements were made in all sections of the building trades with the exception of marble cutters and tile setters and at times first class carpenters and painters were very hard to get. In the metal trades assemblers, auto mechanics, blacksmiths, boiler makers, electricians, fitters, grinders, machinists, machine operators, millwrights, pipe fitters and tool makers have all had another successful year in spite of trade depression. Not many calls have been received in the textile and clothing group nor in the leather and rubber goods. Wood machinists, wood pattern makers and cabinet makers have been successfully placed from time to time and one rather rare order was filled for a wood carver. During the summer, deck hands, sailors, marine firemen and oilers have been placed while considerable orders for boat cooks were received. Some of the other lines which we have managed to fill have been for soap makers and butter makers, and one order was received for a scientific instrument maker. Snow shovelling cards issued during the year numbered 1,951, or 677 fewer than last year.

The Professional and Business Section shows continued progress for the year, with an increase of nearly 300 placements. Registrations have been extremely heavy and the men placed of an exceptionally high type. Among the notable placements have been a structural engineer for a kodak company at $2,600 per annum, a mechanical draftsman for an aluminumware firm at $175 per month, a time study man for a fibre board firm at $3,600 per annum and a mechanical draftsman for a motor company at $180 per month. During May and June there was a brisk demand for junior clerks at wages ranging from $12.50 to $25.00 per week, while bookkeepers and accountants have been placed at salaries ranging from $18.00 to $45.00 per week. The placement of technical men has been outstanding in every way and an outlet has been formed for junior technical men which is worthy of special mention. The series of circular letters and letters on particular men have benefited this section more than any other branch of the Service, as well as the work of answering advertisements which has had a favourable effect. The telephone is quite an asset in this Section and we find that an increasing amount of business is being done by enquiries to different firms and this applies particularly when we have men with special qualifications to place in jobs. This Section is looking forward to doing bigger and better business during the coming year. Tests are being carried out with applicants in order to eliminate those who have no particular qualifications for this Section and who are in reality unskilled workers. This is in line with a suggestion in last year's report.

The Boys' Section shows an increase of more than 500 placements over the preceding year and is recognized by employers as one of the outstanding sections of the Employment Service. All industrial lines have been very active until lately. Trades are quiet at the present time but are showing signs of improvement. There has been a great demand for farm boys, but these are not always available, while boys of the messenger type are always in demand. We have had the active co-operation of the Big Brother Movement, the Division of Social Welfare, the Beaver Boys' Club, Y. M. C. A. clubs, etc., and are looking forward to increased co-operation with the Junior Vocational School, Board of Education, Lions, Kiwanis, Rotarians and other organizations which are interested in work among boys. We have been able to secure through the Civic Department of Health the free examination of any boy who shows signs of a definite mental condition, in order to obtain a correct diagnosis of the condition, and expert medical advice as to how to deal with the boy in question.

The Central Ontario Clearance Section shows an increase of 96 transfers out and 13 transfers in over the preceding year. The manufacturing group has been fairly active, but less so than in previous years. The automobile trade has been decidedly quiet since June but is now showing signs of increased activity and we are receiving orders for tool room and machine shop work in preparation for their spring output in domestic lines, with later on some export work. The allied industries are also rather quiet. Other industries have been quite normal, with a fair demand for skilled tradesmen. Construction work throughout the Province has been very active with plenty of workers to meet the demand, although all vacancies have not been filled when received by this office owing to the fact that transportation has not been paid or advanced when requested. Northern Ontario has this year had an extensive building programme and has taken a number of workers from Toronto who, had these conditions not existed, would have caused a surplus of labour in the City. In the domestic and personal group we have had a very successful year and all demands for workers have been filled with satisfaction to both employers and employees. In this connection we have been very fortunate in securing good types of help for the employers concerned.

While the Farm Section shows a decrease in placements over the preceding year, there was a good demand for farm hands and many of the orders received during July and August could not be filled owing to the shortage of men willing to take this class of work. This was overcome to a great extent through no harvesters being taken to the West, as men who would have gone West stayed on their jobs, making fewer gaps to fill. The demand for peach pickers this year was very slow owing to the crop being a failure. Apple pickers were not much called for. An order was placed for 25 men for harvesting celery at $2.00 per day and board. This is the first order of its kind received by this Section, and while the work lasted only three weeks we hope to get similar orders from this source. All experienced farm hands applying for work can be quite easily placed, but there are men applying who have no experience and who will not accept inexperienced men's wages.

A review of the work of the Out-of-Town Unskilled Section for the fiscal year shows a decrease of 264 placements over the preceding year, made up largely of bushmen. On account of there being no harvesters' excursion, the men who generally go harvesting went into the lumber camps direct. Any lumber company that placed an order for bushmen had their requirements filled by a very good class of men and this in the face of some of the companies not advancing the fares to the men. The location of the office for this Section of our work is altogether too far from the station. If an office near Front and York Streets could be obtained, it would be more satisfactory, as most of the shipping is done after 7.30 at night and with the office so far away there is no convenience for handling the men and their baggage as there was in the Front Street Office, when they could bring their baggage in any time during the day and then report at the office in the evening before train time. It is also evident that contractors and lumbermen arrive at the station and upon learning that the Government Employment Office is located at such a distance, have not bothered to come to the office and have got their men from other sources.

In the Handicap Section of the Toronto Office 3,820 placements were made, of which 1,000 were of a regular nature and 2,820 for casual work. This total shows an increase of approximately 11 per cent. as compared with last year and 89 per cent. of the men placed were disabled ex-service men. This section obtained 634 regular and 75 casual orders which required men having qualifications not possessed by applicants available in the Section and were therefore transferred to other Sections of the Employment Office to be dealt with. There were altogether 804 new applicants. Medical cases continue to constitute the greater number of these, chief among which, are those suffering from chest, lung and heart disabilities. This is obviously due to the progressive nature of such ailments. A considerable increase is noted in neurological cases, many of whom have been unable to withstand the strain of competetive industry. Nearly 10 per cent. registered directly or indirectly as a result of old age, being prematurely aged, due, in all probability, to their war services.

Despite the volume of placements made by the Handicap Section during the fiscal year just closed, the difficulties met with in placing "problem cases" suffering from psycho-neurosis, neurasthenia, epilepsy and other forms of nervous disorders still remain. Many of these ex-service men receive no pension and therefore are not covered by any existing legislation pertaining to ex-service men. Many others are unable to withstand the strain of even the lightest form of employment for more than a few hours per day. The general situation with regard to the above mentioned types of problem cases would be considerably eased, were the facilities of the Vetcraft Shops extended and other forms of sheltered employment created.

Since July of 1928, the Handicap Section has submitted 287 problem cases selected from the disabled applicants to the Industrial Problem Board, which meets weekly at Christie Street Hospital and consists of representatives from the Toronto Employment Office and the Department of Pensions and National Health. Recommendations for disposal were made by this Department in each case, with the result that several problem cases have been removed from the labour market. Many of these applicants are now employed in the Vetcraft Shops, others have been admitted to the Veterans' Welfare Ward in the Hospital, while others have been admitted to hospitals and institutions for treatment and care.

The appreciation of this Section is again expressed to the medical and neurological clinics at the Toronto General Hospital for their splendid cooperation in furnishing reports when requested concerning the employability of applicants considered ineligible for the services maintained by the Department of Pensions and National Health.

The following cases are quoted as examples of the placement work done by the Section:—

No. 2199. This applicant was employed as a truck driver prior to the war, and was discharged from the army in 1919 suffering from otitis media. He returned to his pre-war occupation, but was obliged to discontinue same after many attempts as a result of attacks of dizziness, due to his ear disability. He was referred to the Handicap Section for registration and was tried out in a temporary capacity in order to determine his adaptability, after which he was placed with a local pencil manufacturing concern eleven months ago, where he has been employed in the warehouse ever since. He is 33 years of age and supports a wife and four children.

No. 396. This applicant is 41 years of age and supports a wife and three children. He was employed as a machine shop helper prior to the war and was discharged from the army in 1919 suffering from kidney trouble which caused fainting spells sufficient to prevent his return to his pre-disability occupation in the machine shop. A medical examination was arranged to determine the definite extent of his disability, also the nature of work which would not be liable to aggravate his condition, after which he was placed in the warehouse of a local departmental store in June, where he is still employed and making good.

No. 796. This applicant is 48 years of age and supports a wife and one child. Prior to 1914 he served in the Imperial Army, and served with the C.E.F. during the late war, after which he was discharged suffering from a chest disability also the loss of the right eye. Prior to registering in the Handicap Section he had endeavoured to re-establish himself but had been obliged to discontinue a number of jobs on account of his chest disability being aggravated. He was placed as an assistant groundsman with a local public utility in April where he is still employed and reports that he is considerably improved in health.

No. 1405. This applicant is a married man, 41 years of age, and was discharged from the army in 1919 suffering from a heart disability. He was employed as a farm hand prior to the war, and endeavoured to carry on subsequent to his discharge from the army. He is very easily fatigued and was advised by his doctor to discontinue farming. He was tried out in several temporary capacities and was finally placed in April as an "improver" with a local pen manufacturing concern, where he is still employed and making good.
No. 1304. This applicant is 42 years of age and supports a wife and child. He was employed as a labourer prior to the war, where he suffered the amputation of the left leg above the knee. He was placed as elevator operator in a large office building in May and is still employed there."

The following extracts from the Superintendent's report of the work of the Women's Division of the Toronto Office outline their activities for the year:—

"In the Clerical Section of the Women's Division of the Toronto Office a slight increase for the year can be reported in the number of applicants applying, vacancies listed and placements made. Among the applicants were 137 new arrivals from the Old Country. One of the new arrivals was placed in Coleman, Alberta, as a stenoghrapher. This may be classed as the most unusual placement of the year. A greater activity was noticeable during April and May than during the same period last year, otherwise the general trend was the same throughout the year. It is remarkable that so few of the vacancies could be considered outstanding. We had less than 25 positions offering $25.00 a week or more and no position at a higher wage than $30.00 a week.

In the Industrial Section the vacancies and placements for the first eight months of the year showed a splendid increase. However, during the last four months there was a decided dropping off. It would seem as though the depression attendant upon the poor crops, decreased automobile sales, etc., is reflected in all branches of industry. The new arrivals totalled 186 and those who were experienced textile, shoe or rubber workers were eventually absorbed in industry. The unskilled only added to the surplus already existing.

In reviewing the accomplishments of the Houseworkers' Section a great deal of pride and satisfaction resulted, as it has been a year of increased patronage, the orders being over 2,000 more than those of the previous year. It truly is only a staff trained to lend a sympathetic ear and a patient hearing to the employers' problems that could cope with the acute shortage of experienced cooks-general. In May the orders reached the high peak of 1,850, this being the season of the year when the majority of the applicants are thinking only of openings in clubs, camps and hotels. The housewife was driven to distraction in her effort to try and secure help. The Employment Service being the recognized aid, our calls incoming and outgoing were averaging around 8,000 a month. There were 2,488 immigrants registered for work in this Section which was 750 more than the previous year and 458 more than any year since immigration started. Had it not been for these immigrants there would have been little or no solution for the housewife's problem. We took 197 orders for domestics on farms but were able to fill only 65 of these. Very few new arrivals would consider farm work and it was usually the woman with one or two children who asked for farm work.

Though the results in the Casual Section did not surpass those of last year, it can be said that great activity prevailed during the whole year and there were occasions when the demand could not be met. The chief difficulty that confronted this office was in trying to place the middle-aged one-time good worker or in trying to aid the physically unfit. The decided line the employer is drawing between the young and the older worker is becoming more noticeable. During the close of the year a few applicants reported themselves in need of fuel, food and clothing. However, on investigation some of these cases it was found they had overstressed their need.

To sum up the activities of the Women's Division during the past fiscal year in concrete form is almost an impossibility, owing to the very broad field covered. However, the year has been an outstanding one in as much as there were some very satisfactory positions found for the experienced applicants in the various classes of work and the following figures indicate the general increase: —

Applicants	35,949	Increase over 1928	2,761
Vacancies	28,744	" " "	1,991
Placements	19,791	" " "	1,217

The fact that the Clerical and Industrial Sections showed an increase of 137 placements may be considered satisfactory and might have been better had it not been for the industrial depression during the last few months of the year. The 2,488 domestic immigrants from the Old Country were largely responsible for the increase of 1,142 placements in the Houseworkers' Section. However, the immigrants little more than equaled the increase in orders which was 2,135 over the previous year. The gradual increase in all Sections during the spring which reached its height in May was due to the activity in clerical and industrial work and to the tremendous demand for houseworkers. Although our vacancies decreased during the summer months, the applicants did not, and they have increased steadily during the last two months. We have reported from week to week the number registering from outside points and believe this is partly responsible for the increase."

The Superintendent of the Windsor Office reports on work in that district as follows:—

"Industrial conditions for the months of November and December of the past fiscal year were only fair. In January, the automobile industries began to improve and steadily increased their production. Many orders for highly skilled mechanics were received from practically all the automobile concerns in this district. Unfortunately, these desirable conditions lasted only until the beginning of April when there was a decided slump which has continued up to the end of the year.

Building and construction work was very active and many large projects such as the Detroit-Windsor Tunnel, Ambassador Bridge, Canada Building, Kennedy Collegiate and addition to Northern-Palmer Hotel are well under way. Owing to the great influx of building mechanics and labourers, there has been no scarcity of help locally during the past year. Building permits issued by the Building Inspectors of the five Border Municipalities for the ten months of this year have an aggregate value of $8,545,022.00 and are practically equal to the total for the entire twelve months of last year, which was $8,639,605.00. Because of the decided slump in building trades in Detroit during the late summer, many bricklayers who were working in Detroit and residing in Windsor were thrown out of employment. Twenty-five union bricklayers were transferred to Sudbury and North Bay Districts.

On account of the low prices obtained for last year's tobacco crops, less tobacco was planted this year in this section of the country; therefore, the demand for farm help was not so acute as in previous years. No difficulty was experienced in filling orders at any period of the year. With the exception of a few women, there was no demand for help from any of the canning factories in this district. This was due to a large influx of labour from all parts of the world, and the canning factories were besieged by men seeking work. Approximately one hundred experienced bushmen were transferred to the various lumber companies in Sudbury, North Bay, Iroquois Falls and Kapuskasing, paying their own fare. This number could have been considerably increased if transportation had been advanced, as many applicants were desirous of going to the lumber camps but did not have the necessary means of transportation.

Owing to the business depression, especially in the automobile industries, which has existed for the past seven or eight months in this district, opportunities of employment for women have not been so good as last year when many applicants found work in offices, stores and factories. There was an increase in the demand for cooks-general, housemaids, hotel and institutional workers, but a slight decrease in the wage offered for this class of work. More applicants were seeking day work and the majority of them were married.

Industrial conditions at the present time, October 31, 1929, are in a critical condition and many men are idle in this district. The municipal authorities of Windsor contemplate considerable relief work for bona fide residents of the city, which will relieve the situation somewhat."

Private Employment Agencies

When the public employment service was organized in Ontario in the fall of 1916 there were 99 private employment agencies in the Province. At the present time this number has been reduced to fourteen located in the following cities and towns:

Fort William, 1; Kirkland, 1; North Bay, 2; Ottawa, 2; Toronto, 5; Sudbury, 3. These private agencies are licensed under the Ontario Employment Agencies Act and are under the supervision of the Department of Labour.

Below will be found a table of placements reported by private employment agents, arranged by localities:

Place	Men	Women	Total
Toronto	12,555	4,018	16,573
Ottawa	1,353	....	1,353
North Bay	7,039	....	7,039
Sudbury	13,991	339	14,330
Fort William	2,411	....	2,411
Kirkland Lake	75	5	80
Total Placements	37424	4362	41,786

Steam Boiler Branch

Chief Inspector: D. M. Medcalf.

Inspectors: Henry Brown, T. J. Main, J. R. Dey, E. T. Urquhart, J. M. Kelly, N. S. Smith, A. W. Hunter, J. N. Briggs, J. A. MacKenzie, John Stevenson.

Office: Parliament Buildings, Toronto.

The following is a summary of the work performed:—

Class "C" certificates (heating boilers, low pressure)	766
Class "D" certificates (new pressure vessels, accepted by affidavit)	1,111
Class "E" certificates (new boilers accepted by affidavit)	181
Duplicate certificates	59

The total amount of monies transmitted to the Treasurer of Ontario was $25,167.15 as compared with $22,152.90 for the fiscal year, 1928. This year shows a continued increase in the work of the Steam Boiler Branch, especially in the number of pressure vessels constructed from designs approved in this office, namely 831 as compared with 582 for the previous year, resulting in a greater number of designs being submitted for approval and registration. The total number of certificates issued for pressure vessels and boilers constructed for installation in Ontario also exceeded that for last year.

Board of Examiners of Stationary and Hoisting Engineers

Chairman: J. M. Brown.
Members: W. J. Scott.
S. G. Rose.
Inspector: E. J. Everett.

Office: Parliament Buildings, Toronto.

In the interest of protection of life and property and the development of efficient operators, the Board of Examiners registers all steam plants and engineers in the Province, sets and conducts examinations for engineers and issues certificates of competency. That the employers, engineers and the general public recognize the necessity of such control and approve of the method of administration of the Act is evidenced by the increasing co-operation and support accorded by all classes. This continued feeling of confidence in the Board which is being displayed by both engineers and plant owners in Ontario is indeed gratifying. In response the Board desires to state that its watchword is "Progress by education" based on an unswerving policy of fair play and it will persevere in its efforts of trying to assist impartially and conscientiously employee and employer alike.

The Board has issued a booklet entitled "Why Certificates for Stationary and Hoisting Engineers?" which answers the question very fully and which will be mailed along with a copy of the Act and Regulations to any one on request. Stationary engineers' certificates in Ontario are divided into four grades, presenting to the operator a four-rung ladder of success and an incentive to obtain a higher degree of efficiency. The employer understands that the higher the grade of certificate granted by the Board to the engineer the greater is the knowledge demanded and he is thus guided in the selection of an applicant for a position in his power plant. A survey of the inspector's reports during the year indicates the harmonious relationship between the Board and the plant owners of Ontario as outlined in the foregoing. Direct violations of the Act show a marked decrease each succeeding year.

Factory Inspection Branch

Chief Inspector: James T. Burke

Office: Parliament Buildings, Toronto

In submitting the forty-third annual report of the Factory Inspection Branch of the Province of Ontario it is gratifying to report that industrial activity during 1929 surpassed that of any year since 1920. There was scarcely any industry in which plant equipment was not in operation at a high percentage of capacity and the interesting question is whether the general demand will justify further expansion of this equipment.

Employees in the factories, mercantile establishments and office buildings inspected numbered 319,646 as compared with 313,595 in 1928 and manufacturers consistently reported a better situation. According to the records of the Dominion Bureau of statistics "employment in iron and steel, pulp and paper, food, electrical apparatus, building materials, non-ferrous metal, lumber, textiles and other factories showed decided improvement over the preceding year. The general advance in iron and steel products is particularly significant in view of the dullness of recent months in the automobile trades which are largely centred in the Province of Ontario. Nearly all divisions of the iron and steel industry showed expansion during 1929."

During the year the staff of the Factory Inspection Branch was required to cope with new problems brought about by changes in fashions and habits of the people which are constantly disturbing industry, causing curtailment in some branches and expansion in others. The increase in the demand for ready-made clothing has left its mark on small tailoring and dressmaking establishments, the lack of trimming on women's hats has cut down work among milliners, while the use of artificial silk for stockings and other articles of raiment has opened up large plants for spinning and treatment of the material. Bedsteads which used to be made of metal are now made of wood; on the other hand, casements which used to be made of wood are now to a large extent made of metal, and such materials as bakelite are displacing other materials in the manufacture of a variety of articles. Hundreds of uses are developing for asbestos. It is manufactured into cloth worn by attendants of smelting and blast furnaces to ward off the intense heat, or into paper or felt for saving property from destruction by fire, guarding against undue loss of heat, or as a protection against acids in plants where dangerous chemicals are employed. In the form of slates or shingles it is used as roofing for buildings. Locomotives are mattressed with it to keep the heat confined and also to keep the temperature of the cab cooler in hot weather. Asbestos occupies a strange place in the world of nature for it seems to be both mineral and vegetable. It is both crystalline and fibrous in its formation and scientists say it cannot decay even when subjected to additional uses such as covering electric service wires, steam boilers and steam pipes, packing for cold insulation brine and ammonia pipes in refrigerating plants, automobile brakes, bearings, rope, twine and cord.

Injuries often result from breathing dust while grinding or handling metallic substances and also from breathing in quarry and pottery dust. The damage from the dust lies in the specks. Those that are large are usually screened out by the hairs of the nose before they reach the lungs, or they may so irritate the throat that they are sneezed out. The superfine dust more readily reaches the lungs. The first indications of danger from dust are bronchitis, etc. Sometimes poisoning occurs from dust that carries a poison with it. Often the poison is not actually taken into the lungs but is removed by the upper respiratory tract and swallowed so that it is later absorbed by the intestines and enters the system that way.

Lead poisoning may occur either from dust or the vapor of metallic lead and is often found among those employed in smelting, paint manufacturing and soldering. Wool sorters' disease is an affection among those who sort over wool or hair, the infection being breathed in with the dust. The first symptoms are chills then pain in the back and legs, fever, severe pain in the chest, coughing and prostration. It is therefore essential that such dust should be removed by mechanical means and that operators should wear some suitable respirators.

Non-fatal accidents reported show an increase of 1,274 and fatal accidents an increase of 28 over 1928. It is claimed that ninety-five per cent. of all accidents in factories and workshops can be placed in two categories; those caused by a lack of proper safeguards and good housekeeping and those caused by inattention on the part of the worker. It is estimated that hundreds of accidents occur to workers tending machines whose minds are probably centered on illness at home or some other uneasiness of mind that causes unhappiness. But even those accidents can be almost eliminated if employers would put into operation all the known devices for making a machine reasonably safe. If we take the cotton industry as an example there is ample evidence to prove the truth of the contention that the majority of accidents are avoidable.

The first process in cotton is the cleaning. The matted cotton is carried by a lattice feed to small diameter feed rollers which hold it while a part of the machine known as the beater tears the cotton apart in small tufts, the heavier foreign matter dropping through a grid below the beater. This beater in its time has claimed a great toll of fingers, hands, and arms of even the most experienced operators. If the machine is not running smoothly, the worker may open the glass door known as the desk plate door, to find the cause of obstruction. He has moved the driving belt to the loose pulley in order to bring the machine to a standstill, but rather than wait until the speed of the machine has exhausted itself he will thrust in his hand to find the obstruction and thus come in contact with the knife that slices off the cotton. There are several safety devices invented which would make accidents at a beater almost impossible, one in particular that prevents the door over the dirt grid being opened while the beater is in operation and the beater being started until the door and cover are shut and locked. There is danger also when the cotton leaves the beater and passes to the lap roller. Frequently the hand stays too long between the roller and lap and both hand and arm are wrapped around the roller. This danger may be averted by the use of safety devices. The cording machine which completes the operation has also been the cause of many severe accidents. The wire teeth on the cylinder will not let go their grip once they have taken hold, and many hands and arms have been caught when operators try to remove all foreign matter without taking the precaution of stopping the machine. A safety device can prevent this by making it impossible to insert a hand while the machine is in motion.

The volume of work accomplished by the Factory Inspector Branch is indicated in the following tables:

	Year 1928	Year 1929
Total inspections and visits	18,565	17,944
1st inspections	12,416	11,905
2nd inspections or revisits	6,149	6,039

In addition to these are investigations of accidents and complaints, also inspection of buildings on grounds during the Canadian National Exhibition and the Ottawa Exhibition, and delivery of 544 contract clothing permits under section 52.

There were also the usual special visits, office calls and conferences incidental to inspection.

Employees in above industries, mercantile establishments and office buildings numbered 319,646.

Year	Males over 16	Males 14-16	Females over 18	Females over 14-18	Children under 14 dismissed	Total
1928	226,331	556	81,737	4971	24	313,595
1929	240,173	653	75,557	3263	50	319,646

Hours of Labour

	Males					Females				
	45	50	54	58	60	45	50	54	58	60
1929	88,855	59,918	40,338	5,719	25,946	43,176	18,118	7,567	916	3,931

Also 25,162 employees, male and female, working approximately 50 hours per week.

Orders issued relating to the various requirements of the Act totalled 6,839 as compared with 6,691 in the year 1928.

Permits

Applications for permits, overtime and others, numbered 1496, and were issued as follows:

Year	Section 33	Bakeshop Section 71	Fruit Camps Section 38	Sale of Bread manufactured out of Province, Sec. 70	Contract workers Section 52	Total
1928	697	7	30	....	510 (cancelled) 26	1244
1929	773	117	23	50	533 (cancelled) 11	1496

COMPLAINTS

One hundred and twenty complaints were received during the year. Upon investigation 58 were upheld, 43 not upheld, 17 are pending investigation and 20 do not come withing the jurisdiction of this Branch. Some investigations cover more than one complaint. Subjects of complaint are:

Year	Heat	Elevators	Fire Protection	Child Labour	Lavatories	Sanitation	Boilers	Guards	Ventilation, Dust, Fumes, etc.	Overtime	Hours of Labour	Light	Mechanical Exhaust	Sunday work in Bakeshops	Miscellaneous	Violation of Stationary and Hoisting Engineers Act	Violation of Minimum Wage Act	Violation of Adolescent School Attendance Act	Not under our Jurisdiction	Total
1928	4	4	8	5	16	3	12	2	7	9	23	1	3	2	9	7	5	3	1	124
1929	8	5	3	4	10	6	5	....	11	15	36	...	2	..	5	5	1	2	2	120

VIOLATIONS

Violations of acts in the enforcements of which the inspectors have a responsibility were submitted as follows:

Of the Stationary and Hoisting Engineers Act	35
Of the Steam Boiler Act	14
Of the Adolescent School Attendance Act	45
Of the Minimum Wage Act	1,183

PROSECUTIONS

Proceedings were taken against two firms for violation of the Factory, Shop and Office Buildings Act; one under Section 33 for working overtime without a permit, and the other under Section 25a for employing a boy under 14 years of age. In each case a fine of ten dollars and costs was imposed.

ACCIDENTS

Seven thousand and eighty three accidents were reported during the year 1929, 63 of which were fatal, as compared with 5,809 reported in 1928, with 35 fatal.

Fatalities were due to:

Burns and scalds	6	Gears, cogs and sprockets	1
Cranes and derricks	3	Belts, pulleys, and shafting	5
Elevators	4	Saws	2
Electricity	3	Conveyors	1
Engines and cars	1	Hammers	1
Explosions	6	Paper machinery	1
Falling substances	9	Winders	1
Falls	10	Trucking	1
Flying missiles	2	Industrial poisoning	1
Infected wounds	2	Suffocation	3

J. H. AINSBOROUGH

During the year just closed many new factories and additions to factories have been built. The plans were first submitted to the Factory Inspection Branch for approval so that fire exits, heating, lighting, sanitation and ventilation were carefully considered. All canning factories in this district were visited at least twice during the season and many recommendations made and carried out. Bakeshops on the whole were kept in a clean and sanitary condition but occasionally an order had to be given for the painting of walls and ceilings and repairing floors, also screens and windows. Very little trouble has been experienced in attending to the enforcement of the Minimum Wage Act and the Adolescent School Attendance Act. The inspection of boilers and pressure vessels has received careful attention and, where no inspections had been made in accordance with the Act, instructions were given and usually carried out in a satisfactory manner. Considerable attention has been given to the guarding of various kinds of machinery and elevators were carefully inspected as to gates, interlocks, cables and safety devices, necessitating recommendations being made to provide for new gates and cables and in one case an entire new elevator had to be installed. Many of the accidents were investigated and found to be caused by irregularities such as poor housekeeping and supervision when machinery was in motion and other miscellaneous hazards.

R. ALBROUGH

In making a summary of the work for the year in the northern part of the Province it is a satisfaction to report a steady improvement, both in the safeguarding of dangerous machinery and better lighting and sanitary conditions. More interest is being taken in the welfare of employees; a number of the large firms provide a first-aid room with a graduate nurse in charge and cafeterias where food is served at cost. One of the firms now has in use a club house on a very elaborate scale including picture show, library and reading room, gymnasium, shower baths, billiard tables and bowling alleys. I had the pleasure of spending an evening in one of these clubs and found it well attended, keen interest was being taken in the games, the picture show was well filled and in the reading room were real comfort and quiet. All this going on under the one roof, it seemed just like one large, happy family.

There has been a slight improvement in the pulp and paper industry during the year, although all the mills have been working on reduced production. The fullest co-operation has been received from the management of these plants, all recommendations have been promptly carried out and the work done has been of a permanent nature. Conditions in these plants can only be reported as good. The lumber industry was decidedly more active this year than it was last year; more mills were in operation with a larger season's cut. The conditions in most saw mills are different from other permanent industries. The life of a saw mill in one locality depends on the amount of timber that can be brought to the mill without too great a cost, consequently the mills have to move from time to time adjacent to the timber and under these conditions no expense except what is absolutely necessary is expended on the construction of the mill. The work in a saw mill is of a hazardous nature and requires careful inspection in the interest of safety; one never finds two mills alike so the work of inspection never loses its interest. In nearly every case the employer was willing to provide suitable guards and very often I managed to have work completed before leaving.

No boiler explosions occurred in the district. The increasing numbers of pressure vessels put into use each year are taken care of by the boiler insurance companies or are annually inspected by the district inspector of the Steam Boiler Branch, Department of Labour, and certified engineers holding current certificates. The same can be said about elevators; no serious accidents have been reported, the elevator users are now getting accustomed to the interlocking devices and speak very favourably of them. In a number of cases locks have been found out of order, needing minor adjustment; the elevator operator had become so accustomed to closing the gates before trying to start the elevator that he did not know the gate lock was out of order. A great improvement in the compliance with the Stationary and Hoisting Engineers Act has been noticed in the past few years. It is gratifying to note that in the most remote places engineers with current certificates of the required grade are in charge of the steam plant. During the whole year only one complaint of a man operating a steam hoist without a certificate was received and after an interview with the management this case was put right.

Child labour in this district is practically non-existant. In a few cases boys between the ages of fourteen and sixteen were employed during school hours without a permit from the school board, and these cases were duly reported to the proper authorities. Minimum Wage Orders were kept posted for the most part and cases of negligence were reported to the Minimum Wage Board for action.

T. B. Angrove

The job of factory inspection is a very interesting one and carries with it a weight of responsibility which must be fully realized in order to fulfill the obligation which the factory inspector has entrusted to him. It has been found to be good practice to withhold sending in a report to the Chief Inspector where a promise has been made to remedy a condition and the employer desired to have this done and in every instance upon making a return visit in a week or two the management points with satisfaction to the improvements made. This practice does away with a lot of office work, both for the Chief Inspector and the owner of the works and a feeling of goodwill and co-operation exists thereafter. This procedure is only carried out of course when the factory inspector is engaged in that particular district for a few weeks. One finds in the main a desire on the part of the employer to assist the inspector in carrying out the requirements of the Factory, Shop and Office Building Act but in some cases it has been necessary to use pressure to compel compliance. Many recommendations have been made for the placing of proper guards on machinery for the protection of life and limb of the employees and also to maintain continuity of output, which is always affected by accidents and these have been complied with in almost every instance in this district. The proper lighting of factory buildings is sometimes neglected especially so in the older factories and it has been found necessary at times to call the attention of the superintendent of the plant to this matter. After the requirements have been complied with, which consisted of having the windows cleaned and artificial light placed in some dark places where employees were liable to stumble and fall. upon the return visit of the inspector the managers have at times expressed their thanks for the advice given which has been to the mutual benefit of the employer and employee.

Spraying machines have come into almost general use in factories requiring a paint finish on their products and in the old factories often makeshift arrangements have been made in installing this type of varnish and lacquer process so that the health and safety of employees have been jeopardized. This condition has required some attention, but is being adjusted gradually by the installation of proper cabinets with exhaust fans and fire proof enclosures and the operators being supplied with artificial respirators. The enforcement of the Steam Boiler Act in this district is a job which requires considerable time and travel, embracing as it does seven counties in which are located approximately three hundred and fifty cheese factories and portable saw mills. Most of the portable saw mills are in remote parts of the territory and of itinerary habits, but on account of the hazard attached to the operation of steam boilers no effort has been spared to ferret out and acquaint the owners of these plants with the regulations and the penalities provided under the Act for non-compliance and the requirements have been met in almost every instance. Elevators and hoists are also receiving attention and because of the severity of the injuries usually associated with elevator accidents the responsibility on the inspector is onerous. The Stationary and Hoisting Engineers Act is also being enforced especially so with road building outfits and saw mills. Speaking generally conditions for the safety and health of employees in this district are fair at the present time. It is to be regretted, however, that, notwithstanding the vigilance of the safety first committees and the efforts of the different inspectors, accidents continue to occur and some fatalities have resulted.

H. Bourne

During the major part of the year considerable activity was experienced in the metal trades, steel malleable, grey iron and bronze and aluminum castings being in fair demand. The automobile industry has been a very important factor and has contributed considerably to the tonnage. In a number of foundries where the work is classed as repetition work, a complete change over in the method of producing castings has been made. This equipment, involving a large expenditure of money and entirely changing the general conditions of the shops, requires special attention in the way of safeguarding, improving ventilation and in a general way providing for the sanitation and health of employees and as sandslingers, conveyors and continuous pouring devices are quite in evidence in a number of the shops, it has opened up a new field for the inspector. While taking up this work I have received co-operation from the foundrymen and an honest effort is being made to free the shops from gases, fumes and dust which under the new system are much greater than under the old one. The greater number of these firms have stocked a safety shoe for foundry work so that the employees are able to purchase a good boot before handling metal. Also leggings are provided which guard against leg and foot burns and in several shops it is mandatory for all men handling metal, and also chippers, to wear goggles for the protection of the eye from flying metal and such are provided by the employer. Where these conditions are taken care of, eye injuries and burns are practically eliminated. While considerable time and expense on the part of the employer are involved along these lines, nevertheless, it has proved a short road to economy and much pain and suffering are avoided and loss of time by employees is forestalled. The provision of safeguarding against accidents and providing proper ventilation, sanitation and the keeping of the shop at a proper temperature does not apply alone to any particular type of shop but should have the same consideration in all, for the best results are always obtained where these conditions exist.

During this year visits have been made to all plants under my jurisdiction and matters have been taken up and adjusted to the satisfaction of the employer and employee. Eye protection in its many different phases has received every attention along with provisions which tend to preserve the health of the employee. Owing to the excessive strain that lifting tackle is subject to at times in general foundry use all electric and other cranes require constant checking up. Limit stop switches on hoisting blocks should always be kept in good order for a defective limit stop is more hazardous than none at all. When gear turning ladles do not work without lurching they should be ordered to the machine shop as soon as the defect is observed. Good housekeeping along with plenty of good light, preferably natural light, does much to prevent accidents. Gangways should be wide enough to permit the conveying of metal without interference and passageways between molds should be wide enough to allow plenty of space to pour into molds and should be kept free from any object which might cause tripping. All floor surface should be kept free from water or excessive dampness and all molding pits should be properly drained or other provision made to keep the ground along the walls and bottom of mold free from any moisture. Attention has also been given to the Stationary and Hoisting Engineers Act and the Minimum Wage Act and these have been found to be well observed by the employers.

W.T. E. Brennagh

During the past year there has existed in this district an increased activity, effecting all manufacturing establishments and other places coming within the scope of the Factory, Shop and Office Building Act. In other words, business has been good with more persons employed, more new plants in operation, and many additions to existing industries, which is generally considered proof of stabilized conditions in industry. Consequently the activities of the factory inspector have increased, his visits and revisits to large and small plants have become more frequent and where green help has been employed more time is spent along the lines of educational work, which in reality is the prerequisite of factory inspection. All factories inspected have shown improvements in this regard and there has been found a desire to co-operate with the inspector for the betterment of working conditions. Where this co-operation exists, courtesy is extended at all times and an interest shown in the recommendations made and in compliance with their requirements. It is nevertheless true that more accidents have occurred than in the previous year, due possibly to the increase in production and employment, together with the fact that many industries are now reporting their accidents, who failed to do so in the past except in cases where the accident to the employee was of a very serious nature.

Many plans of new buildings and renovation of existing plants have been examined for approval and file, the necessary changes and corrections being made so as to conform with the Act, and a permit granted to commence operations. Sanitation as applied to shops still receives much attention and many installations of sanitary equipment have been effected by the plumber as a result of close inspection in this respect. Boiler inspection is more of a problem in small plants in the outlying parts of the district and strange as it may seem, many of these owners require to be notified personally each year to apply the annual boiler test and forward the report of inspection. The majority of boilers in use carry insurance and with such there is no difficulty as the companies take all responsibility and forward reports of all inspections. The attention given to the enforcement of the Stationary and Hoisting Engineers Act has at all times met with success and few complaints were registered. The man with the qualifications is the man who is now wanted to take charge of a steam boiler, where general care and efficiency in operation are required.

The Adolescent School Attendance Act is giving little or no trouble. Apparently many employers prefer to employ only those who have reached the age of 16 years and are therefore not required to procure the permit necessary under this age. Complaints re the Minimum Wage Act have been few. Schedules as to the rates of pay, etc., are posted conspicuously in all industries within the Act, also in shops and restaurants. Several complaints have been received as to hours of female labour in restaurants, cafes and ice-cream parlors. This applies principally to the lateness of the hour. The situation in this respect seems difficult to control and a fitting regulation to govern this matter appears necessary, in fact would be appreciated by the females whose calling requires them to work all or a part of the night. More overtime permits have been issued in this district than in previous years to allow of the employment of females in excess of the 10 hour day. At certain seasons of the year, increased production is required and extra hours are necessary in order to meet the exigency of the trade.

Henry A. Clark

Speaking generally, my duties during the past year have been attended with success and the prospects for further progress in the future are encouraging. The inspection, covering as it does many sections, has been of much benefit to both employers and employees. The modern manufacturer is always glad to receive suggestions that will improve conditions or secure the safety of the workmen in his employ. In the case of wood-working machinery, such as jointers, shapers, saws, etc., guards should form part of the machine, as it is not complete without them. In every case where the machines are in use notice has been given to have guards provided. A very dangerous system that prevails in a great many wood-working factories is that the large belts have no shifters provided for shifting the belt from loose to tight pulley, and vice versa, the operator being obliged to take a stick and pry over the belt every time the machine is started or stopped. In all cases employers have been notified to provide proper belt shifters. Many accidents occur through the operating of drop presses, as the working of these is largely at the will of the operator. In every engine room visited where no guard rail existed around driving belt, fly wheel and piston rod, instructions have been issued to have one placed there, as this is considered a dangerous condition. Gibheaded keys and projecting set screws are also dangerous, especially when they are on the outer length of shafting or in places where people are continually passing. These must be guarded or replaced by flush heads.

Factory inspection has for its primary object the fullest possible protection of the lives and the health of working people. The more complete and thorough the system of protection against every possible form of accident, the more conscientious and unremitting the effort to secure safe, sanitary and healthful conditions in our factories, workshops and other places of employment, the more nearly does the inspector measure up to the true standard of his calling. Perhaps in no single feature of the inspection system has there been greater progress made or more real good accomplished, than in the providing of adequate and dependable means of escape in case of fire. The growing tendency towards great combinations of capital in the various forms of financial and industrial activity has resulted in the erection of larger manufacturing plants and the employment of larger bodies of working people therein, accompanied by the greatly enhanced danger of panic and congestion of exits in case of fire. For this reason, and because of the increased height of average buildings of the present, the necessity for a sufficient number of fireproof stairways is no longer a matter of conjecture but is an universally accepted fact. So true is this, that the architect of to-day considers, not the number, but the location and kind required to afford adequate protection. In fact, the incident expense is no longer regarded as of first consideration, this item alone amounting, in some cases to thousands of dollars.

J. P. Ferguson

During the period from the time of my appointment as a factory inspector to the end of the fiscal year 630 inspections were made of the various factories, shop and office buildings. Many recommendations were made re repairs to elevator gates, inter-locks, fire escapes, guarding of gears, wheels and other safety devices to be used on the various types of machines, together with sanitary conditions, inspection of boilers and other pressure vessels. Most of them have now been carried out showing in many instances the willingness of the employer to co-operate with the inspector in improving conditions for the safety and welfare of the employees. There is still an occasional employer who tries in every possible way to evade any recommendation made by the inspector until pressure has to be applied for the enforcement of the Act and this type of employer is difficult to understand. Most of the accidents reported were of a non-fatal character and in many instances might have been avoided by giving a little more thought and attention to safety methods. Considerable attention has been given to the processes of eliminating dust, fumes and other deleterious matter harmful to the employees in miscellaneous industries by introducing modern mechanical suction systems. A number of overtime permits were issued to firms employing female labour and some firms have been working shorter hours. Considering the situation as a whole, trade in this district is in a fair condition.

W. S. Forster

A few new factories have sprung up in this district during the year, some flourishing concerns have made requests for occasional overtime permits and several textile mills have ceased operation due to various causes. Several minor accidents and others of a more serious nature have occurred as it is impossible to guard against every case of personal carelessness. Installation of new and second-hand machinery between inspections often results in inefficient protection. Guards removed from machinery during repairs despite repeated warnings are sometimes left unnoticed when the machinery is reinstalled and such negligence often proves hazardous. Considering the inaccessibility of cheese factories tucked away as they are in all corners of the territory, yet of the utmost importance as an item in the rounds of the inspector, it is small wonder that the owners are negligent in submitting their boiler inspection reports annually until prompted to do so. This negligence, however, is more procrastination than a desire to evade the law and this year the number of delinquents has been reduced to approximately two per cent. of what it was at one time. In the same class, but even greater problems with their irregular working periods, are the saw-mills. Here, however, there is more dangerous machinery in operation and therefore added precautions are necessary. But as a result of the same perseverance these establishments may be said to compare very favourably with the cheese factories. Here at the border line between the two provinces a singular situation develops of Quebec bakers delivering in Ontario bread baked in Quebec where the bake-shops do not come under our jurisdiction. The proprietors in some instances need persuasion to enable them to grasp our standards but in no case was it necessary to withhold the permit supplied by the Department of Labour to enable them to deliver their wares in Ontario.

Mrs. E. Gurnett

Regular inspections of all industries in this district have been made during the past year. Some places require several visits where recommendations had been made and were not attended to at once. Several infractions of the Factory Act were found. A night visit to one factory was made and about thirty female employees were found working in one department where no less than two Factory Card Abstracts were displayed. The new foreman disclaimed all knowledge of the statute regulating the hours of female workers. He was sure that it was just an occasional night up to 8.30 that it had occurred. A careful investigation of the time cards from July back to January showed that thirty nights had been worked in the various departments without an overtime permit. It was a case of new superintendents and foremen who had not acquainted themselves with the Factory Act. On previous inspections this plant had been found to be satisfactory but it demonstrates the need for the inspector being constantly on the alert. Upwards of a hundred home permits were delivered personally and the usual complaints of meagre pay for the work were made. It was found that lingerie factories were sending out work to be embroidered and smocked, also that some weaving plants were sending out bolts of cloth to have repairs made. Orders of the Minimum Wage Board were found to be prominently displayed in practically all industries. Some complaints were received of women in small shops and receiving depots being paid less than the minimum wage. These were reported at once and adjustments were made. Each year shows a decrease in the number of adolescents employed in cities. Employers are reluctant to let the boys or girls off for the whole day or the two half days that they must attend school. An adolescent girl living in Toronto was reported to be working in a bakery outside the city. When a visit was made to the bakery the girl claimed she owned the business, hired her bakers and was doing very well and held that as she was an employer and not an employee she did not need a permit. Of course in the end this was a matter for the attendance officer in her school district but it was a new angle of the Adolescent School Attendance Act.

Several new factory buildings were erected in Toronto last year and others are in course of construction, which means continued improvement in working conditions. Machinery is well guarded in all plants. Few females, if any, are engaged in hazardous occupations and this in a large measure accounts for there being no fatal accidents in this district to any girls or women. Fire escapes and passages leading to them are always carefully inspected. Large oil containers, garbage cans, and even tool boxes have been found on the escapes. Men say it is a handy place to put them and keep them out of the factory. One man built a large merchandise rack across the fire escape window; it was taken down before the inspection was finished.

In June the Association of Government Officials in Industry held their Convention in Toronto. Among the delegates were such outstanding women as Miss Mary Anderson, Director of the Women's Bureau of the United States Department of Labor, her assistant Miss Agnes L. Peterson; Miss Maud Swett of Wisconsin, President of the Association, Miss Ethel Johnson, Assistant Commissioner of Labour in Massachusetts, and others equally prominent in the work. It was most interesting and stimulating to come in contact with women whose work is for women in industry and get first hand knowledge of the particular work they are doing. On several occasions many of them expressed admiration for the very progressive laws in Ontario affecting women workers. They were deeply impressed not only with the splendid legislation but with the able manner in which the various Acts are administered, especially the Factory, Shop and Office Building Act, Minimum Wage Act and the Workmen's Compensation Act. Some declared themselves envious of the great strides made in Ontario in social legislation. Many of us are too apt to think that the United States leads in all such matters and it is very gratifying to hear that in some things we are in advance.

Miss N. Hamilton

It is gratifying to report that conditions as to the health and comfort of female employees are steadily improving in this district. During the year 1,300 inspections have been made. A number of factories and shops have been inspected twice as change of seasonal operations makes this necessary, as well as the checking up on the carrying out of the recommendations. Business conditions have been very good during the year and most of the factories running full time. However, towards the end of the year business engaged in the making and handling of goods classed as luxuries has slowed up some, due no doubt to the unsettled condition of the financial market. Several branch or chain stores have been opened and in inspecting these stores it has been a real pleasure to note the good equipment in the way of comfort and convenience made for the female employees. The managements of these large business concerns seem to realize the importance of the comfort and health of their employees and the financial return to their business for time, thought and money spent for their benefit. It is the small and older places of business that need looking after more, as in many of these concerns the management does not keep step with the times and seems unable to visualize the benefit of the modern improvement in the way of safety and comfort.

It is a pleasure to report no serious accidents to female employees in this district although there have been some minor injuries. In making investigations of such accidents it was found that most if not all of these accidents occurred where the employee was being paid on a piece work basis. Although the system of remuneration to employees is not within our jurisdiction so long as the required minimum wage is paid, where employees are paid by piece work. I advise them to exercise care and not hurry too much in order to increase their earnings a little more at the expense of danger to life and limb. Loss of property by fire has been very light in this district and there has been no injury from fire to any female employee. Close inspection and strict enforcement of regulations against fire hazards are given on all inspections. I had the privilege of attending the Twelfth Annual Industrial Safety Convention which was held at Syracuse, New York, at which much useful information was obtained in the practical uses of safety devices and very valuable suggestions given for the prevention of accidents to employees. Conventions of this nature are of great benefit to inspectors in assisting them to carry out their work and to accomplish the best results.

Mrs. G. E. Hornell

This year compares more favourably with my previous one regarding the building of new factories and extending improvements to old ones. Ventilation, heating, and sanitary arrangements are fairly well taken care of in new factories and lighting is much improved in a number of old factories, the individual light being replaced by powerful overhead lighting, which overcomes the darkened aisles so noticeable when the light is concentrated on just the feeding part of a machine. Increased numbers of overtime permits have been issued in emergency cases and several firms have been able to overcome nightwork for females by increasing their eight or nine hour day to ten hours when it has been pointed out that they are within the law by so doing.

The Adolescent School Attendance Act is being generally well observed; occasionally a boy or girl when asked his age will be with in a month or two of 16 years of age and have left his certificate at his last place of employment and given his age 16 years to the present employer. Minimum Wage Board Orders are posted in most factories and shops. Careful attention has been given to the matter of having the approach to fire escapes and exits kept clear; an improvement in this regard is noticed. Accident prevention has received attention at all times. It is impossible to prevent all accidents, especially the falls which occur often during the rush to get in or out of the factory. Manufacturers have co-operated in spending time and money on suitable safety devices but the failure of a workman to follow safety precautions has resulted in accidents. The remedy lies in the education of the individual workman in safe practices.

Home work permits were issued in many outlying districts. Where the house was placarded for contagious disease the permit was withheld until such time as the quarantine was lifted. In most cases the homes inspected were in a clean condition.

S. J. Mallion

During the year there has been considerable activity in the building line, many splendid factories have been erected and fully equipped with all modern conveniences and the latest machinery and appliances. These factories are well lighted, heated and ventilated, thus providing good working conditions for the employees.

A number of factories were remodeled and enlarged in order to take care of increased business. Several large office buildings have been erected and are modern in every respect, the architecture being exceptionally good. The cost of these buildings ranged in price from $250,000 to $1,000,000 for each unit and they are from six to fourteen storeys in height.

The number of complaints received during the year was very small and all received careful consideration. Some were found to be of an imaginary nature while others were well founded and the necessary action was taken. All food producing factories including dairy plants, cheese factories, canning factories, bakeshops, biscuit and confectionery factories received special attention as food products should be manufactured under the best possible conditions. To give an idea of the clean condition of these factories; at the beginning of the tomato canning season, in going through a canning factory early one morning, I noticed floors clean, tables practically spotless and utensils clean and all in their places, everything appeared like good housekeeping and on remarking to the manager that I presumed he had not done any canning this season, he smiled and replied that he had had a very heavy run the day before and always made it a habit to thoroughly clean up after the day's run. It is a pleasure to report that the condition of the factory referred to can be found in all other food producing factories in the district. The managers of these plants are cognizant of the fact that in order to secure a fair share of the markets, their products must be manufactured under sanitary and clean conditions and by modern machinery and up to date equipment.

The inspection of steam boilers, hot water boilers, and pressure vessels has been fairly well observed throughout the district by those coming under Section 57 of the Act. The prevention of accidents has been given careful attention and the strictest care has been taken along the lines of guarding all dangerous machinery, stairways and elevators. It is quite apparent that the introduction of the mechanical interlocks has been a real safety first movement and a benefit to all concerned. There is no doubt but that many lives have been saved and the dangerous habit of jumping on and off moving elevators eliminated. The Minimum Wage Act, Adolescent School Attendance Act and Stationary and Hoisting Engineers Act also received careful attention during the year.

J. Monteith

With the exception of two fatal accidents which occurred in this district, conditions have been very satisfactory. The accidents referred to were kick backs from rip-saws and were preventable, especially in one case where a splitter and guard, installed on the factory inspector's recommendation, had not been replaced when the saws were set up again after the firm moved to new premises. The firm had also failed to notify the Factory Inspection Branch where they had moved as required by the Act. The jury at the inquest returned a verdict placing the blame on the firm. All industries in this district have been inspected once and in several cases two or more calls had to be made where the owners of plants were dilatory in putting into effect recommendations made. During the past year several hundred gas masks were installed in plants where ice machines were in operation and no accidents from ammonia have been reported as in previous years. Bake shops have been inspected and found in fair condition, a few had to do some house cleaning and whitewashing. Attention was also given to inspection of boilers, air-tanks, ice machines and the different pressure vessels that come under our Act and it was found that the Act is being pretty well observed.

So far as child labour is concerned only two cases came to my notice and were immediately rectified; the children were under 14 years of age. Most of the adolescents between the ages 14 and 16 years working in chair factories, knitting mills, and stove mills were found to have permits as required by the Act but a few had to obtain them after the inspector's visit. In most factories where female help is employed the minimum wage orders were found posted; in a few cases they were disfigurd and in one or two instances had been misplaced and new cards were obtained and posted. Some reports were received of violations where women were supposed to be working overtime without a permit and on Sundays. Information was received that one firm worked female employees after 9 p.m and on Sundays. This plant was kept under observation for several nights and on Sunday; no females were seen to enter or leave the plant on Sunday or after the authorized hour on week days; then the time cards and pay roll were checked and it was found that the information received was incorrect. Another case was investigated where women were reported to be working after 6.30 p.m. without a permit this information was correct, but it was found that it was done through ignorance of the Act.

Miss J. W. Ogilvie

The volume of building construction and the increase in employment bear testimony of a sound development which promises much in the way of progress. During my inspectorship great changes in the better provision for safety and health have taken place and the co-operation and good will among employers, employees and the inspectors have been assured. In many factories great interest has been taken in the work of first aid. Over one hundred workers joined classes organized by one manufacturer who is greatly interested in this work, with the result that more than seventy-five workers obtained certificates of merit issued by the St. John Ambulance Association. Prompt Action is often the means of saving a life and much suffering. Better attention has been given to the guarding of machinery in canning factories and of improving the working conditions for employees.

Mrs. E. Scott

General conditions in factories have shown an improvement. Business has increased steadily in almost every industry and this finds the employer more amenable to suggestions made by the inspector which entail the expenditure of money. Whether due to increase of business or to the fact that the employer is becoming more educated to inspection work and to realizing that better results are obtained when suggestions made by the inspector are carefully considered and carried out, whatever the cause, the result is happier. I have had only one prosecution in the past year which was for child labour in a factory during summer holiday time due supposedly to ignorance of the Act. There has been some trouble with too long hours for women, mostly in stores, and in each case after considerable time spent it has been adjusted out of the court. More over-time permits have been issued this year than ever before. The home permit question is becoming quite a problem. Previously it was just infants' wool garments that were made at home. Now more and more factories are employing home labour. There are several white wear factories sending out sewing to be done in homes and furriers are now employing women to line fur coats at home. It is an ideal arrangement of course from the employers' view-point as it is much cheaper labour and at the same time saves him factory space and the purchase of extra sewing machines. This increase in home permits requires a great deal more of the inspector's time. With the various types of work being sent into the home rapidly increasing in volume it will require very conscientious and efficient inspection of homes to arrest the spreading of any contagious diseases and to assure the carrying out of the spirit of this section of the Act.

H. Stevenson

During the past year all factories in the district have been inspected on one or more occasions and recommendations generally carried out by the management. Industrial conditions in some cities have not been so good as in the previous year, caused no doubt by adjustments in certain trades with the result that in some plants a certain number of employees have been laid off from time to time but as an off-set, in the Ashbridge's Bay section of Toronto there have been several large new industries started giving employment to several hundred employees. Among these plants are two large paperboard factories. The machinery in these plants is of a very dangerous character, but the managers in both cases have co-operated whole-heartedly with the inspector and the result is that these have been very efficiently guarded. There are also two large factories in which tar is largely used and two very large oil plants. These are also dangerous plants, and while everything possible is being done for the protection of the employees, yet serious accidents do occur. The rules for cleaning and repairing tar and oil stills carefully considered by the Factory Inspection Branch and the Dominion Tar and Chemical Company should be adopted on a large card and posted in all these plants. There are also several other large plants in this section of the district which covers several miles of territory with no means of getting employees down to their work except an old bus-line operated by the Toronto Transportation Commission, which does not take passengers one-half way round the district. This means of getting there is alright in fine weather even if slow, but in the bad weather of fall or winter it is not to be depended upon.

There are a large number of bakeshops in this district, a great many small ones and two or three of the largest in the Province. In the small bakeshops there is not much trouble in enforcing the Act but in the large ones where two or three shifts of bakers are employed the Sunday section is hard to enforce. The inspector is confronted with many individual opinions as to why the large bakeshops should be granted some special advantages over the small bakeshops, but the inspector cannot differentiate between those employed in small or large shops and therefore treats all as commercial undertakings. Considerable time and attention were given to the matter of checking up on boilers and pressure vessels. While there are not so many large steam plants as formerly there is a great increase in the number of garages and gas stations which have air compressors and apartment houses heated by steam-boilers and hot-water systems which come under the Act. In the case of apartment houses the caretaker must be found and then often the agent for the landlord must be consulted about the inspection. The Stationary and Hoisting Engineers Act is generally observed throughout the district with very little trouble. The Minimum Wage schedules are posted in nearly all factories where females are employed and very few cases of child labour have had to be dealt with.

J. PENDER WEST

Examiner of Reports and Designs.

The work which forms the subject of this report consists, as in previous years, of the examination of plans for new buildings to be used for factories, shops and office buildings and for alterations or additions to existing buildings to be used for those purposes.

The Factory, Shop and Office Building Act of the Province of Ontario provides that these plans shall be submitted in duplicate for approval before the work of erection is commenced. On receipt of the plans they are examined to ascertain whether the building, when completed, will fulfill the requirements of the Act, in so far as the safety and health of future employees is concerned. If found satisfactory in these respects, one copy is endorsed as "Approved" and returned to the sender, the duplicate set being retained and placed upon the files of the Branch. If changes are found to be necessary to secure compliance with the Act, these must be made before approval is given.

During the past year, the number of the plans submitted and the value of the buildings represented by these plans have been considerably in excess of any previous year. The estimated cost of the buildings for which plans have been approved has shown an extremely steady and satisfactory increase during the last six years as will be seen from a perusal of the following figures:—

	Estimated Value of Buildings		Percentage of Increase
1924	$ 8,250,000		......
1925	8,692,000		5.4
1926	16,321,000		87.6
1927	20,218,950		30.1
1928	32,614,300		61.3
1929	36,588,950		12.2
Total increase from 1924 to 1929:	$28,338,950	or	343 per cent.

The respective percentages of the estimated values for factories, shops and office buildings are about the same as last year, as are also the relative amounts estimated to be spent on new buildings and additions to old buildings.

Generally, the plans submitted have been extremely satisfactory and the number of cases in which serious changes have been necessary have been remarkably few. It is found, however, that when plans have been prepared outside the Province, a lack of familiarity with Provincial requirements has necessitated revision of the drawings more frequently than those which have been prepared by local architects and engineers. Especially has this been found to be the case in connection with stairways.

The proper planning of stairways is an important factor in a building, demanding the most careful consideration, as records show that a surprisingly large number of accidents occur through falls on stairs. "Winders" in stairs lead, almost invariably, to falls sooner or later, but although the use of them has been condemned by all competent authorities for many years, they still appear on plans of important buildings. The width of stairs is also a subject which should be carefully considered. It is generally recognized that a width of 22" is a proper width for each person passing up or down the stair and it should be planned in multiples of this width. Every person using it should be within reach of a handrail and where it is desired to make the stairway exceptionally wide extra handrails should be provided. Handrails should be of such size and shape as can be firmly grasped and should be continuous around landings. Steps in a stairway should not vary in width of treads or height of risers, should not exceed 15 in number in a single flight, nor be less than 4 in a flight. A landing of the same width as the stair should intervent between the top step and a doorway, and the lowest step should not project beyond the face of the newel or the end of the handrail, as the case may be. Stairs to be used for exits should be enclosed with fire-resisting walls and standard fire-doors and should lead direct to the outer air. The use of plank partitions for fire-resisting partitions is not commended unless they are protected by plaster on metal lathing on both sides, in which case the expense is sufficient to warrant the use of a more desirable material. Doors leading to a stairway should open in the direction of exit from the building and care should be taken that, in opening, they do not obstruct the stairs.

Another subject which frequently gives rise to criticism in plans submitted for approval is in connection with toilet accommodation. The Act specifically provides that approaches to toilets should be provided for the sexes. This must not be taken to mean only that separate entrances are to be provided, but that entrances must be so arranged that employees shall have access to their toilets without embarrassment from being in view of the other sex. The minimum dimensions of W. C. compartments should be 3 ft. in width and 5 ft. from back to front. Doors to compartments should not be made to open so as to obstruct passage ways and should, therefore, generally be made to open inwards.

H. A. Winnett

During the past year it has been possible to cover twice the greater part of the territory assigned to me. There is considerable improvement in working conditions over the previous year. In almost all instances, manufacturers, on having faulty conditions drawn to their attention, are anxious to have improvements made, although there is a small percentage still backward in this respect and it seems to be an impossibilty to get results without using compulsion. The rush that existed at the beginning of the year has died down considerably and at the present time the different factories are not so busy; some of them have closed down for certain periods. This applies altogether in the metal trades to which my inspections are confined.

The use of chrome for plating has become nearly universal. During the year there have been dozens of systems installed in the Province and in nearly every case they have been installed in accordance with the best known practice of the time. Where it has been otherwise the nature of the chrome asserted itself in such a manner that the employers have been glad to meet the requirements.

A. J. Wright

In submitting this brief report as inspector of factories and shops where plating, polishing, buffing and grinding is carried on, it is pleasing to note the improvement in conditions in regard to the health and safety of employees. During the past year a great number of inspections have been made and good results have been obtained in the factories visited. There have been considerable changes in systems already installed where the location of plating rooms and exhaust systems have been improved. Three complete new systems have been put in and a couple more are under way. The jobbing shops have recently been slack and business in general seems to be falling off at the present time. The automobile business seems to be partly accountable for this.

In regard to the new system of chromium plating which has come to the front in the last two years, there has not been much trouble during the past six months of men working at the trade having their health impaired owing to the systems of ventilation that have been adopted in many plants. The hazard in connection with chromium plating can be definitely controlled and practically eliminated by proper ventilation and sanitation and for securing such conditions the following notes are recommended as useful guides:—

(1) Natural ventilation is seldom, if ever, adequate to remove the chromium acid spray produced during the plating.

(2) Vertical ventilation such as is commonly used in chemical plants is ineffective because it draws the chromium acid spray up past the face of the operator who is working over the tanks.

(3) It is possible by a properly designed system of mechanical ventilation to reduce the contents of the acid spray to a minimum.

(4) Continuous daily exposure to the acid spray of chromium is likely to cause definite injury to the nasal tissues of the operator.

(5) The most efficient method of ventilation at the present time is to draw the air horizontally across the top of the plating tanks into ducts of from one to two inches wide and extending fully along one or more sides of tank.

(6) To be effective the duct should not be required to draw the air a lateral distance of more than eighteen inches.

(7) The level of the plating solution should be at least eight inches below top of tank and the duct should be at top of tank.

(8) For effective ventilation it is necessary to have an air velocity of 2,000 ft. per minute.

(9) Care should be taken to avoid obstruction to the air currents such as large projecting anodes or racks.

(10) The operators should guard against injury to the nasal tissues by applying to them several times daily a preparation recommended by a medical doctor.

(11) Rubber boots, gloves, and aprons should be used where practical to prevent contact of chronium acid with any abraded skin.

(12) If rubber gloves are not used the hands should be washed frequently with water and all cuts or abrasions covered with a mixture obtained from a medical doctor.

(13) All floors near plating tanks should be frequently washed down.

(14) Operators should have periodical medical examinations with prompt treatment of the slightest skin or nose affections.

District Inspectors

The following is a list of the factory inspectors of the Province, showing the district in which each is responsible for the proper observance of the factory regulations as set forth in *The Factory, Shop and Office Building Act*:

J. H. Ainsborough, *66 Pacific Ave., Toronto.*—Mr. Ainsborough's industrial district is the City of Toronto including Lansdowne Avenue, Bloor St., Dundas Highway, including Cooksville, C.P.R. and C.N.R. Railway, West, North and East, including Woodstock, Drumbo, Tavistock, Stratford, Millbank, Listowel, Gowanston and Harriston, Palgrave, and Greenriver, but includes East C.P.R. Lakeshore Railway and C.N.R., but excludes Bayside and Anson, but includes Prince Edward County and for Cheese Factory inspection purposes includes the South West portion of Northumberland and Peterborough County, South and West of C.N.R. between Peterborough Anson and Trenton.

R. Albrough, *25 Grosvenor Ave., Sault Ste. Marie.*—Mr. Albrough's district is West to Manitoba boundary line and East, including St. Joseph's, Cockburn, Manitoulin Islands, French River, North Bay to the Quebec boundary line.

T. B. Angrove, *294 Frontenac St., Kingston.*—Mr. Angrove's industrial district includes Brockville, County of Leeds and North, excluding Perth and Smith's Falls, but excludes Glen Tay to Sharbot Lake and North and West, including Calabogie, but excludes Renfrew, Eganville, Barry's Bay and Madawaska, but includes Wallace, Bancroft, Wilberforce, Mumford, Highland Grove, Baptiste, Coehill and Peterborough and South, including Campbellford, Anson, Belleville, Amherst, and Wolfe Island, but excludes Prince Edward County, but for Cheese Factory inspection includes the Counties of Northumberland, Peterborough, Hastings, Lennox, Addington, Frontenac, Leeds, Grenville, and Dundas, except that portion of Northumberland and Peterborough Counties South and West of the C.N.R. between Peterborough, Anson and Trenton.

H. Bourne, *11 Milverton Boulevard, Toronto.*—Mr. Bourne covers all districts in the Province of Ontario for the purpose of investigating foundries.

W. T. E. Brennagh, *59 Kensington Ave., S. Hamilton.*—Mr. Brennagh's district is G.T.R. main line West to London (exclusive) East to Niagara Falls; South and East of London and Port Stanley lines, North C.P.R. and G.T.R. to Bucke and Tavistock exclusive of Milton, Brancton and Ingersoll North.

H. A. Clark, *238 Dufferin St., Toronto.*—Mr. Clark's district is the City of Toronto both sides of Spadina Ave. and Road, Caldow to city limits on the North East of Lansdowne Ave. and Bloor St. intersection and South including Toronto Harbor, West including, Clappison Corners, Aldershot to Lake Ontario, but excludes South of the C.P.R. excepting Cooksville and Dundas Highway.

J. P. Ferguson, *370 Blackthorn Ave., Toronto.*—Mr. Ferguson's district is the City of Toronto, Yonge St., East side to the Don River including harbour and County of York east side (excluding Scarboro Jct. and Green River) to Lake Simcoe and highway on east side of Lake Simcoe exclusive of Atherley and west including C.N.R. Railway (Allandale Line) and Highway to Craigvale.

W. S. Forster, *336 McLeod St., Ottawa.*—Mr. Forster's industrial district is East and South of Maitland, St. Lawrence River and Quebec Boundary North and West including the County of Grenville, Smith's Falls, Glen Tay, Calabogie, Airy, but excludes North Bay and the T. and N. O. Railway, also C.N.R. Railway, transcontinental to Quebec Boundary line, but the Counties of Lanark, Carleton, Russell, Stormont, Prescott, Glengarry, and Renfrew are included for Cheese Factory Inspection.

Mrs. Elenor Gurnett, *102 Kingswood Road, Toronto.*—Mrs. Gurnett's district is West side of Yonge St., North to City limits and West, including Linwood, Tavistock, Eastwood, Nixon, Shakespeare, but excluding Port Dover Railway South Jarvis, Cayuga, Waterdown, Dundas and North, exclusive of Bolton and Fergus.

Miss Hamilton, *11 Osborne St., Ottawa.*—Miss Hamilton's district is Kingston, K. & P. Railway, North and East to the Quebec boundary line, and St. Lawrence River.

Mrs. G. E. Hornell, *Mimico P.O.*—Mrs. Hornell's district is South of G.T.R. and C.P.R. main lines to water front and East, including, Bathurst St. and West, South of C.P.R. to Cooksville and G.T.R. Dundas, Cayuga, Jarvis and Niagara Peninsula.

S. J. Mallion, *74 St. Vincent St., Stratford.*—Mr. Mallion's district is Fordwich, Gownstown, Stratford, St. Mary's, London, St. Thomas, and Port Stanley, South and West to border lines, including Ingersoll Junction on the C.P.R. and North including Teeswater, Kincardine, and Goderich.

J. Monteith, *Queen St., Humber Bay.*—Mr. Monteith's district is City of Toronto West side of Yonge St., including the water front and West excluding Spadina Ave. and Road, and North to city limits and East including Green River and North excluding Wallace, Bancroft, Airy, North Bay, French River and Caledon East, but includes Southampton, Harriston and the Bruce Peninsula.

Miss Ogilvie, *118 Centre Ave., St. Thomas.*—Miss Ogilvie's district is Port Dover, Simcoe, Woodstock, Tavistock, Gowanstown, Teeswater, West, South and North to Lakes Huron, Erie and River St. Clair.

Mrs. E. Scott, *127 Walmer Road, Toronto.*—Mrs. Scott's district is East side of Yonge St. and West and North of the K. and P. Railway excluding Pembroke, and Kingston, and North to Quebec and Manitoba boundary line, and West, including Bolton, Fergus, Caledon, East, excluding Linwood.

Hugh Stevenson, *22 Hambly Ave., Toronto.*—Mr. Stevenson's district is Toronto Harbor East of the Don River and C.P.R. Railway to Leaside Junction and City boundary line to Victoria Park Ave.

H. A. Winett, *75 William St., London.*—Mr. Winnett's district is the Province of Ontario except the City of Toronto for the purpose of investigating polishing, grinding and buffing plants.

A. J. Wright, *223 Garden Ave., Toronto.*—Mr. Wright's district includes the City of Toronto for the purpose of investigating polishing, grinding, and buffing plants.

Apprenticeship Branch

Inspector of Apprenticeship: A. W. Crawford

District Inspectors: George B. Evans, Fred J. Hawes, Walter Thorne, J. R. Johnson, Charles E. Needham

Office: Parliament Buildings, Toronto

In submitting the first report on the operation of the Apprenticeship Act, it is deemed advisable to review briefly conditions in the construction industry and to outline the purpose and scope of the legislation, which is the first of its kind in Canada.

The Need for Apprenticeship Legislation

For more than ten years, employers and representatives of organized labour in the building trades have been striving to devise better training methods for young workers. There has been an increasing shortage of skilled mechanics in certain trades and comparatively few of the Canadian boys who entered the building industry have received the training and instruction which developed allround proficiency and fitted them for advancement.

The development of concrete and steel construction, the use of substitutes for brick and plaster and the practice of manufacturing doors, stairs, and wood trim ready for installation, have enabled builders to get the work done with fewer men and to replace many mechanics by specialists or semi-skilled labourers. The work of carpenters is done to a considerable extent by mill workers, concrete form builders, floor layers, roofers, and other semi-skilled specialists who can be trained in much shorter time than it takes to produce a skilled carpenter. Under these conditions, the experience gained on the job by apprentices is limited and the chances of becoming skilled mechanics are greatly reduced.

Modern developments have brought about great and lasting changes in the nature and requirements of the building trades but they have not eliminated the need for mechanics. It is the worker with broad experience and general proficiency who secures steady employment and promotion. He is as good as the specialist in any branch of the trade and can be used in many places and under conditions, where the specialist is no better than a labourer. The need for skilled mechanics is recognized but the means by which they are to be produced is not so evident. A new system of training must be developed if young Canadians are to become the builders of the future and the construction industry is to prosper.

It was early recognized by those interested in the development of better training methods that the new system must be placed under government supervision and be linked up with vocational or technical education, if it is to be effective. The unselfish efforts of the comparatively few employers who have conscientiously tried to provide adequate training for the young workers in their employ, have served to demonstrate the need for a provincial system of apprenticeship under which all employers who use the services of minors in a skilled trade must undertake to teach the trade and provide continuous employment. Legislation was needed to impose uniform conditions and regulations in each trade throughout the province. Compulsory schooling was required to supplement the training and instruction received on the job.

Constant pressure was brought to bear on the Government of Ontario in an effort to secure the necessary legislation and government supervision for such a scheme. Deputations which met the Prime Minister were informed that the Government was willing to give assistance, provided both employers and employees in the trades affected were willing to accept their responsibilities and it could be shown that the demand for such assistance was widespread.

In order to get the work started, a voluntary organization known as the Construction Apprenticeship Council of Ontario was formed in 1927. This body consisted of four representatives of employers, four from organized labour, and one from the Provincial Department of Education. It undertook to devise and operate an apprenticeship system for carpenters and bricklayers. Regulations were adopted and apprentices were indentured in Hamilton and Toronto. Local joint trade apprenticeship committees were organized for each trade and an advisory secretary was appointed to promote and supervise the training of apprentices.

The work of the Council demonstrated the sincerity of both parties and the scheme of training proved to be acceptable. In cooperation with the Deputy Minister of Labour, a bill was drafted for submission to the Legislature, and the Apprenticeship Act, which is modelled after the South African legislation, became law on April 3rd, 1928.

Provision of the Apprenticeship Act

The Act is in the form of enabling legislation. It makes provision for the necessary government assistance and supervision but does not set up a rigid system of training. The details of organization are determined by regulations adopted by the Lieutenant-Governor-in-Council on the advice of the Provincial Apprenticeship Committee and local trade committees. The Provincial Committee, which is appointed annually by the Government, consists of a chairman, four representatives of employers, four from organized labour, and one from the Provincial Department of Education. It has taken over the work of the Construction Apprenticeship Council and the Regulations which have been adopted under the Act are based upon those drafted by the Council. The Advisory Secretary of the Council has been replaced by the Inspector of Apprenticeship, who is assisted by district inspectors appointed in the larger centres throughout the province.

Under the provisions of the Apprenticeship Act, every minor employed in a designated trade for a longer period than three months must be identured, and the conditions and requirements of apprenticeship are set forth in Regulations passed by Order-in-Council. These have the force of law and are easily amended. The contract of apprenticeship must be registered in the office of the Inspector. The penalty for violation of the Act or Regulations is a fine of from ten to one hundred dollars. At present the Act applies to only nine designated trades in the building industry, but provision is made for including other trades and industries either by petitions from employers or as a result of investigation ordered by the Minister.

PROVINCIAL COMMITTEE

Steps were taken to put the Act into operation immediately after it received the Royal Assent. The Inspector was appointed on June 1st., 1928. The Provincial Apprenticeship Committee commenced its activities on June 16th., 1929, and held seventeen meetings during the period ended October 31st. 1929. The Committee is composed of the following members:

CHAIRMAN

JAMES M. PIGOTT
Pigott Construction Company, Hamilton.

REPRESENTATIVES OF EMPLOYERS

J. B. CARSWELL
Burlington Steel Company, Hamilton.

HARRY JENNINGS
General Contractor, Toronto.

H. J. MERO
Trussed Concrete Steel Company, Limited, Walkerville.

GEORGE OAKLEY
George Oakley and Son Limited, Toronto.

REPRESENTATIVES OF EMPLOYERS

JOHN W. BRUCE
General Organizer, United Association of Plumbers
and Steamfitters of America, Toronto.

ERNEST INGLES
Vice-President. International Brotherhood of
Electrical Workers, London.

WM. JENOVES
Chairman, Provincial Council, International Brotherhood of Bricklayers,
Stonemasons and Plasters, Toronto.

J. F. MARSH
General Representative, United Brotherhood of Carpenters
and Joiners of America, Toronto.

REPRESENTATIVE OF PROVINCIAL
DEPARTMENT OF EDUCATION

F. S. RUTHERFORD
Assistant Director of Technical Education, Toronto.

On December first four District Inspectors of Apprenticeship were appointed to organize the work in the larger centres throughout the Province, and to cooperate with local advisory committees in carrying out the provisions of the Act and Regulations. An additional inspector was appointed on May 1st., 1929.

ACTIVITIES OF THE BRANCH

The activity of the Apprenticeship Branch during the past year has been concentrated on a survey of the building trades for the purpose of discovering and securing the registration of all minors employed in designated trades. More than 7,500 employers in the building trades throughout the Province have been informed of the requirements of the law and requested to submit information regarding minors in their employ. Questionnaires were returned by over 6,500 employers showing that approximately 2,000 minors were employed by 630 firms, but less than half of these minors were regarded as apprentices. On October 31st., 1929, 1,078 apprentices had been indentured and registered, of whom 31 completed their apprenticeship period during the year, and 19 had their contracts cancelled for various reasons. The survey is not yet completed and many minors are still employed in contravention of the Act. Pressure will have to be brought to bear on employers who fail to register minors and it may be necessary to impose a number of fines before all minors employed in designated trades have been placed under contract. The Inspector has visited the larger centres throughout the Province, and addressed employers' organizations, unions, educational associations, service clubs and public meetings, in an effort to acquaint people with the work being done. Printed booklets containing the Act and Regulations have been freely distributed, and requests for information have been received from thousands of individuals and organizations throughout the Dominion, also from various parts of the British Empire and the United States of America.

REGULATIONS

Regulations have been drafted by the Provincial Apprenticeship Committee in cooperation with local trade committees and these were approved by Order-in-Council on June 28th., 1929. They are divided into two parts,—general and trade. General regulations set forth the obligations of apprentices and employers, the entrance requirements, hours of employment, minimum wages, provisions for school training and examinations, method of supervision, etc. Trade regulations cover the number of apprentices to be trained, and the term of apprenticeship for each designated trade.

An earnest effort has been made to secure regulations which will protect the interests of apprentices, employers, and organized labour, but it is realized that amendments will have to be made from time to time as apprenticeship develops in each trade and that Regulations cannot be put into full operation within a year or two. The development of new methods of training, involving close cooperation between employers and employees, is a slow process which even the force of law cannot make effective until at least a majority of the individuals on both sides appreciate the benefits to be derived and are willing to devote time and money to this important work.

Newspapers and trade journals have given considerable publicity to the Act but many people are still ignorant of the requirements and provisions of the law There appears to be an increasing tendency on the part of some employers and employees to leave the work in the hands of government officials. Many persons believe that the government has taken over the organization and control of apprenticeship and that industry is being forced to accept regulations and restrictions which are imposed by law. Such persons fail to realize that the purpose of the legislation is to assist industry in developing new training methods and that the Act was passed at the request of representatives of the building industry.

The Act applies only to trades in which representative bodies of employers and employees have requested such legislation. No new trades will be added until, by petition and investigation, it has been shown that there is a need for organized apprenticeship in the trade affected and that the majority of employers and workers desire government assistance as provided under the Act. Existing regulations, which may appear to impose hardship on certain persons, have been drafted by representatives of both employers and employees and may be amended at any time on the request of local committees representing the trade or trades concerned.

SOME PROBLEMS OF APPRENTICESHIP

The problems of apprenticeship are many and will not be solved within a year or two. Close cooperation between employers and employees is essential to the success of the organization being built up under the Apprenticeship Act. Joint committees can function only where both sides are willing and anxious to promote the welfare of apprentices even to the extent of sacrificing some of the powers and privileges which they have claimed in the past. It is very gratifying to report that the trade unions and employers' organizations are cooperating in this manner and that each month brings new developments and fresh evidence of increasing interest and activity in various parts of the Province.

One of the immediate problems to be solved is the securing of constant employment for apprentices. In the large cities this may be accomplished by placing apprentices in school, on pay, during slack periods in the winter and transferring them to other employers during short periods of idleness in the summer months. In small centres, however, the problem is much more difficult and no solution has yet been found. Employers may be compelled to pay the wages of apprentices during the full year but practical training can only be given when work is available either on the job, or in centralized classes to which apprentices in small centres may be sent.

Another problem, which has not yet been given serious consideration, is the definition of designated trades. At present there are indentured apprentices in the same trade whose training and experience are so different that it is hard to realize that they are working toward the same end. Some are receiving a broad general training while others are being taught only one specialized branch of the trade. In the smaller centres one finds apprentices employed at work which belongs to two or three of the designatd trades. These boys cannot learn any one trade thoroughly but local requirements demand that they have some knowledge of each related trade, such as bricklaying and masonry, plumbing and steamfitting, plumbing and sheetmetal work, and, in a few cases, plumbing, steamfitting, sheetmetal work, and electric installation. Evidently, if the diploma granted at the completion of the apprenticeship period is to mean anything, some provision will have to be made for designating trades in a manner which will indicate what work the graduate is qualified to perform.

The plumbing and steamfitting trades are overcrowded with boys, many of whom can never become competent mechanics. It will be some time before the situation in these trades can be abjusted to conform with existing regulations. A similar situation exists in the electric installation trade where comparatively few apprentices have been registered although many are employed as helpers on the assumption that they are to be taught the trade. Very few apprentices are to be found in the painting and decorating trade. A special effort should be made to create conditions which will attract suitable boys to this craft. In the other designated trades, satisfactory progress has been made but it should be borne in mind that the work has just begun.

It has been found that day classes as provided for in regulations cannot be established in all trades until some provision is made for paying the wages of apprentices during school periods from a general fund provided by the government or raised by assessment. The matter of assessment is being carefully considered by the provincial and local committees and it is expected that steps will be taken to inaugurate an assessment scheme similar to that of the Workmen's Compensation Board early in the coming year. Meanwhile, a special effort is being made to have all apprentices attend evening classes and as many as possible attend day classes with pay, wherever such an arrangement can be made by the District Inspector and local committees. Correspondence instruction must be provided for apprentices in small centres but this work will not be undertaken until the limits of day and evening class instruction have been determined.

Developments During the Year

It is too early to report the benefits which have been derived from the Act, but the following notes give some idea of the interest being taken in the work and the efforts being put forth by the building industry to develop an organized system of apprenticeship.

Special day classes for carpentry and bricklaying apprentices were conducted in Toronto and Hamilton during January and February, 1929, and arrangements have been made to extend the scope of day class instruction during the coming winter. In several centres it has been found necessary to employ additional instructors to care for the increased enrolment in evening classes due to the activity of local apprenticeship committees and district inspectors.

Local joint committees have been organized in Toronto, Hamilton, Windsor, London, and Port Arthur. Separate committees of employers and employees have rendered assistance in several other centres.

The Toronto Plumbing and Steamfitting Apprenticeship Committee, which was the first trade committee to be organized, held twenty meetings between July 30th., 1929, and Oct 22nd., 1929, and has made an earnest effort to assist the inspectors in putting the Act into operation. This committee consists of three employers, three representatives of the local union, and the District Inspector as chairman. It cooperated in drafting regulations, supplied information regarding conditions in the plumbing and steamfitting trades in Toronto, and drafted local regulations and rulings which have enabled the inspectors to secure the registration of nearly 300 apprentices out of approximately 540 minors who were employed at these two trades when the Act came into force.

The Plastering Apprenticeship Committee in Toronto has arranged for special day classes, and supplies for this work are being furnished by manufacturers and supply dealers. A special contest for plastering apprentices is to be held in connection with the convention of Master Plasterers to be held in Windsor during the winter.

Each year, the Canadian Construction Council holds a contest for apprentices in bricklaying, carpentry, and plastering, in connection with the annual convention.

The United Brotherhood of Carpenters in Hamilton has announced its intention of donating a prize to the carpentry apprentice making the best progress in school classes each year.

The Hamilton Technical Institute has recently developed a part-time cooperative school for apprentices in various trades and industries and special arrangements have now been made to conduct day and evening classes for apprentices in the building trades. Hamilton is the first city to provide facilities for school training in accordance with the requirements of the Apprenticeship Act and Regulations.

The extent to which the Act has been put into operation cannot be shown by statistics but the appended tables show the distribution of registered apprentices throughout the Province and indicate the growth of the work during the past year.

Inspection of Caisson Work

INSPECTOR: F. A. SWARBRICK.

OFFICE: PARLIAMENT BUILDINGS, TORONTO.

During the past year there has been a satisfactory decrease in caisson disease among workers in compressed air throughout the Province. Seven jobs were under construction ranging from 4 to 7 feet in diameter with a total length of approximately 21,000 feet and the air pressures varied from 4 to 21 pounds per square inch. Approximately 125 men were engaged in this work under compressed air each 24 hours and only two cases of caisson disease were reported, both of which were slight, involving little or no expense for the Workmen's Compensation Board. This gratifying condition is due largely to the excellent cooperation of the contractors engaged in this work who have been willing to comply with the regulations and provide safe working conditions for the men. Instances of negligence on the part of the men have been checked up and on several occasions it has been necessary to stop them going below before they have taken the required hour for meals. Such violations are of no benefit to the contractor but the men have been willing to run the risk in order to get home a little earlier.

The percentage of accidents on these jobs during the year was probably smaller than on any other undertaking in which a similar amount of machinery was used. When such work is carried on in compliance with the regulations a reasonable measure of safety may be ensured the men engaged therein. The safety record for 1929 showed an improvement over that of the previous year when practically the same amount of work was under construction.

APPENDIX

INDUSTRIAL DISPUTES IN ONTARIO, FISCAL YEAR 1929.

(From figures published in the "Labour Gazette")

STRIKES AND LOCKOUTS COMMENCED PRIOR TO FISCAL YEAR 1929

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Northern Ontario	Pulpwood cutters	Oct. 15, 1928	For increase in wages. Terminated December 31, 1928; in favour of workers.	100	1,720
Toronto	Men's clothing factory workers	Aug. 21, 1928	Against alleged violation for employment of union members only. Lapsed during February, 1929.	10	580
Kingston	Plumbers	Apr. 2, 1928	For increase in wages. Lapsed during August, 1929.	10	2,057
Kingston	Sheet metal workers	Apr. 17, 1928	In sympathy with striking plumbers. Terminated December 7, 1928; in favour of employer.	10	274
Total	....	....	....	130	4,631

STRIKES AND LOCKOUTS COMMENCED DURING FISCAL YEAR 1929.

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Hamilton	Knitting factory workers.	Nov. 5, 1928	Against discharge of workers. Terminated November 6, 1928; in favour of employer.	175	263
Brockville	Hat factory workers.	Nov. 14, 1928	Against decrease in price rates. Terminated November 19, 1928; in favour of workers.	30	120
Toronto	Lathers.	Nov. 16, 1928	Against alleged violation of agreement re working conditions. Terminated November 19, 1928; Compromise.	25	25
Toronto	Clothing factory workers.	Nov. 28, 1928	Alleged lockout for union agreement. Terminated February 15, 1929; in favour of employer.	24	1,400
Onion Lake	Tie cutters.	Jan. 28, 1929	For increase in piece rates and in the monthly rate. Terminated March 4, Compromise.	200	5,060

Strikes and Lockouts Commenced during Fiscal Year 1929—Continued

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Hamilton	Textile factory workers.	Jan 30	Against changes in working conditions involving reduction of staff. Terminated March 4; in favour of employer.	750	16,300
Toronto	Photo engravers.	Jan. 7	Alleged lockout of union employees. Work to be resumed March 11 on previous conditions; a dispute arising, workers secured employment elsewhere.	40	1,428
Hamilton	Men's clothing factory workers.	Feb. 20	For union wages and working conditions. Terminated February 27; in favour of workers.	150	1,000
Oshawa	Automobile factory workers (tool and die makers).	Mar. 5	Against appointment of foreman. Terminated March 27; in favour of employer.	25	450
Toronto	Automobile factory workers (assemblers).	Mar. 20	Against change in piece work system. Terminated March 21; in favour of workers.	40	20
Ottawa	Musicians	Mar. 25	To maintain union working conditions. Terminated April 8; in favour of workers.	7	126
Toronto	Shoe factory workers.	Apr. 23	Against reduction in wages. Terminated September 23; indefinite.	33	2,295
Toronto	Metal polishers	Apr. 16	For increase in wages. Terminated April 25; in favour of workers.	11	80
Toronto	Factory labourers	Apr. 8	Against dismissal of foreman. Terminated April 10; in favour of employer.	10	15
Ottawa	Carpenters, cement workers, labourers.	Apr. 19	To secure protection from falling rivets. Terminated April 20; in favour of workers.	70	35
Auburn	Plush weavers.	May 10	For increase in wages. Terminated May 17; in favour of employer.	18	75
Toronto	Painters.	May 1	For increase in wages. Terminated June 15, in favour of workers.	600	7,800

Strikes and Lockouts Commenced during Fiscal Year 1929—Continued

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Toronto	Plumbers.	May 1	For employment with members of one employers' organization only. Terminated May 23; in favour of workers.	400	7,500
Toronto	Stone-cutters.	May 1	For increase in wages and shorter hours. Terminated May 9. Compromise.	120	840
Toronto	Plasterers.	May 1	For increase in wages and to maintain 40-hour week. Terminated May 15. Compromise.	500	6,000
Toronto	Plasterers' labourers.	May 1	In sympathy with strike of plasterers. Terminated May 15. Indefinite.	200	2,400
Toronto	Lathers.	May 1	For increase in wages and to maintain 40-hour week. Terminated May 16. Compromise.	120	1,560
St. Catharines	Carpenters.	May 1	For increase in wages. Terminated May 2; in favour of workers.	60	60
Niagara Falls	Carpenters.	May 2	For increase in wages. Terminated May 6. Compromise.	175	350
London	Painters.	May 6	For increase in wages. Terminated May 20; in favour of employer.	80	800
Windsor	Structural iron workers.	May 11	For increase in wages. Terminated May 25; in favour of employer.	137	1,000
Ottawa	Moulders (brass).	May 29	For increase in wages. Terminated June 4; return of workers on employers' terms.	5	5
Ottawa	Bricklayers and stone-masons.	June 22	For employment of union members only by a sub-contractor on another job. Terminated June 25; workers replaced.	16	32
Taylor	Track labourers.	June 18	For changes in working conditions. Terminated June 19; workers replaced.	68	68
Niagara Falls	Plumbers.	July 2	For union wages and working conditions. Terminated July 5; in favour of workers.	50	150

Strikes and Lockouts Commenced during Fiscal Year 1929—Continued

Locality	Occupation	Commenced	Particulars	Number of employees involved	Time loss in working days
Guelph	Rubber shoe factory workers.	Aug. 28	Against reduction in wages. Terminated August 31. Compromise.	100	350
Hamilton	Plumbers.	Aug. 17	For increase in wages. Terminated August 31; Compromise.	65	950
London	Drivers (milk wagons).	Aug. 24	For signed agreement with improved working conditions. Terminated August 24; Indefinite.	36	36
Toronto	Factory workers (knitted silk goods).	Sept. 25	Against lower piece rates on new type of work. Terminated October 8, Compromise.	110	1,210
Hamilton	Factory workers (steel railway cars).	Sept. 4	For higher piece rates on new type of work. Terminated October 18; in favour of employer.	280	8,440
Thunder Bay District	Pulpwood cutters and camp workers.	Oct. 14	For increase in wages. Unterminated at end of fiscal year.	200	2,000
Toronto	Coppersmiths.	Oct. 1	For increase in wages. Unterminated at end of fiscal year.	16	432
Toronto	Silversmiths.	Oct. 25	For increase in wages and union agreement. Unterminated at end of fiscal year.	90	540
Ottawa	Stage hands.	Oct. 28	Against decrease in wages. Unterminated at end of fiscal year.	6	24

REPORT

RELATING TO THE REGISTRATION OF

BIRTHS, MARRIAGES AND DEATHS

IN THE

PROVINCE OF ONTARIO

FOR THE

YEAR ENDING 31st DECEMBER

1929

(BEING THE SIXTIETH ANNUAL REPORT)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

SESSIONAL PAPER No. 24, 1929

ONTARIO

TORONTO:
Printed and Published by Herbert H. Ball, Printer to the King's Most Excellent Majesty
1931

SIR:—

I have the honour to submit for your approval the Sixtieth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1929.

I have the honour to be, Sir,
Your obedient servant,

W. J. Bell
Deputy Registrar-General.

TO THE HON. FORBES GODFREY,
Registrar-General of Ontario.

TO HIS HONOUR THE LIEUTENANT-GOVERNOR OF THE PROVINCE OF ONTARIO.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Sixtieth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1929.

Respectfully submitted,

FORBES GODFREY,

Registrar-General of Ontario.

REPORT UPON
Births, Deaths and Marriages
FOR THE YEAR 1929

The Sixtieth Report of the Registrar-General for the Province of Ontario, is herewith presented:

POPULATION

The estimated population is 3,271,000, distributed as follows:

City municipalities	1,392,223 or 42.56	per cent.
Towns (over 5,000 population)	214,917 or 6.57	per cent.
Rural (including all other municipalities)	1,663,860 or 50.87	per cent.

ESTIMATED POPULATION 1929 BY AGE GROUPS

	Males	Females	Totals
Totals	1,659,500	1,611,800	3,271,300
Under 1	37,173	35,782	72,955
1	34,186	33,042	67,228
2	37,671	36,749	74,420
3	37,671	36,749	74,420
4	37,671	36,588	74,259
5– 9	183,209	178,104	361,313
10–14	175,907	170.045	345,952
15–19	168,605	166,982	335,587
20–24	157,652	161,502	319,154
25–29	136,577	136,681	273,258
30–34	117,327	114,438	231,765
35–39	106.872	102,027	208,899
40–44	92,434	88,327	180,761
45–49	79,988	74,949	154,937
50–54	69,035	65,600	134,635
55–59	53,768	50,127	103,895
60–64	47,296	43,841	91,137
65–69	34,351	31,269	65,620
70–74	24,560	23,048	47,608
75–79	15,101	14,023	29,124
80–84	4,082	3,884	7,966
85–89	1,493	1,514	3,007
90 and over	531	580	1,110

BIRTHS

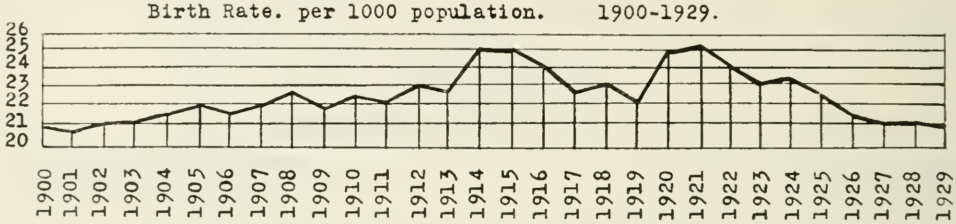
	1929		1928	
	Number	Ratio	Number	Ratio
Province	68,458	20.9	68,510	21.2
Cities	32,478	23.3	31,602	23.6
Towns	6,288	29.2	5,939	27.8
Rural	29,692	17.8	30,969	18.4

Of the above, 35,154 were males and 33,304 females, giving a rate of 1,055 males to 1,000 females. The fluctuation in these proportions in a period of twenty years has been from 1,053 to 1,117, with no particular trend excepting in the five years 1916 to 1920, when there was an increase in masculinity of from 1,063 males in 1916 to 1,117 males in 1920 to 1,000 females.

NUMBER OF BIRTHS AND RATE FOR 10 YEARS

Year	Number	Ratio	Year	Number	Ratio
1920	72,511	25.1	1925	70,122	22.6
1921	74,152	25.3	1926	67,617	21.5
1922	71,320	23.9	1927	67,671	21.2
1923	70,056	23.1	1928	68,510	21.2
1924	71,510	23.3	1929	68,458	20.9

It will be immediately noted that there has been a decline in the birth rate from the high point (25.3) reached in 1921, and seems to be quite consonant with the birth rate in all other countries.



Birth Rate. per 1000 population. 1900-1929.

NATURAL INCREASE BY RATES PER 1,000 OF POPULATION

	Birth Rate	Death Rate	Rate of Natural Increase		Birth Rate	Death Rate	Rate of Natural Increase
1910	22.4	12.5	9.9	1920	25.1	14.0	11.1
1911	22.2	12.6	9.6	1921	25.3	11.8	13.5
1912	22.9	12.5	10.4	1922	23.9	11.4	12.5
1913	22.7	13.1	9.6	1923	23.1	11.8	11.3
1914	25.0	12.2	12.8	1924	23.3	10.8	12.5

1916	23.9	13.0	10.9	1926	21.5	11.4	10.1
1917	22.6	12.0	10.6	1927	21.2	10.9	10.3
1918	23.0	15.3	7.7	1928	21.2	11.5	9.7
1919	22.0	11.9	10.1	1929	20.9	11.7	9.2

The largest natural increase during the past twenty years was in 1921, when there were 13.5 more births per 1,000 of population than deaths. A high rate was reached in 1914, the year war was declared and it gradually declined during the war years (for the rate in 1918 cannot be considered as at all normal, due to the tremendous number of deaths in that year from influenza). After the armistice and the men began to return the rate increased gradually until the high mark of 13.5 was reached in 1921. From this point a gradual decline is indicated until what might be considered a normal rate was again established. The rates in the last quinquennial of the period agree approximately with those in the first quinquennial.

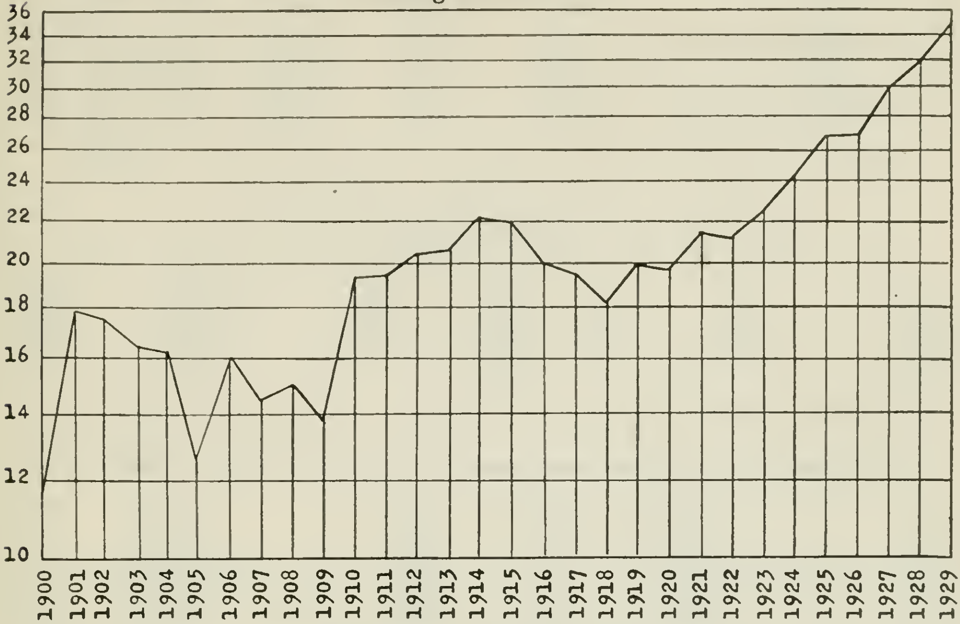
ILLEGITIMATE BIRTHS

Rate per 1,000 living births

1900	12.5	1908	14.9	1915	21.9	1922	21.2
1901	17.7	1909	13.7	1916	20.9	1923	22.5
1902	17.5	1910	19.3	1917	19.5	1924	24.2
1903	16.4	1911	19.4	1918	18.2	1925	26.8
1904	16.2	1912	21.3	1919	19.8	1926	26.9
1905	12.5	1913	21.6	1920	19.7	1927	28.9
1906	15.9	1914	22.1	1921	21.5	1928	31.7
1907	14.4					1929	34.7

The above table indicates a steady rise in the rates of illegitimacy in the Province. It has almost trebled in the 30 years shown in above table. The increase in 1929 over the rate of 1928 is the greatest in nineteen years. The admitted freedom exercised between the sexes during the last several years may in some measure be responsible. In the first decade shown above the increase was 9.5%. In the second decade the increase was 44.5%. In the third decade 75.2%.

Rate of Illegitimacy. Number of illegitimate births per 1000 living births.



STILL-BIRTHS

Year	Registered as Births	Ratio per 1,000 total Births
1920	2,495	33.3

MARRIAGES

	1929		1928	
	Number	Ratio	Number	Ratio
Province	27,605	8.4	25,728	8.0
Cities	16,617	11.9	15,242	11.4
Towns	2,347	10.9	2,112	9.9
Rural	8,641	5.2	8,374	4.9

See Tables 12 to 18.

NUMBER AND RATIO PER 1,000 POPULATION FOR 10 YEARS

Year	Marriages	Ratio	Year	Marriages	Ratio
1920	29,104	10.0	1925	23,074	7.4
1921	24,871	8.5	1926	23,632	7.5
1922	23,360	7.8	1927	24,677	7.7
1923	24,842	8.2	1928	25,728	8.0
1924	24,038	7.8	1929	27,605	8.4

The marriage rate remains fairly steady, the fluctuations from year to year being comparatively small and showing no decided trend to rise or decline.

(k) Diphtheria	....	653	....	....	....	....	....	....	....	....
	....	22.2	....	....	....	....	....	....	....	....

The above table shows the ten highest causes of death and these account for 25,587 of all deaths, or 67.2%. Increased rates are indicated in four, viz.: Organic Heart Diseases, Influenza, Diseases of the Arteries, and Infantile Diarrhoea. Decreases occurred in Pneumonia, Tuberculosis, Cancer, Accidental and other external causes, and Apoplexy, and no change worth noting in the rate of Bright's Disease.

There is indicated a slight decline in the death rate from Cancer this year. In 1928, it was 106.5, and this year is 104.0 per 100,000 of population. The last drop was in 1925, when it fell 1.1 in the hundred thousand and there is no reason to believe that the drop this year will be maintained. There are fluctuations in the rate of each type of cancer classification, the greatest of which is in cancer of the stomach. Here the decline is 2.5, agreeing with the decline in the whole class. This is a drop of 2.5 in the rate.

Tuberculosis is down to eighth place and is at the lowest point ever reached. The rate is 52.0 per 100,000 of population and is 9% of a decline. The rate for 1929 was only two-thirds the rate of 1919, a reduction of 50%. This is substantial evidence proving the benefit derived from the efforts put forward by health authorities to exterminate the White Plague, as it was at one time popularly known.

INFANT MORTALITY

Deaths of Children Under One Year—Principal Causes of Death

CANCER

There were 39 fewer deaths from cancer in 1929 which, with the normal increase in population, brought the death rate down by 2.5. This, while not the first decline in the rate, it is the first time since 1918 that the actual number of deaths reported has been lower.

Table showing the distribution of deaths from various types according to class and rates per 100,000 of population as follows:—

	1920		1921		1922		1923		1924		1925		1926		1927		1928		1929

The foregoing Table shows the death rates by age groups. It is interesting to note in the five years shown how consistently the female rate exceeds the male up to about the end of the sixties, when the rate is higher among the males.

MATERNAL MORTALITY

Province—368, being 5.18 deaths per 1,000 births.*
Cities and towns—262, being 6.48 deaths per 1,000 births.
Rural—106, being 2.62 deaths per 1,000 births.

*Still-births included.

Number of Deaths and Rate per 1,000 Births (Including Still-births)

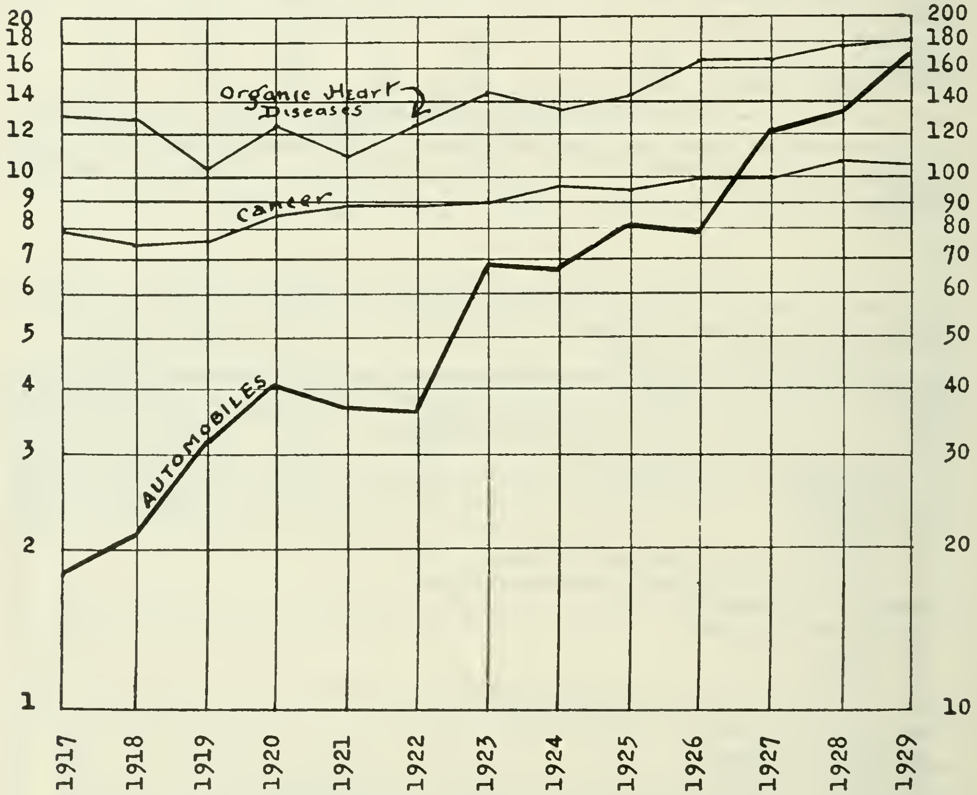
Death rates from automobiles, per 100,000 population.



LEFT index for automobile death rates
RIGHT index for organic Heart and cancer death rates.

The above graph shows the death rates from automotive accidents compared with the rates from deaths from organic heart diseases and cancer.

For years it has been an appalling fact that these two causes have been responsible for a very large proportion of deaths (between 24% and 25% of all deaths) in our province and with a steadily increasing rate.

Although deaths from automotive vehicles have been few in number when compared with the huge totals piled up by cancer, organic heart, or tuberculosis, and the rates consequently lower, the fact is that the rate of deaths from automotive accidents is increasing by leaps and bounds.

Table 1—General Summary of Births, Deaths and Marriages in Ontario by County Municipalities (including Cities and Towns), 1929.
